

Is clinicaredesimat.com a scam? TrustSniffer's high-risk assessment:
0/100

clinicaredesimat.com

Verdict

0

OUT OF 100

CRITICAL RISK

clinicaredesimat.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-22 by automated analysis. Classification confidence 55%.

What this site appears to be

Official website for Redes IMAT Clínica de Fracturas S.A.S. Provides service descriptions, appointment request forms, contact details, institutional pages (model of care, committees, legal framework) and access request forms for financial and management reports.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

The page as captured

<https://www.clinicaredesimat.com/>

What clinicaredesimat.com served when TrustSniffer captured it on 2026-08-22. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2021.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

The website presents itself as the institutional website of Redes IMAT Clínica de Fracturas S.A.S., a healthcare clinic offering urgent care, surgery, hospitalization, rehabilitation, diagnostic services, specialist consultations, occupational medicine, and appointment-request facilities, together with institutional information and requests for financial or management reports.

Scam/Impersonation Risk

The site's healthcare content is coherent and contains no overt fraud claims, cryptocurrency features, or apparent brand-impersonation indicators. However, this benign presentation is outweighed by a confirmed blacklist result and multiple external malicious detections, including a Tier-1 security detection. The domain therefore presents a material risk for sensitive interaction despite its clinic-oriented appearance. Automated browser analysis also recorded two suspicious inline scripts; this is a secondary technical concern and does not, by itself, establish a malicious payload. No conflicting legal-entity names were observed across the supplied content.

EVIDENCE

- The homepage identifies the organization as “RedesIMAT clinica de fracturas S.A.S.” and presents healthcare services, appointment requests, and institutional navigation.
- Domain registration telemetry records creation on 2018-10-27, with an age of 7.82 years.
- Archive records show a first observation on 2021-11-29 and a last observation on 2026-05-10, with 6 years tracked.
- External reputation telemetry records 6 malicious detections and a confirmed blacklist result; behavioral telemetry records 2 suspicious inline scripts.

Regulatory Verification Notes

The site includes institutional, model-of-care, legal-framework, risk-management, committee, data-treatment, and report-request sections, which gives the presentation a substantive healthcare-institution profile. Nevertheless, the real-world operator is only assessed as likely rather than independently verified, and the supplied pages do not present a license claim or license number. That is a regulatory verification gap rather than proof of fraud, but it is significant because the site collects contact and identity information through appointment, contact, PQRS, employment, newsletter, and report-request workflows. The available third-party broker context contains no matching record.

EVIDENCE

- The institutional navigation includes “Marco Legal,” “Comités Institucionales,” “Política tratamiento de datos,” “Sistemas de Gestión,” and “Sistema de Gestión de Riesgos.”
- The business-model assessment identifies a healthcare clinic and records 6 site forms, including an appointment request and a financial-report request.
- Registration telemetry identifies GoDaddy.com, LLC as registrar, with the registrant recorded as Registration Private through Domains By Proxy, LLC.
- The site’s TLS certificate is DV-validated, issued by YR1, and valid until 2026-10-18T15:40:05+00:00.

What to Verify Next

Before any appointment submission, identity-data disclosure, or report request, the clinic’s legal existence and operating authorization should be confirmed through the relevant healthcare registry and through an independently obtained telephone or institutional contact route. The official domain should also be confirmed through an offline source or a trusted public record, and any submitted information should be limited to what is strictly necessary until the external reputation issue has been resolved. Credentials, account access, and financial interactions should not be initiated on the basis of the website alone.

EVIDENCE

- The homepage exposes appointment, contact, PQRS, employment, newsletter, and report-request workflows.
- The institutional pages advertise a legal framework and data-treatment policy but do not show a license claim or license number in the supplied content.
- The identity assessment remains “likely,” not independently verified, and is based on limited external linkage.
- The external reputation record contains confirmed malicious detections associated with the domain.

Summary Verdict

The website has a credible-looking healthcare presentation but an **unacceptable trust posture for sensitive interaction** because authoritative external threat signals directly contradict the apparent institutional purpose. Its legitimacy remains unproven, and the site should be treated as unsuitable for credential, personal-data, or financial engagement pending independent resolution of the contradiction.

Infrastructure Integrity

The site resolves directly to one likely origin address rather than through a detected CDN, and is hosted by SERVERCENTRAL - DEFT.COM in the United States on AS23352. Transport encryption is present, but the direct hosting arrangement and domain-validated certificate provide only basic technical protections and do not offset the reputation findings.

Closing Assessment

The proportionate course is to restrict activity to non-interactive viewing and obtain independent institutional confirmation before submitting information or initiating any sensitive transaction.

Written analysis generated 2026-08-22 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox, external reputation.

01 Governance Risk

- The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN
- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- The page carried inline scripts written in a style TrustSniffer treats as suspicious.
Behaviour in a sandbox rule:BEHAV_SUSPICIOUS_INLINE_SCRIPTS
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	LIKELY
Identity score	73/100
Identity verification confidence	37%

- Trusted social count=1

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of clinicaredesimat.com.

- The request stayed on clinicaredesimat.com. It was not redirected to another domain. [CLEAR](#)
- Registration is published under GoDaddy.com, LLC. [CLEAR](#)
- DNS for this domain is served by molecait.com, across 2 name servers. [NOTED](#)
- The registration is paid up to 2026-10-27. [NOTED](#)
- The earliest public archive of this site is from 2021-11-29. [CLEAR](#)
- It is hosted on SERVERCENTRAL, from a server in US. [NOTED](#)

About this assessment

A trust score summarises the evidence TrustSniffer could collect about clinicaredesimat.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
