

Is cms-hosting.ru legit? TrustSniffer's high-trust assessment: 80/100

cms-hosting.ru

Verdict

80

OUT OF 100

HIGH TRUST

cms-hosting.ru appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-11 by automated analysis. Classification confidence 70%.

What this site appears to be

Corporate site for a Russian hosting provider (CMS-Hosting.ru) offering multiple hosting tiers with prices, technical features, contact phone, and legal/privacy links.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2003.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

CMS-Hosting.ru is a Russian commercial hosting provider offering subscription-based virtual hosting, VDS, dedicated servers, and domain-related services, with tiered plans, technical specifications, customer contact details, and supporting legal documentation presented to visitors.

Scam/Impersonation Risk

No contradictions were observed across the supplied evidence: there were no phishing, impersonation, malicious-content, or blacklist findings, and the site's stated hosting-services model is consistent with its displayed plans and service navigation. The homepage presents concrete hosting capacities, domain allowances, technical features, prices, and a business contact number rather than high-pressure financial or deceptive promotional mechanisms. The site's long registration continuity and sustained archival presence further support provenance consistent with an established service, although this does not independently prove the real-world operator's identity.

EVIDENCE

- Homepage: presents virtual-hosting plans with defined storage, domain limits, FTP, MySQL, PHP, CGI, Cron, and six- and twelve-month pricing.
- Homepage and observed site behavior: no login form, hidden form, password-external form, wallet connection, cloaking, clipboard manipulation, or suspicious inline script was detected.
- Registration record: registered in 2005; approximately 21.51 years old; registrar RU-CENTER-RU.
- Web archive: 176 snapshots spanning 2003–2026, covering 24 tracked years.

Regulatory Verification Notes

The site provides “About the Company,” “Licenses,” “Documents,” contact, personal-data-processing, and user-agreement sections, and identifies ООО «ЭсБилдер» in the footer. These are useful disclosure features, but the supplied evidence does not independently verify that legal entity as the operator or establish a specific license or registration authorization. The regulatory position should therefore be treated as an ordinary verification matter rather than as evidence of deception. Available external reputation evidence is clean, and the site has a strong global traffic footprint; these signals support an established-site assessment but are not a legal or licensing determination.

EVIDENCE

- Homepage/footer: identifies ООО «ЭсБилдер» and links to user-agreement and personal-data-processing documents.
- Site navigation: includes dedicated “Licenses,” “Documents,” and “Contacts” sections; no verified license number or regulator was supplied.
- Hosting infrastructure: served from AS49505, SELECTEL - JSC Selectel, RU.
- Transport encryption: TLS certificate issued by YR2 at DV validation level, valid to 2026-09-19T23:07:32+00:00.

What to Verify Next

Before credential or payment interactions, independently confirm that ООО «ЭсБилдер» is the contracting merchant or service operator, check any applicable telecommunications or hosting authorization through the relevant official registry, and review the user agreement for renewal, cancellation, suspension, and refund terms. Contact details should also be validated through an independent route, and payment methods should provide appropriate transaction records and dispute protections.

EVIDENCE

- “Licenses” page: use the published legal or authorization details as the basis for an official-registry check.
- “Documents” and “User Agreement” pages: review service renewal, termination, suspension, and refund provisions before purchase.
- “Contacts” page: independently validate the published support and business-contact channels.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate, low-risk website. The high-trust posture is supported by coherent commercial content, sustained provenance, clean reputation indicators, and normal observed site behavior, while the operator’s real-world identity remains independently unverified. The site is not assessed as a scam or impersonation site on the supplied evidence.

Infrastructure Integrity

The site resolves directly to a single hosting endpoint and does not use a detected CDN or WAF layer. This provides less intermediary shielding than an edge-protected deployment, but direct hosting is not, by itself, evidence of malicious activity; the observed infrastructure remains technically resolved and attributable to Selectel.

Closing Assessment

Ordinary use may proceed with proportionate commercial diligence, including independent confirmation of the contracting entity, applicable service terms, and payment protections before submitting credentials or making a payment.

Written analysis generated 2026-08-11 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of cms-hosting.ru.

- The request stayed on cms-hosting.ru. It was not redirected to another domain. CLEAR
- Registration is published under RU-CENTER-RU. CLEAR
- DNS for this domain is served by 172.140, across 3 name servers. NOTED
- The registration is paid up to 2027-02-10. NOTED
- The earliest public archive of this site is from 2003-04-07. CLEAR
- It is hosted on SELECTEL, from a server in RU. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about cms-hosting.ru at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
