## Key findings

---

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.

## Full analysis

---

### Overview

CMTV.com.ar is an established Argentine music and entertainment portal presenting current industry news, release listings, concert announcements, artist discographies, music videos, tutorials, and original acoustic sessions, apparently operating as an audience-driven editorial media business supported by promotion, partnerships, or advertising.

### Scam/Impersonation Risk

No identity contradictions, impersonation, phishing activity, or other scam indicators were observed. The site's long-established registration, coherent editorial identity, stable browsing behaviour, and clean external reputation converge strongly in support of legitimacy. The homepage contains substantive, current music coverage rather than fabricated engagement statistics, financial inducements, or deceptive requests for sensitive information.

- The domain registration record identifies SEÑALES DEL PLATA S R L as the owner and nicar as the registrar; registered 2013 (~12.85 years old), with registration running to 2027-07-13.
- The homepage presents 3,577 characters of substantive editorial content across seven music-related subject areas, including dated news items, releases, concerts, discographies, and CMTV acoustic productions.
- Controlled interaction with the homepage completed two of two runs successfully, with no cloaking, hidden forms, suspicious inline scripts, clipboard manipulation, wallet activity, or console errors.
- External reputation checks recorded 0 malicious and 0 suspicious detections, no malicious safe-browsing finding, no reported abuse, and an established top-one-million traffic presence.

### Regulatory Verification Notes

CMTV operates as an editorial music publisher rather than a financial, investment, payments, or other regulated-service provider. No regulatory licence claim is made, and none is expected for the business model evidenced on the homepage. Standard legal pages and a named registrant support an identifiable operating presence, although the supplied legal-page evidence does not establish the detailed corporate disclosures or governing terms contained within those pages.

- The homepage identifies the service as a music-news and entertainment publication and makes no financial, brokerage, investment, cryptocurrency, or regulated-service claim.
- The observed site structure includes standard legal pages alongside editorial sections for artists, news, releases, videos, and original productions.
- The site's transport encryption uses a valid YR1-issued domain-validated TLS certificate, valid to 2026-09-20.
- The available third-party broker dataset contains no matching broker profile for the site, consistent with its non-broker editorial purpose.

What to Verify Next

Enterprise onboarding may confirm the legal-page entity details and terms against the named registrant, establish the appropriate commercial contact through an independently reached official channel, and document any advertising, content-licensing, or data-processing arrangements relevant to the proposed engagement. These are ordinary counterparty checks rather than responses to an identified security concern.

- The homepage provides links to established social presences on YouTube, Instagram, Facebook, and TikTok, offering independent channels for brand confirmation.
- The reviewed homepage contains no login form, password field, hidden form, or form submission to an untrusted destination.
- Current dated editorial entries and a recurring monthly acoustic-content programme demonstrate an actively maintained publication.
- The supplied business description indicates possible advertising, promotional, partnership, or audience-based revenue, but does not specify monetization or commercial-contract terms.

Summary Verdict

The website is legitimate, established, and trustworthy. Its identifiable operating presence, mature editorial footprint, clean reputation, and benign technical behaviour form a consistent body of evidence with no contradictory risk signals. Normal interaction, including account login and standard use where offered, is appropriate.

Infrastructure Integrity

The site resolves directly to a likely origin server rather than using a detected CDN or WAF. Its identified, stable hosting and valid encrypted transport provide a sound technical baseline, although direct hosting is an architectural fact rather than independent proof of legitimacy.

- The hosting infrastructure serves the site from AS18747 (IFX18747 – IFX Corporation, US), resolving to one likely origin IP located in Colombia.
- Infrastructure resolution completed successfully, with no edge addresses or CDN vendor detected.

Closing Assessment

Prospective users may engage with the site normally, while organisations entering a formal commercial relationship should complete their standard counterparty and contractual due-diligence process.

Written analysis generated 2026-08-04 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

|                                  |        |
|----------------------------------|--------|
| Status                           | LIKELY |
| Identity score                   | 79/100 |
| Identity verification confidence | 78%    |

- Trusted social count=3

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

### What TrustSniffer observed

First-party facts recorded during the assessment of cmtv.com.ar.

- The request stayed on cmtv.com.ar. It was not redirected to another domain. CLEAR
- Registration is published under nicar. CLEAR
- DNS for this domain is served by towebs.com, across 4 name servers. NOTED
- The registration is paid up to 2027-07-13. NOTED
- It is hosted on IFX18747, from a server in CO. NOTED

### About this assessment

A trust score summarises the evidence TrustSniffer could collect about cmtv.com.ar at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
