Key findings

- Automated classification: Safe for Read-Only.
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

The website is a Vietnamese consumer-electronics storefront presenting new and used phones, tablets, laptops, wearables and accessories, alongside repair, trade-in, warranty and installment-payment services for retail customers.

Scam/Impersonation Risk

No identity contradictions, brand impersonation, phishing indicators or confirmed malicious reputation signals were observed. The commercial proposition is consistent with an ordinary electronics retailer: products carry detailed model information, prices in Vietnamese đồng, discounts, reviews and warranty terms rather than investment returns or deceptive value-transfer mechanics. Tested interactions also showed no credential-harvesting forms, hidden forms, clipboard interference, wallet activity, cloaking or suspicious external data transmission.

- The homepage presents region-specific pricing, named consumer-electronics models, promotional discounts, customer reviews and warranty information.
- The homepage advertises used-device sales, trade-ins, repairs, loyalty pricing and installment purchasing as supporting retail services.
- External threat screening recorded 0 malicious and 0 suspicious detections, no phishing finding and no confirmed malicious reputation listing.
- Two successful behavioral runs observed 0 external requests, 0 external posts, 0 suspicious inline scripts and no cloaking.

Regulatory Verification Notes

The supplied homepage identifies the Clickbuy trading brand and provides links to warranty, store and policy information, but it does not establish the underlying legal operator or furnish sufficient corporate particulars to independently attribute the business. This is a governance-transparency limitation, not evidence of fraud. No conflicting legal-entity names were identified, and the absence of a broker-intelligence match has no material regulatory significance for a consumer-electronics retailer.

- The homepage title describes Clickbuy as a retailer of genuine phones, tablets, laptops and accessories.
- The homepage exposes customer-service, store, warranty, account and policy pathways, but the supplied page evidence does not identify a legal company name or corporate registration details.
- The assessed business model makes no licensing claim and presents conventional retail sales rather than a regulated investment or brokerage service.

- The homepage offers installment purchasing, creating a need to distinguish Clickbuy's retail role from the identity and terms of any financing provider.

What to Verify Next

Before a high-value purchase or disclosure of sensitive personal or payment information, the prospective customer should match the legal seller named at checkout and on the invoice against an official Vietnamese corporate record. Warranty coverage, return conditions, device condition for used goods and the identity of any installment-finance provider should be confirmed in the applicable transaction documents. Official store and customer-service channels should also be independently matched before arranging payment or device collection.

- The homepage presents both new and used inventory, making product-condition and warranty terms transaction-specific.
- Advertised trade-in and repair services may involve transfer of devices containing personal data.
- Regional pricing and promotions are selected by location, so final commercial terms may differ from the general homepage presentation.
- Installment offers introduce separate financing terms that may not be fully represented in headline pricing.

Summary Verdict

The website presents a **moderate-trust posture** consistent with an established-looking retail operation, and the available evidence contains no active threat or impersonation indicators. Its detailed commercial content, clean reputation profile and benign observed behavior support ordinary browsing and account login, while its incompletely established corporate provenance limits stronger assurance.

Infrastructure Integrity

The site uses Cloudflare's CDN/WAF, with all observed addresses belonging to edge infrastructure and no origin-server candidate exposed. This reduces direct origin exposure and provides a meaningful security mitigation, although protective infrastructure does not independently establish business legitimacy. Transport encryption is valid and domain-validated.

- The hosting infrastructure is served from AS13335 (Cloudflare, Inc., US).
- Four observed addresses were Cloudflare edge endpoints; no likely origin address was identified.
- The site's TLS certificate was issued by WE1 with DV validation and is valid until 2026-10-31.
- The assessed edge address had 0 abuse reports and was categorized as content-delivery-network infrastructure.

Closing Assessment

Normal browsing and account use are proportionate; independent transaction-level verification remains advisable before high-value purchases, financing commitments or transfers of sensitive data.

Written analysis generated 2026-08-03 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of clickbuy.com.vn.

- The request stayed on clickbuy.com.vn. It was not redirected to another domain. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about clickbuy.com.vn at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
