Full analysis

Overview

This website is a Chinese-language gaming blog focused on news, guides, walkthroughs, and private-server information for the Legend game franchise, presenting dated articles and gameplay commentary through a content-driven publishing model rather than direct financial or investment services.

Scam/Impersonation Risk

No contradictions were observed. The homepage presents a coherent informational gaming purpose, with no sign-in form, payment flow, investment offer, wallet interaction, or detected brand-impersonation pattern. Available reputation checks produced no malicious findings, and the site's historical provenance record shows no suspicious repurposing or semantic drift. The relatively recent domain registration means that the publisher's real-world identity should remain treated as unverified, but this is an identity-assurance limitation rather than evidence of phishing or impersonation.

EVIDENCE

- Homepage: Chinese-language articles cover Legend private servers, gameplay guides, server news, updates, activities, and walkthroughs; no sensitive forms or investment features were identified.
- Domain registration record: Registered 2026 (~0.29 years old).
- Archive record: First seen 2005-12-10; last seen 2026-05-15; 22 years tracked; no suspicious repurposing detected.
- External reputation checks: 0 malicious detections and 0 suspicious detections were returned; phishing and impersonation indicators were false.

Regulatory Verification Notes

The site appears to operate as an informational gaming publication rather than a regulated financial or investment service. The supplied homepage material does not claim a license or provide a registration number, so the principal regulatory consideration is ordinary publisher-identity and disclosure transparency if the site directs visitors toward advertisers, affiliates, sponsored services, or private servers. No matching third-party broker warning was identified, but that contextual signal is not a legal or licensing determination. The operator remains apparently legitimate rather than independently verified.

EVIDENCE

- Homepage: The stated purpose is gaming journalism and guides, with no regulated-service claim or license disclosure identified.
- Registration record: Registrar listed as 泛亚信息技术江苏有限公司.
- Hosting record: Served from AS132203 (TENCENT-NET-AP-CN - Tencent Building, Kejizhongyi Avenue, CN).
- Transport security: TLS certificate issued by YR1, domain-validated (DV), valid to 2026-10-04.

What to Verify Next

Before any interaction that moves beyond reading, independently confirm the publisher's legal identity and operating contact details. If advertising, affiliate material, or linked gaming services request payment or credentials, assess the actual merchant separately, including its terms, refund arrangements, and payment-protection options. Support and contact channels should be confirmed through an independently sourced route before sensitive actions.

EVIDENCE

- Publisher-identity check: Match the site's stated publisher details against an independent business registry or other authoritative corporate record.
- Commercial-link check: Assess each external merchant or service separately rather than treating the blog's trust posture as extending to linked parties.
- Payment-protection check: Confirm applicable refund, dispute, and payment-protection arrangements before completing a transaction.
- Contact-channel check: Confirm official support channels through an independent source before submitting credentials or account information.

Summary Verdict

The overall posture is **high trust and low risk for the site's apparent informational purpose**. Converging content, reputation, and technical signals are consistent with an established, apparently legitimate website, although the available evidence does not independently verify the real-world operator identity.

Infrastructure Integrity

The site resolves to one Tencent-hosted address on AS132203 in China, with no CDN or WAF detected and a likely origin address directly visible. This provides a straightforward hosting posture but fewer edge-layer protections; the valid domain-validated TLS certificate supports transport integrity without establishing operator legitimacy.

Closing Assessment

Normal reading and low-sensitivity browsing are proportionate; before credentials or payment interactions associated with any linked service, ordinary independent checks of merchant identity, return terms, and payment protection should be completed.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about cj-dj.cn at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
