Key findings

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2016.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Claro tv+ is a commercial streaming subscription website presenting bundled television and entertainment plans, including access to multiple streaming services and paid content, with the apparent business model of obtaining recurring customer fees through Claro's service infrastructure.

Scam/Impersonation Risk

No blacklist, phishing, malware, or brand-impersonation contradictions were observed. The homepage presents a coherent commercial streaming service, includes pricing and service information, and does not expose a password form, hidden sensitive form, wallet connection, or suspicious external submission path. The site's historical record also supports continuity rather than suspicious repurposing, although the evidence does not independently prove the real-world operator's identity.

EVIDENCE

- The homepage is classified as a commercial subscription landing page with no reported red flags or suspected brand impersonation.
- The site's technical behavior recorded 0 external XHR requests, 0 non-whitelisted external posts, 0 hidden forms, and 0 wallet-related runs across 2 successful runs.
- The domain has 977 archive snapshots spanning 2016–2026, covering 11 tracked years.

Regulatory Verification Notes

Available evidence is consistent with an established, apparently legitimate consumer-services website, but the operator identity remains independently unverified. The site presents the Claro tv+ brand, bundled plans, channel listings, pricing, cookie consent, and links to Terms, Privacy, and Help; the registration record names Claro S/A, which is a supporting administrative signal rather than conclusive proof that the website is operated by that entity. The business is presented as a subscription service rather than a regulated financial product, and no specific regulatory license or registration number is disclosed on the reviewed page. That is a transparency item for ordinary consumer verification, not evidence of a scam. The clean external reputation signal and absence of a broker-dataset match provide additional reputational context without constituting legal or regulatory confirmation.

EVIDENCE

- The homepage advertises Claro tv+ plans at R\$99.90, R\$123.90, and R\$138.90 per month, with combinations of more than 120 channels, Globoplay, Netflix, HBO Max, Apple TV, Amazon Prime, and Disney+.
- The registration record lists Claro S/A as the owner and shows registration on 2022-04-22 with expiry on 2028-04-22; the recorded domain age is 4.31 years.
- The site is served through AS16509, Amazon.com, Inc.; its TLS certificate is issued by Amazon RSA 2048 M04, uses DV validation, and is valid through 2027-01-20.

What to Verify Next

Before credential or payment interaction, independently confirm that the merchant identity, subscription cancellation and return terms, and available payment protections correspond to the intended Claro service. The Terms, Privacy, and Help links should be reviewed for billing authority, renewal mechanics, customer-support responsibilities, and dispute procedures, with official contact channels confirmed through an independent source rather than relying solely on the landing page.

EVIDENCE

- The homepage links to Terms, Privacy, and Help pages alongside the subscription offers.
- The reviewed page contains one cookie-consent/login-link form but no sensitive form or password-entry form.
- The stated business model involves recurring monthly fees and separately purchased content through Claro infrastructure.

Summary Verdict

The website has a **high-trust, low-risk posture** and the available evidence is consistent with an established, apparently legitimate streaming service. No contradictory signals were identified, while the site's substantive commercial presentation, technical behavior, reputation coverage, and continuity indicators converge positively. This assessment does not independently verify the real-world operator identity.

Infrastructure Integrity

The site is protected by Amazon CloudFront CDN/WAF infrastructure, with observed traffic resolving to an Amazon edge address rather than an exposed origin candidate. This reduces direct origin exposure and is a mitigating security characteristic, but it is not by itself proof of ownership or legitimacy.

Closing Assessment

Normal browsing is proportionate to the assessed posture; account or payment actions should follow the ordinary independent merchant-identity, cancellation-term, and payment-protection checks appropriate for a subscription service.

Written analysis generated 2026-08-11 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of clarotvmais.com.br.

- The request stayed on clarotvmais.com.br. It was not redirected to another domain. CLEAR
- DNS for this domain is served by net.br, across 4 name servers. NOTED
- The registration is paid up to 2028-04-22. CLEAR
- The earliest public archive of this site is from 2016-01-10. CLEAR
- It is hosted on AMAZON-02, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about clarotvmais.com.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
