

Is cienciainformativa.com.br a scam? TrustSniffer's high-risk assessment: 0/100

cienciainformativa.com.br

Verdict

0

OUT OF 100

CRITICAL RISK

cienciainformativa.com.br shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 55%.

What this site appears to be

This page is a parked domain landing served by Hostinger with promotional links to hosting products (website builder, VPS, email) and a domain management call-to-action. No forms or account login present.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

At a glance

The checks that decide most of this verdict.

Malware engines	8 flagged it VirusTotal	RISK
Google Safe Browsing	Not listed Google	CLEAR

Registered at  **HOSTINGER**

If this is your domain, you can manage it in your Hostinger account.

What cienciainformativa.com.br served when TrustSniffer captured it on 2026-08-20. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: less than 1 year (registration continuity).
- Public web-archive history exists since 2016.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

This is a parked domain landing page for cienciainformativa.com.br, presenting Hostinger promotional links for website building, VPS hosting, business email, domain management, and domain resale; its apparent purpose is to monetize an undeveloped domain rather than provide an active business or user service.

Scam/Impersonation Risk

The site itself does not present an active login, payment flow, account function, or deceptive brand impersonation, and its visible content contains no direct phishing form. However, the domain is **blacklisted** across multiple external sources, with malicious detections including Fortinet, creating a confirmed contradiction that outweighs the benign parked-page presentation. Separate abuse reports concern the shared hosting-provider IP rather than being specifically attributed to the domain, but they remain relevant infrastructure-level context. No identity contradiction or explicit brand-impersonation pattern was observed; the principal concern is the confirmed external threat reputation and the resulting unsuitability of sensitive interaction.

EVIDENCE

- External reputation telemetry records 8 malicious detections and 1 suspicious detection, including a Fortinet threat detection; the domain is also marked blacklisted by two external sources.
- The hosting IP 2.57.91.91 has 28 abuse reports, attributed to shared infrastructure operated by Hostinger International Limited rather than specifically to the website.
- Historical records show 62 archive snapshots spanning 2016–2026, with 11 years tracked and no detected semantic repurposing.

Regulatory Verification Notes

The homepage is a parked-domain notice, not an operating financial, commercial, or regulated-service presentation. It does not claim a license or provide a licensing authority or registration number, so there is no regulatory basis in the page content for treating it as a licensed operator. The real-world operator remains unverified. A separate broker-reputation dataset produced no name match; that result is contextual only and does not establish licensing or legitimacy.

EVIDENCE

- The homepage is titled “Parked Domain” and contains hosting, VPS, website-builder, email, and domain-search promotions rather than legal or regulated-service disclosures.
- The available registration record identifies a creation date of 2026-02-05 and an age of approximately 0.54 years.
- The site uses a valid DV TLS certificate issued by WR1, valid through 2026-09-26.

What to Verify Next

Before any sensitive interaction, an independent registry check should confirm whether a real-world operator exists and whether any claimed or intended activity requires authorization. The domain’s official contact and support channels should be confirmed through an independently sourced route, and any destination reached through the parked-page promotions should be assessed separately rather than assumed to inherit the domain’s status. No credentials, financial information, or account enrollment should be provided unless those checks produce a clear and independently corroborated basis for engagement.

EVIDENCE

- The homepage provides promotional navigation but no active account, login, or transaction workflow to validate.
- The licensing and operator checks should be performed against the relevant official registry, not solely against statements made on the website.
- Any linked hosting, domain, or email service should be verified as a separate endpoint and commercial relationship.

Summary Verdict

The overall posture is **critical risk**. Available evidence does not support treating this domain as a verified or trustworthy platform for sensitive interaction, even though the page currently behaves as a low-functionality

parked landing page.

Infrastructure Integrity

The site resolves directly to one likely origin endpoint on AS47583, operated by AS-HOSTINGER—Hostinger International Limited in Cyprus; no CDN or WAF edge was detected. The site’s transport encryption is valid, but direct hosting and a DV certificate provide only basic technical protection and do not offset the external reputation concerns.

Closing Assessment

Limit activity to passive inspection and defer credentials, account creation, payments, or other financial actions until independent operator and authorization checks have been completed.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox, external reputation.

- 01 Governance Risk

 - The public registration record for this domain is incomplete.
Registration and ownership rule:KF_WHOIS_INCOMPLETE
- 02 Sensitive Interaction Risk

 - The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
 - Most of what the page loaded came from other domains rather than from this one.
Behaviour in a sandbox rule:BEHAV_EXTERNAL_RATIO_HIGH
 - An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Signals weighed against the site

- AbuseIPDB: 28 reports on hosting IP 2.57.91.91 (Hostinger International Limited, Content Delivery Network), 34% confidence. The reports are attributed to shared infrastructure, not specifically to this website.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of cienciainformativa.com.br.

- The request stayed on cienciainformativa.com.br. It was not redirected to another domain. CLEAR
- DNS for this domain is served by dns-parking.com, across 2 name servers. NOTED
- The registration is paid up to 2027-02-05. NOTED
- The earliest public archive of this site is from 2016-07-14. CLEAR
- It is hosted on AS-HOSTINGER, from a server in CY. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about cienciainformativa.com.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
