Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2009.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Clinpharma is a corporate services website presenting technical training, talent development, human-resource outsourcing, IT software development, clinical research organization services, and pharmaceutical data-analysis outsourcing. Its apparent business model is informational and business-to-business, with services offered through contracted engagements, training, and outsourcing arrangements.

Scam/Impersonation Risk

No contradictions were observed across the supplied evidence: there were no phishing, impersonation, blacklist, or malicious-content findings, and the site does not present a login form, sensitive-data form, cryptocurrency function, or financial solicitation. The homepage describes a conventional corporate-services model and identifies service areas including technical training, talent cultivation, HR outsourcing, IT development, CRO, and pharmaceutical data analysis; this content is consistent with an informational B2B website rather than a deceptive transaction funnel. Interaction telemetry did record external requests, posts, and XHR activity, with the online chat widget providing a plausible page-level explanation; importantly, the same testing found no hidden forms, wallet activity, clipboard manipulation, password-exfiltration form, or cloaking. The available evidence

therefore supports an apparently legitimate, established site, while independently connecting the public-facing site to a real-world operator remains unresolved.

EVIDENCE

- The homepage presents Clinpharma as a corporate-services provider and lists technical training, talent cultivation, HR outsourcing, IT software development, CRO, and pharmaceutical data analysis.
- The domain was registered on 2009-02-12 and is approximately 17.53 years old; the registrar is PDR Ltd. d/b/a PublicDomainRegistry.com.
- Historical records show 117 archive snapshots spanning 2009–2026, with 18 years tracked.
- The homepage contains an online chat widget reference; behavioral testing found 11 external XHR requests and 11 external POST requests, but no hidden or sensitive forms, wallet behavior, or cloaking.

Regulatory Verification Notes

The site provides About us, Privacy Policy, Contact us, service, news, and jobs navigation, but the supplied page evidence does not show a licensing claim, registration number, or named licensing authority. For a B2B provider, this is a disclosure point requiring ordinary commercial verification rather than evidence of a scam; the relevant regulatory position may depend on the particular CRO, pharmaceutical-data, training, or outsourcing engagement. The public-facing name is Clinpharma, but the real-world operator identity is not independently verified. Evaluated external reputation checks recorded no malicious or suspicious detections and no broker-reputation match, although coverage was partial. The site's established registration continuity, substantive service content, valid transport encryption, and stable hosting materially support an evidence-consistent legitimacy assessment.

EVIDENCE

- The homepage's title is "Clinpharma," and the navigation includes About us, Privacy Policy, Contact us, service, news, and jobs pages; no license number or licensing authority is shown in the supplied content.
- The site is served from AS45102, ALIBABA-CN-NET - Alibaba (US) Technology Co., Ltd., CN.
- The TLS certificate is issued by Encryption Everywhere DV TLS CA - G2, uses DV validation, and is valid to 2026-11-19.
- Evaluated external checks recorded 0 malicious detections, 0 suspicious detections, and 0 AbuseIPDB reports; reputation coverage was partial.

What to Verify Next

Before entering into a contractual, employment, clinical-research, pharmaceutical-data, or outsourcing relationship, the prospective counterparty should independently confirm the legal entity behind Clinpharma, its business registration, and any sector-specific authorizations applicable to the proposed service. The applicable registry or professional authority should be checked directly rather than relying solely on website statements. Before credentials or payment details are exchanged, the commercial terms, data-processing obligations, refund or termination provisions, and payment-protection arrangements should be reviewed, and contact channels should be confirmed through an independent route.

EVIDENCE

- The service pages describe multiple professional offerings whose contractual scope and regulatory treatment may differ by engagement.
- The site provides About us, Contact us, Privacy Policy, and Jobs navigation that can be used to obtain and corroborate counterparty details.
- The homepage contains no login or sensitive-data form, so identity and commercial verification should precede any later credential or payment interaction.

Summary Verdict

The overall posture is **high trust and low risk**, with the available evidence consistent with an established, apparently legitimate corporate-services website. The conclusion supports normal informational engagement, but does not independently prove the real-world identity of the operator.

Infrastructure Integrity

The site resolves to Alibaba-hosted infrastructure in the United States, with no CDN or separate origin candidates detected. This identifiable hosting posture and the presence of valid TLS provide useful technical safeguards, although infrastructure protection is a mitigating control rather than proof of organizational legitimacy.

Closing Assessment

Normal business evaluation is proportionate; independent counterparty, authorization, contractual, and payment-protection checks should be completed before credentials or payments are exchanged.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of clinpharmaclinicalresearch.com.

- The request stayed on clinpharmaclinicalresearch.com. It was not redirected to another domain. CLEAR
- Registration is published under PDR Ltd. d/b/a PublicDomainRegistry.com. CLEAR
- DNS for this domain is served by bluehost.com, across 4 name servers. NOTED

- The registration is paid up to 2029-02-12. [CLEAR](#)
- The earliest public archive of this site is from 2009-07-20. [CLEAR](#)
- It is hosted on ALIBABA-CN-NET, from a server in US. [NOTED](#)

About this assessment

A trust score summarises the evidence TrustSniffer could collect about clinpharmaclinicalresearch.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
