- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2010.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

SmartCommerce presents Click2Cart as a B2B commerce technology that connects product discovery across marketing channels directly to in-stock retailer carts, serving brands, retailers, and channel partners through enterprise software, partnerships, and conversion-focused services.

Scam/Impersonation Risk

No contradictions, phishing indicators, brand-impersonation signals, or confirmed blacklist findings were observed. The homepage has a coherent corporate purpose, customer case studies, partnership and sales-walkthrough calls to action, contact details, and newsletter functionality; its forms do not request sensitive credentials. The resulting posture supports normal interaction, including account login and standard use where offered.

- Homepage: identifies SmartCommerce and presents Click2Cart's direct-to-retailer-cart commerce model.
- Homepage: contains two non-sensitive forms for campaign engagement and newsletter subscription, with no login form or external password-collection form.
- Reputation checks: recorded zero malicious and zero suspicious detections, with no blacklist or phishing result.

Regulatory Verification Notes

The site presents a commercial enterprise-software business rather than a financial product or consumer investment service. No financial license claim is evidenced; this is a limited disclosure point for contractual or procurement due diligence, not an indication of deception. The published company identity, customer references, contact channels, partnership calls to action, and established domain history provide substantial support for an identifiable operating business.

- Domain registration: created 2018-04-08 and recorded as 8.32 years old; registrar: Amazon Registrar, Inc.
- Archive history: 21 snapshots spanning 2010–2019, covering 10 tracked years.
- Hosting and transport: served from AS16509 (AMAZON-02 – Amazon.com, Inc., US); TLS issued by Amazon RSA 2048 M04, DV validation, valid through 2026-11-23.
- Homepage: describes enterprise commerce software, retailer and brand partnerships, measurable conversion performance, and customer case studies.

What to Verify Next

For formal onboarding, procurement should confirm the contracting legal entity, applicable service terms, and any sector-specific obligations directly through the company’s official corporate channels and relevant registries. Commercial claims and customer references should be validated through standard vendor due-diligence procedures before material contracting.

- Homepage: provides the product positioning, customer references, partnership pathway, and sales-walkthrough request.
- Homepage: includes contact and newsletter pathways suitable for confirming the appropriate commercial point of contact.
- Legal and commercial review: should align the contracting entity and service scope with the enterprise software described on the site.

Summary Verdict

The website presents as a legitimate, established, and trustworthy corporate B2B technology service with strong convergence across its identity, content, historical continuity, reputation, and technical signals. No evidence indicates scam activity, impersonation, phishing, or a material contradiction in the site’s stated purpose.

Infrastructure Integrity

The site is delivered through Amazon infrastructure with a valid domain-validated TLS certificate, providing a conventional and technically coherent hosting and encryption posture. These controls mitigate routine exposure and transport risks but are appropriately treated as supporting safeguards rather than proof of business legitimacy.

Closing Assessment

Normal browsing, account interaction, and standard commercial engagement are appropriate, with ordinary enterprise vendor due diligence applied to any significant relationship.

Written analysis generated 2026-08-02 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	80/100
Identity verification confidence	80%

- Trusted social count=4

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of click2cart.com.

- The request for click2cart.com ended on www.smartcommerce.com, a different domain. WATCH
- Registration is published under Amazon Registrar, Inc.. CLEAR
- DNS for this domain is served by awsdns-52.org, across 4 name servers. NOTED
- The registration is paid up to 2030-04-08. CLEAR
- The earliest public archive of this site is from 2010-12-17. CLEAR
- It is hosted on AMAZON-02, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about click2cart.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
