Full analysis

Overview

Círculo de Crédito is a Mexican financial-information service that provides consumer and business credit reports, credit scores, monitoring, identity-protection features, financial education, and related account services.

Scam/Impersonation Risk

No contradictions, phishing indicators, brand-impersonation signals, or confirmed malicious findings were observed. The homepage presents a coherent credit-reporting business model through Credit Score, Mi RCE, notifications, credit-history protection, business solutions, and a mobile application; it does not promote crypto, investment returns, or other deceptive high-risk mechanisms.

- The homepage describes credit scores, special credit reports, monitoring, protection, and financial education.
- The homepage analysis recorded no phishing indicators, hidden forms, suspicious scripts, wallet activity, or external sensitive-form destinations.
- External reputation checks recorded zero malicious and zero suspicious detections, with no blacklist finding.

Regulatory Verification Notes

The site presents regulatory, privacy, terms, contact, and physical-address information, supporting an identifiable operating presence. The supplied evidence does not establish a specific license or registration number; this is a limited verification point for the applicable Mexican regulatory framework, not evidence of deception. The domain and named registrant also support an established identity, while the absence of a broker-dataset match provides additional neutral-to-positive reputational context.

- The homepage includes regulatory, privacy, contact, and physical-address information.
- The domain was registered on 2003-06-06 and is approximately 23.17 years old; registrar: AKKY ONLINE SOLUTIONS, S.A. DE C.V.; registrant: Circulo de Credito, S.A. de C.V.
- Hosted on AS16509 (AMAZON-02 - Amazon.com, Inc., US).
- TLS certificate issued by Amazon RSA 2048 M04, validation level DV, valid to 2026-11-02.

What to Verify Next

For regulated onboarding or institutional use, confirm the service's applicable authorization and registration details directly with the relevant Mexican authority, and validate official contact channels through an independently sourced corporate record. Standard account login and normal service interaction are appropriate.

- The legal and regulatory pages provide the appropriate locations for confirming disclosure details.

- The contact and physical-address pages provide channels for independent organizational verification.

Summary Verdict

The website presents as a legitimate, established, and trustworthy financial-information service. Convergent identity, content, reputation, behavioral, and technical signals support normal interaction without an identified scam or impersonation concern.

Infrastructure Integrity

The site is served through Amazon infrastructure with a valid Amazon-issued DV TLS certificate. This provides a sound transport-security and hosting baseline and is a mitigating infrastructure signal, although infrastructure alone does not establish legitimacy.

Closing Assessment

Prospective users and institutions may proceed with normal account access and standard use, applying ordinary controls appropriate to any financial-information service.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about circulodecredito.com.mx at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
