

Is cloudprix.com.br legit? TrustSniffer's high-trust assessment: 100/100

cloudprix.com.br

Verdict

100

OUT OF 100

HIGH TRUST

cloudprix.com.br appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-13 by automated analysis. Classification confidence 70%.

What this site appears to be

Toledo do Brasil product site describing Cloud Prix — a suite of cloud/SaaS solutions (MGV Cloud, Guardian Cloud, SPAR Cloud, GIP Cloud, MWS Cloud) for device and weighing operation management. Includes corporate contact information and a contact form; aimed at customers and partners.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

- Public web-archive history exists since 2017.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Cloud Prix is a corporate cloud/SaaS platform for managing and monitoring weighing and measurement operations, presenting software services for Toledo do Brasil customers, partners, and business users through an online product suite.

Scam/Impersonation Risk

No contradictions were observed. The homepage presents a coherent enterprise software model rather than a deceptive acquisition scheme: Cloud Prix is described as an IoT, Big Data, and artificial-intelligence platform, with MGX Cloud, Guardian Cloud, SPAR Cloud, GIP Cloud, and MWS Cloud supporting weighing-equipment management, production oversight, monitoring, and maintenance. A login route and contact form are present, but the available interaction analysis found no hidden forms, external password submissions, wallet activity, suspicious scripts, or credential-harvesting indicators. The site also has clean external reputation results and an established traffic footprint, which supports an apparently legitimate, low-risk assessment while not independently proving the real-world operator identity.

EVIDENCE

- The homepage describes Cloud Prix as Toledo do Brasil's cloud platform and identifies MGX Cloud, Guardian Cloud, SPAR Cloud, GIP Cloud, and MWS Cloud as associated services.
- The homepage's interaction surface includes one login form and one contact form; testing recorded zero external posts, zero non-whitelisted external requests, zero wallet-connect activity, and no hidden forms.
- The domain registration record shows: Registered 2016-10-06 (~9.86 years old).
- Historical coverage records 24 archive snapshots from 2017-05-07 through 2026-03-15, spanning 10 years tracked.

Regulatory Verification Notes

The available site content presents a corporate identity consistent with Toledo do Brasil – Indústria de Balanças Ltda. and describes a commercial SaaS offering. No financial, investment, or other regulated-service claim is identified, and no license or registration number is claimed in the supplied content; this is a transparency item for ordinary commercial due diligence, not evidence of a scam. The registration record names TOLEDO DO BRASIL INDUSTRIA DE BALANCAS LTDA., but the independent connection between the website and that real-world entity remains unverified. The absence of a broker-dataset match is contextual reputational information only and is not a licensing determination.

EVIDENCE

- The homepage identifies “Toledo do Brasil - Indústria de Balanças Ltda.” and provides corporate contact information and a contact form.
- The site's transport encryption uses a DV certificate issued by Go Daddy Secure Certificate Authority - G2, valid to 2026-10-15T18:05:17+00:00.
- The hosting telemetry records AS8075, MICROSOFT-CORP-MSN-AS-BLOCK - Microsoft Corporation, US.

What to Verify Next

Before credential or payment interactions, an organization should independently confirm the corporate identity shown in the site's legal and contact material, obtain the applicable SaaS, support, cancellation, and refund terms, and confirm that any payment method provides appropriate commercial protection. The login destination and official support channels should also be validated through an independently sourced corporate contact route rather than relying solely on information reached from the site.

EVIDENCE

- The site presents a corporate SaaS service model, making independent confirmation of the contracting entity and service terms the relevant next diligence step.
- The supplied content includes customer-facing contact and login pathways but does not establish independent operator verification or a regulated-service registration.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website with a high-trust, low-risk posture. The site's coherent corporate SaaS presentation, clean reputation, sustained domain history, and absence of contradictory or abusive indicators support normal business consideration, subject to routine identity and transaction checks.

Infrastructure Integrity

The website is protected by CDN/WAF infrastructure, with the observed address functioning as an edge endpoint rather than an identified origin. This reduces direct origin exposure and is a mitigating infrastructure characteristic, although protective hosting alone does not establish legitimacy.

Closing Assessment

Routine independent checks of the contracting entity, service terms, and payment protections should precede credential submission or paid engagement; absent adverse findings from those checks, ordinary business interaction is proportionate to the available risk posture.

Written analysis generated 2026-08-13 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of cloudprix.com.br.

- The request stayed on cloudprix.com.br. It was not redirected to another domain. CLEAR
- DNS for this domain is served by azure-dns.com, across 4 name servers. NOTED
- The registration is paid up to 2026-10-06. NOTED
- The earliest public archive of this site is from 2017-05-07. CLEAR
- It is hosted on MICROSOFT-CORP-MSN-AS-BLOCK, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about cloudprix.com.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
