## Key findings

---

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 1996.
- No flags from the reputation services TrustSniffer consulted at assessment time.

## Full analysis

---

### Overview

The website is Citi's established financial-services portal, presenting online banking access alongside credit cards, deposit accounts, mortgages, personal loans, investing, and wealth-management services funded through lending income, fees, interchange, and advisory activities.

### Scam/Impersonation Risk

No identity contradictions, brand impersonation, phishing behavior, or confirmed malicious reputation signals were observed. The conventional online-banking sign-in form submits to a trusted destination, with no hidden forms, external password collection, cloaking, or browser-manipulation behavior detected. Historical records are consistent with a banking purpose and show no evidence of domain repurposing. The site's custodial control of customer funds is inherent to its banking function and does not constitute a fraud indicator.

- The homepage presents one visible online-banking login form; its form analysis found no untrusted destination, hidden form, or external password submission.
- Independent reputation telemetry recorded 0 malicious and 0 suspicious detections, no search-browsing safety hit, no external threat-list finding, and no matching malicious signatures.
- The domain was registered in 1991 and is approximately 35.52 years old; registration is maintained through CSC Corporate Domains, Inc. until 2033.
- Historical records contain 216 archive snapshots spanning 1996–2008 across 13 tracked years, with no suspicious repurposing or semantic shift established.

### Regulatory Verification Notes

The reviewed homepage identifies a coherent, mature banking business and provides detailed product categories and promotional terms, but the supplied page material does not establish a specific licensing authority, registration number, or jurisdictional authorization. This is a scope limitation in the reviewed disclosure set rather than evidence of illegitimacy. No corresponding broker-profile match was identified, but that contextual result is neither a licensing determination nor an adverse reputational finding. The extended-validation certificate provides strong technical identity binding to Citigroup Inc.

- The homepage identifies the service as Citi and consistently describes retail and commercial banking, lending, card, investment, and wealth-management activities.
- The homepage advertises a Diamond Preferred card promotion with a 21-month introductory balance-transfer period, a 12-month introductory purchase period, and no annual fee, accompanied by promotional terms.
- The site's transport encryption uses an EV certificate issued by DigiCert EV RSA CA G2 to Citigroup Inc., valid until 2026-10-08.

- The reviewed homepage contains no stated license number or named licensing authority; the third-party broker dataset returned no matched profile.

**What to Verify Next**

For institutional onboarding or regulated counterparty use, the relevant Citi legal entity should be mapped to the intended product and jurisdiction, then confirmed directly in the applicable banking, securities, or insurance registry. Contracting parties, account terms, deposit-protection status, and product-specific disclosures should be reviewed through the appropriate legal documentation. Official contact channels should be confirmed independently for unusually sensitive or high-value instructions.

- The homepage spans banking, card, lending, investment, insurance, and wealth services, which may involve different legal entities and regulatory frameworks.
- Product navigation includes account-opening, advisory, mortgage, small-business, and self-directed-investment pathways, making product-specific entity validation appropriate.
- The available review material is centered on the public homepage rather than a complete set of jurisdiction-specific legal and regulatory documents.

**Summary Verdict**

This is a legitimate, long-established, and trustworthy institutional website with consistent identity, substantial historical continuity, a strong global traffic footprint, and clean external reputation evidence. Normal interaction, including account login, account activity, and standard transactions, is appropriate.

**Infrastructure Integrity**

The website is served through Akamai’s mainstream content-delivery infrastructure, which reduces direct origin exposure and provides conventional enterprise-scale edge protection. This is a meaningful security-control indicator, although infrastructure protection is not treated independently as proof of legitimacy.

- The hosting infrastructure serves the site from AS33905, operated by AKAMAI-AMS—Akamai International B.V.
- The observed edge address is categorized as content-delivery-network infrastructure, with no recorded abuse reports and no associated confidence indication of abuse.

**Closing Assessment**

Prospective users may engage with the site normally, while institutions conducting formal onboarding should complete their standard entity, jurisdiction, and counterparty due-diligence procedures.

Written analysis generated 2026-08-03 by the TrustSniffer Analysis Engine from the evidence in this report.

**What the analysis found**

No rule findings contributed to this verdict.

**Identity verification**

|                                  |            |
|----------------------------------|------------|
| Status                           | UNVERIFIED |
| Identity score                   | 30/100     |
| Identity verification confidence | 50%        |

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

### What TrustSniffer observed

First-party facts recorded during the assessment of citibank.com.

- The request for citibank.com ended on www.citi.com, a different domain. WATCH
- Registration is published under CSC Corporate Domains, Inc.. CLEAR
- DNS for this domain is served by nsroot1.com, across 2 name servers. NOTED
- The registration is paid up to 2033-02-03. CLEAR
- The earliest public archive of this site is from 1996-12-26. CLEAR
- It is hosted on AKAMAI-AMS, from a server in US. NOTED

### About this assessment

A trust score summarises the evidence TrustSniffer could collect about citibank.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
