

Is clicks.co.za legit? TrustSniffer's high-trust assessment: 90/100

clicks.co.za

Verdict

90

OUT OF 100

HIGH TRUST

clicks.co.za appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-17 by automated analysis. Classification confidence 55%.

What this site appears to be

E-commerce retail page for Clicks (pharmacy, health, beauty, home). Contains product listings, promotions, ClubCard loyalty information, store locator, customer service contacts, and cookie/privacy notices.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Clicks is an online retail pharmacy and general merchandise website presenting health, beauty, home and household products, together with promotions, ClubCard loyalty services, store-finder functionality, customer support and in-store services. Its apparent business model is conventional e-commerce supported by product sales, loyalty engagement and related retail services.

Scam/Impersonation Risk

No contradictions were observed. The supplied evidence contains no phishing, impersonation, blacklist or malicious-reputation indication, and the site's retail presentation is coherent with its stated Clicks identity. Interactive testing did observe dynamic page changes and external web requests, but the observed behavior included no hidden forms, wallet activity, cloaking, credential-draining behavior or other abuse pattern; this is consistent with a complex retail site rather than an impersonation signal. The operator identity remains likely rather than independently verified, so the positive conclusion concerns the website's apparent legitimacy and risk posture, not proof of the real-world operator.

EVIDENCE

- The domain was registered on 1996-08-11 and is approximately 30.03 years old.
- External reputation checks recorded 0 malicious detections, 0 suspicious detections and 0 abuse reports; the site was also listed within the leading global traffic cohort.
- The homepage contains visible sign-in, account-creation, search and checkout functions without hidden forms or untrusted form destinations.

Regulatory Verification Notes

The site presents a recognizable retail operating model with customer-service contacts, privacy and cookie notices, a store locator and ClubCard information. No licensing claim or registration number is supplied in the available page content; for a pharmacy and health-products retailer, that is a regulatory-transparency item requiring independent confirmation rather than evidence of fraud. A separate broker-reputation dataset produced no match, which is a neutral-to-positive contextual signal and not a licensing determination. The available evidence supports an established, apparently legitimate site, while independent confirmation of the real-world operator remains incomplete.

EVIDENCE

- The homepage title identifies the site as “Clicks | Pharmacy, Health, Home and Beauty,” and the page includes four social-platform links.
- No license authority or license number is presented in the supplied site content.
- The domain registrar is Lexsynergy Limited; the registration record names The Clicks Organisation (Pty) Ltd.
- The site is served on AS13335 by CLOUDFLARENET - Cloudflare, Inc.; its OV TLS certificate was issued by DigiCert Global G2 TLS RSA SHA256 2020 CA1 and is valid to 2026-11-07.

What to Verify Next

Before credential or payment use, an institution should independently confirm the merchant's legal identity, applicable pharmacy or retail authorization, published returns process and payment-protection arrangements. Contact details should be validated through an independently sourced channel rather than relying solely on information presented on the website. Account access and ordinary purchases are proportionate to the high-trust assessment once those routine commercial checks are satisfactory.

EVIDENCE

- The homepage exposes sign-in, registration, order-history and checkout functions, making credential and payment controls relevant to the review.
- The site provides customer-service contacts and a store locator that can be compared with independently sourced business information.
- Privacy and cookie notices are present for review alongside the site's account and transaction functions.

Summary Verdict

The overall posture is **high trust with low apparent risk**. Available evidence is consistent with an established, apparently legitimate website, with no observed scam or impersonation contradictions. The classification should not be treated as independent proof of the real-world operator's identity.

Infrastructure Integrity

Cloudflare CDN and WAF protection front the website, and all observed addresses were CDN edge addresses rather than an identified origin server. This reduces direct exposure of the hosting origin and is a mitigating infrastructure characteristic, but it is not by itself proof of legitimacy.

Closing Assessment

Normal browsing and routine commercial interaction are proportionate, subject to ordinary independent checks of merchant identity, returns terms and payment protection before credentials or payment details are submitted.

Written analysis generated 2026-08-17 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	80/100
Identity verification confidence	80%

- Trusted social count=4

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of clicks.co.za.

- The request stayed on clicks.co.za. It was not redirected to another domain. CLEAR
- Registration is published under Lexsynergy Limited. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2027-08-11. NOTED
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about clicks.co.za at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
