## Key findings

---

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2022.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

## Full analysis

---

### Overview

CN Internet is a Brazilian regional internet service provider offering fiber-optic broadband and telecommunications solutions to residential and business customers across municipalities in Minas Gerais, funded through recurring connectivity subscriptions.

### Scam/Impersonation Risk

No contradictions were observed across the site's identity, content, behavior, and external reputation signals. The corporate presentation is coherent, the business model is ordinary for an established regional ISP, and the reviewed page shows no phishing, impersonation, sensitive-data harvesting, or unusual payment indicators. One isolated external detection was not corroborated by blacklist, phishing, or abuse-report findings and does not alter the legitimate overall assessment.

- The homepage presents a consistent company history, service description, regional coverage, mission, values, and customer-contact purpose.
- The homepage contains no login form, sensitive form, hidden form, wallet connection, or suspicious external destination.
- Domain registration: 2017-12-12; age 8.64 years.
- Web archives contain 37 snapshots from 2022-07-06 through 2026-05-15, covering 5 years.

### Regulatory Verification Notes

The company-history content states that CN Internet was licensed by Anatel. The reviewed material does not provide a license number or current registry reference, so current authorization should be confirmed as a routine transparency check rather than treated as evidence of misconduct. The site otherwise presents a clear corporate identity and conventional telecommunications activity.

- The homepage states that the company was licensed by Anatel and serves residential and business customers.
- Hosting is on AS273412, CN TELECOM SERVICOS DE INTERNET LTDA, Brazil.
- TLS uses issuer YR1 with DV validation and is valid to 2026-08-30 10:59:18 UTC.

### What to Verify Next

Confirm the current Anatel authorization and service coverage through the relevant official registry, and match the published plans, contracting entity, and billing details before any material commercial commitment. Contact details should also be confirmed through an independently sourced channel.

- The homepage identifies coverage across multiple municipalities, providing concrete anchors for registry and service-availability checks.

- The site exposes dedicated company, plans, and contact pathways for comparison against contracting documentation.

Summary Verdict

The evidence supports a legitimate, established, and trustworthy corporate website with no observed scam or impersonation contradiction. Its overall posture is appropriate for normal interaction and standard customer use.

Infrastructure Integrity

The site is not fronted by a detected CDN or WAF and resolves through multiple likely origin addresses. This limits protective-layer mitigation but is an infrastructure characteristic, not evidence of illegitimacy.

Closing Assessment

Normal browsing, account access, and standard service interaction are appropriate; ordinary procurement and service-quality controls remain suitable for significant commitments.

Written analysis generated 2026-08-02 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

|                                  |            |
|----------------------------------|------------|
| Status                           | UNVERIFIED |
| Identity score                   | 30/100     |
| Identity verification confidence | 50%        |

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of cninternet.com.br.

- The request stayed on cninternet.com.br. It was not redirected to another domain. CLEAR
- DNS for this domain is served by 207.243 2804:617c:f000::177, across 2 name servers. NOTED
- The registration is paid up to 2027-12-12. CLEAR
- The earliest public archive of this site is from 2022-07-06. CLEAR
- It is hosted on AS273412, from a server in BR. NOTED

## About this assessment

A trust score summarises the evidence TrustSniffer could collect about cninternet.com.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
