

Is cikgujoyce.com a scam? TrustSniffer's high-risk assessment: 0/100

cikgujoyce.com

Verdict

0

OUT OF 100

CRITICAL RISK

cikgujoyce.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 55%.

What this site appears to be

Extremely minimal page containing only the string 'cikgujoyce'. No forms, links, social links, or metadata beyond a title-like token.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

The page as captured

<https://cikgujoyce.com/>

Tällä sivustolla käytetään Googlen evästeitä palveluiden toimittamiseen ja liikenteen analysoimiseen. IP-osoitteesi ja käyttäjäagenttisi jaetaan Googlelle. Google saa myös suorituskyky- ja suojaustiedot, joiden avulla voidaan varmistaa laadukkaat palvelut, luoda käyttäjätilastoja, havaita väärinkäyttöä sekä reagoida siihen.

What cikgujoyce.com served when TrustSniffer captured it on 2026-08-20. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2021.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

This website is an extremely minimal personal or placeholder page that presents only the identifier “cikgujoyce” to visitors, with no visible service, commercial offering, or clear business purpose.

Scam/Impersonation Risk

The site has a clearly cautionary risk posture because external reputation evidence includes a confirmed blacklist result and multiple malicious detections. These are direct contradictions to treating the domain as suitable for sensitive interaction, even though no brand impersonation, login form, or phishing interface was observed on the captured page. Abuse reports associated with an Amazon content-delivery IP are attributed to shared infrastructure, so they are not conclusive proof that the site itself generated those reports; however, the separate domain-level blacklist and malicious-detection signals remain materially significant. No suspicious contact email was identified.

EVIDENCE

- The domain is listed by external blacklist sources, including VirusTotal and a separate blacklist source.
- VirusTotal recorded 5 malicious and 2 suspicious detections for the domain.
- The homepage contains only the text “cikgujoyce,” with no links, forms, or service context.
- 18 abuse reports were associated with Amazon Technologies Inc. IP address 3.33.251.168; the attribution identifies shared CDN infrastructure.

Regulatory Verification Notes

The available page does not identify a legal entity, regulated service, licensing authority, or registration number. Because the site presents no discernible commercial or financial activity, the licensing position cannot be determined from its content; this is a verification gap rather than independent proof of fraud. The domain has been registered through GoDaddy.com, LLC since 2019 and uses a valid domain-validated TLS certificate issued by GoDaddy TLS Intermediate CA DV - R1v1. These infrastructure and registration facts provide technical continuity but do not independently verify the operator’s real-world identity, which remains unverified.

EVIDENCE

- Domain registration: Registered 2019-09-19 (~6.92 years old), with GoDaddy.com, LLC as registrar.
- Hosted on AS16509 (AMAZON-02 - Amazon.com, Inc., US).
- TLS certificate: GoDaddy TLS Intermediate CA DV - R1v1, validation level DV, valid to 2027-01-30.
- The homepage provides no legal-entity, licensing, or regulatory-registration disclosure.

What to Verify Next

Before any non-read-only interaction, an independent route should establish who controls the domain and whether any proposed activity is subject to licensing. Any claimed operator or service should be checked against the relevant official registry, and contact channels should be confirmed through an independently sourced route rather than relying solely on the website. Credentials, account access, and financial activity should remain deferred unless those checks produce consistent results.

EVIDENCE

- The homepage has no contact links, social links, or external references from which an operator could be independently corroborated.
- No login form, password form, wallet connection, or other sensitive-input mechanism was detected during behavioral testing.
- The page title and body provide only the identifier “cikgujoyce,” leaving no stated service or regulatory claim to validate.

Summary Verdict

The overall posture is **critical trust risk**. The available evidence does not support treating the site as a legitimate destination for sensitive interaction, and the operator’s real-world identity has not been independently established.

Infrastructure Integrity

The website is served through Amazon's CDN/WAF infrastructure, with observed traffic terminating at edge addresses rather than an identifiable origin server. This provides a degree of exposure mitigation and can also support rapid content delivery, but protective edge infrastructure does not offset the domain-level reputation contradictions.

EVIDENCE

- CDN/WAF edge addresses observed: 15.197.225.128 and 3.33.251.168.
- Both observed edge addresses belong to AS16509; no likely origin IP candidate was identified.
- Hosting provider: AMAZON-02 - Amazon.com, Inc., US.

Closing Assessment

The appropriate posture is read-only observation only until independent operator, regulatory, and contact-channel checks are completed; account login, credential submission, and financial transactions should not be undertaken.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox, external reputation.

01 Governance Risk

- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.

Registration and ownership rule:KF_WHOIS_PRIVATE

- The registration record withholds contact details for the operator.

Registration and ownership rule:KF_WHOIS_HIDDEN

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.

Analysis engine signal:direct_threat

- Most of what the page loaded came from other domains rather than from this one.

Behaviour in a sandbox rule:BEHAV_EXTERNAL_RATIO_HIGH

- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.

External reputation rule:EXT_BLACKLIST_CRITICAL

Signals weighed against the site

- AbuseIPDB: 18 reports on hosting IP 3.33.251.168 (Amazon Technologies Inc., Content Delivery Network), 15% confidence. The reports are attributed to shared infrastructure, not specifically to this website.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of cikgujoyce.com.

- The request stayed on cikgujoyce.com. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by domaincontrol.com, across 2 name servers. NOTED
- The registration is paid up to 2030-09-19. CLEAR
- The earliest public archive of this site is from 2021-11-28. CLEAR
- It is hosted on AMAZON-02, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about cikgujoyce.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
