

Is **ciclovia.com.py** legit? TrustSniffer's high-trust assessment: **100/100**

ciclovia.com.py

Verdict

100

OUT OF 100

HIGH TRUST

ciclovia.com.py appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 70%.

What this site appears to be

Ecommerce homepage for Ciclovia offering bicycles, fitness equipment and accessories targeted to Paraguay. Includes product prices (PYG), categories, contact phone numbers/addresses, newsletter and checkout flows. No explicit suspicious prompts or credential harvesting observed in page text.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

What ciclovía.com.py served when TrustSniffer captured it on 2026-08-20. The page may look different now.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2006.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Ciclovía is an online retail store serving Paraguay, presenting bicycles, fitness equipment, accessories, apparel, auto-accessories, and nutritional products through product listings priced in Paraguayan guaraníes, with local contact details, shipping information, newsletter functionality, and standard shopping and checkout workflows.

Scam/Impersonation Risk

No contradiction-based scam or impersonation indicators were observed. The homepage presents a coherent retail model rather than a deceptive investment or credential-harvesting proposition, and the site does not show brand impersonation, phishing prompts, hidden forms, external password forms, or cloaking. Behavioral testing did identify two suspicious inline scripts, substantial DOM changes after interaction, and two non-whitelisted outbound posts; however, these technical anomalies were not accompanied by a confirmed abuse pattern, and the overall evidence remains consistent with a low-risk retail website.

EVIDENCE

- Domain continuity: 2006 (~20.28 years old).
- Web archive: 252 snapshots spanning 2006–2026 (21 years tracked).
- Homepage: product catalog, local retail content, contact information, and ordinary ecommerce navigation were present without explicit fraud indicators.
- Behavioral testing: 2 suspicious inline scripts, 2 non-whitelisted external posts, 0 hidden forms, 0 external password forms, and cloaking classification “none.”

Regulatory Verification Notes

The site appears to operate as a conventional retailer rather than presenting a regulated financial service. Its pages provide commercial, contact, shipping, and returns-related information, but the available evidence does not independently verify the real-world operator identity. No regulatory license or registration number is claimed in the supplied site content; this is a transparency and verification point, not evidence of a scam. Independent reputation observations were clean, although coverage was partial.

EVIDENCE

- Hosting infrastructure: AS54113 (FASTLY - Fastly, Inc., US).
- TLS certificate: issuer YR2, domain validation (DV), valid to 2026-10-20T10:23:29+00:00.
- Homepage: presents retail categories, Paraguayan-guaraní pricing, customer account functions, newsletter signup, and checkout/cart functionality.
- External reputation observations: 0 malicious detections, 0 suspicious detections, 0 abuse reports, and no matched broker warning.

What to Verify Next

Before credential or payment interactions, the prospective customer should independently confirm the merchant’s legal identity, applicable consumer terms and return conditions, payment-protection options, and official contact channels. If a transaction involves an activity subject to sector-specific authorization, the relevant Paraguayan registry should be consulted to confirm whether any authorization is required.

EVIDENCE

- Homepage: account, newsletter, and checkout/cart functions are exposed as standard site workflows.
- Site content map: shipping and returns information is identified as part of the commercial content.
- Business model: direct product sales and online payments for bicycles, fitness equipment, accessories, and nutritional products.

Summary Verdict

The available evidence supports a **high-trust, low-risk posture** for an apparently legitimate and established ecommerce website. No contradiction-based scam, phishing, blacklist, or impersonation concern was identified, although the operator’s real-world identity remains independently unverified.

Infrastructure Integrity

The website is delivered through Fastly's CDN/WAF infrastructure, with observed hosting associated with Fastly, Inc. and AS54113. This edge-based architecture is a mitigating security signal because it provides mainstream delivery and protective filtering, but it supports infrastructure integrity rather than independently proving merchant identity.

Closing Assessment

Normal browsing is proportionate to the assessed posture; account or payment activity should proceed after the ordinary merchant-identity, consumer-protection, and payment-safeguard checks described above.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of [ciclovia.com.py](#).

- The request stayed on [ciclovia.com.py](#). It was not redirected to another domain. [CLEAR](#)
- The earliest public archive of this site is from 2006-05-11. [CLEAR](#)
- It is hosted on FASTLY, from a server in US. [NOTED](#)

About this assessment

A trust score summarises the evidence TrustSniffer could collect about ciclovia.com.py at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
