

Is cie-co.com legit? TrustSniffer's high-trust assessment: 90/100

cie-co.com

Verdict

90

OUT OF 100

HIGH TRUST

cie-co.com appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 50%.

What this site appears to be

The page displays PHP warnings and a fatal error originating from WordPress plugins (js_composer, woocommerce, wppu-preloader-unlimited). The site appears misconfigured or broken; no content, forms, or monetization present on this page.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

What cie-co.com served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2010.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website at cie-co.com currently resolves to a malfunctioning WordPress page rather than a functioning commercial service: visitors are shown exposed PHP warnings and a fatal plugin error, with no visible products, forms, or monetization. Its apparent business purpose therefore cannot be established from the present homepage.

Scam/Impersonation Risk

No contradictions were observed. Available reputation checks identified no malicious detections, blacklist indicators, abuse reports, phishing behavior, or brand-impersonation signals, and the historical assessment found no suspicious repurposing or semantic drift. The exposed server errors are a material operational-quality defect, but they do not by themselves indicate impersonation or a scam mechanism. The current page also presents no login form, payment form, external submission destination, wallet interaction, or other sensitive-action surface.

EVIDENCE

- The homepage is classified as an error page and displays PHP warnings and a fatal error associated with the `js\_composer`, WooCommerce, and WPPU Preloader Unlimited plugins.
- Browser-behavior testing recorded no external activity, hidden forms, redirects, cloaking, wallet-provider activity, or clipboard manipulation.
- Historical assessment found no suspicious repurposing or semantic drift, while available external checks showed no blacklist or malicious-abuse indicators.

Regulatory Verification Notes

The available evidence is consistent with an established domain, but the real-world operator is not independently verified. The registration record names Sanat Electric Iranian and identifies CSL Computer Service Langenbach GmbH, doing business as joker.com, as registrar; these are concrete registration facts, not independent proof that the current website is operated by that organization. The captured homepage makes no license claim, registration number, or regulatory status disclosure, so any regulated activity would require separate confirmation. The absence of a visible licensing disclosure is a transparency and verification gap rather than evidence of a scam.

EVIDENCE

- Domain registration record: created 2008-09-29 and recorded as 17.9 years old; registrar CSL Computer Service Langenbach GmbH d/b/a joker.com.
- The registration record lists “Sanat Electric Iranian” as the organization.
- The site's TLS certificate is DV-validated, issued by YR1, and valid through 2026-11-12.
- Hosting resolves to AS24940, HETZNER-AS — Hetzner Online GmbH, Germany.

What to Verify Next

Before credential or payment interactions, an independent corporate-identity check should establish that the operating entity is connected to the domain and to any service later presented on the site. If the site resumes commercial or regulated activity, its applicable license or registration should be confirmed directly with the relevant official registry, and merchant terms, returns, and payment-protection arrangements should be reviewed through independently sourced information. Official contact channels should also be confirmed through an independent route before sensitive exchanges.

EVIDENCE

- The current homepage does not provide a usable basis for confirming the site's service, transaction terms, or operating entity.
- The registration information supplies a named organization but does not independently verify its relationship to the live website.
- No license claim or regulatory number is visible in the captured site content.

Summary Verdict

Available evidence supports a high-trust, low-risk posture for the domain as an established website, with no observed scam or impersonation contradictions. The conclusion is appropriately qualified because the current operator identity and intended business function remain unverified.

Infrastructure Integrity

The website is protected by CDN/WAF infrastructure, with observed edge service on AS24940 operated by Hetzner Online GmbH; the infrastructure includes edge and potential origin candidates. This protection is a mitigating control against direct exposure and abuse, but it is not proof of operator legitimacy.

Closing Assessment

Ordinary independent merchant-identity, service-terms, and payment-protection checks should be completed before credentials or funds are committed, particularly because the present site is not operationally usable.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of cie-co.com.

- The request stayed on cie-co.com. It was not redirected to another domain. CLEAR
- Registration is published under CSL Computer Service Langenbach GmbH d/b/a joker.com. CLEAR
- DNS for this domain is served by irwebhost.com, across 2 name servers. NOTED
- The registration is paid up to 2026-09-29. NOTED
- The earliest public archive of this site is from 2010-10-31. CLEAR
- It is hosted on HETZNER-AS, from a server in DE. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about cie-co.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
