

Is clickbank.com legit? TrustSniffer's high-trust assessment: 84/100

clickbank.com

Verdict

84
OUT OF 100

HIGH TRUST

clickbank.com appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-07-31 by automated analysis. Classification confidence 45%.

What this site appears to be

ClickBank's homepage markets an established affiliate network and e-commerce marketplace for affiliates and product sellers. It describes marketplace access, order processing, commission payments, seller tools, education products, integrations, support resources, and a disclosed US corporate identity and address.

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website presents ClickBank as an established affiliate-marketing network and e-commerce marketplace connecting product sellers, affiliates, and customers, with services spanning marketplace access, order processing, commission distribution, seller tools, education, integrations, and customer support.

Scam/Impersonation Risk

No identity contradictions, brand impersonation, phishing behavior, or malicious reputation findings were observed. The homepage's earnings-oriented material—such as its “How to Make Money Online” guide, top-offer listings, cost-per-action commissions, and affiliate courses—is consistent with its stated commercial model and does not promise guaranteed returns. The site also exhibited stable behavior without cloaking, hidden forms, credential forwarding, clipboard manipulation, or suspicious inline scripts.

- The homepage identifies itself as a corporate affiliate and e-commerce marketplace and contains no detected fraud indicators.
- Interactive testing completed successfully across two runs, with no cloaking, hidden forms, external password forms, wallet-draining behavior, or clipboard hijacking.
- External reputation checks recorded 0 malicious and 0 suspicious detections, no malicious safe-browsing finding, and no reported IP abuse.
- The domain was registered in 1997 and is approximately 29.01 years old; registration is maintained through MarkMonitor Inc. and currently expires in 2027.

Regulatory Verification Notes

The homepage describes a disclosed US corporate identity and physical address and states that ClickBank acts as merchant of record, processes customer orders, and distributes transaction proceeds and affiliate commissions. These are substantive governance and operating disclosures for its marketplace role. No license claim, licensing authority, or license number was observed; because the site is presented as an affiliate marketplace and e-commerce intermediary rather than a broker, this is a scope-of-regulation question rather than a scam indicator. No matching broker-regulation profile was identified in the available third-party broker context, which neither establishes nor disproves any legal authorization.

- The homepage discloses a US corporate identity and address and describes ClickBank's merchant-of-record responsibilities.
- The homepage explains the platform's roles for sellers, affiliates, and customers, including payment and commission administration.
- The hosting infrastructure is served from AS16509 (AMAZON-02 — Amazon.com, Inc., US).

- The site uses a DV TLS certificate issued by Amazon RSA 2048 M01, valid to 2026-10-25.

What to Verify Next

Enterprise onboarding should confirm the contracting entity against the applicable terms and payment documentation, determine which entity assumes merchant-of-record obligations in the relevant jurisdiction, and review settlement, refund, chargeback, data-processing, and affiliate-compliance provisions. Prospective sellers and affiliates should independently confirm the official support channels and ensure that any product-level earnings representations comply with internal advertising and consumer-protection controls.

- The homepage provides a Help Center and support resources suitable for confirming operational procedures.
- The homepage advertises integrations with external tools and services, making vendor-access and data-processing review relevant to enterprise onboarding.
- A cookie-consent banner was observed on the homepage, while one tracking pixel was detected.
- The homepage links to YouTube and Discord presences that can be cross-checked against the organization’s approved communications channels.

Summary Verdict

ClickBank is a legitimate, established, and trustworthy website supported by a durable commercial identity, coherent operating disclosures, stable site behavior, meaningful traffic presence, and clean external threat-reputation results. Normal interaction, including account login, account activity, and standard platform use, is appropriate.

Infrastructure Integrity

The site is delivered through Amazon-hosted content-delivery infrastructure using shared edge addressing and valid transport encryption. This arrangement reduces direct infrastructure exposure and supports availability, but functions as a technical safeguard rather than independent proof of business legitimacy.

Closing Assessment

Prospective users may engage normally, while organizations conducting formal onboarding should complete their standard contractual, privacy, payment, and third-party-risk reviews.

Written analysis generated 2026-07-31 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	73/100
Identity verification confidence	74%

- Trusted social count=1

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of clickbank.com.

- The request stayed on clickbank.com. It was not redirected to another domain. CLEAR
- Registration is published under MarkMonitor Inc.. CLEAR
- DNS for this domain is served by awsdns-57.org, across 4 name servers. NOTED
- The registration is paid up to 2027-08-04. NOTED
- It is hosted on AMAZON-02, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about clickbank.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
