

Is coconutoficial.com.br a scam? TrustSniffer's high-risk assessment: 0/100

coconutoficial.com.br

Verdict

0

OUT OF 100

CRITICAL RISK

coconutoficial.com.br shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-09-22 by automated analysis. Classification confidence 55%.

What this site appears to be

This page is a server-generated 404 Not Found response (nginx). No actionable content, forms, links, or business claims are present.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

At a glance

The page as captured

https://coconutoficial.com.br/

404 Not Found

nginx

What coconutoficial.com.br served when TrustSniffer captured it on 2026-09-22. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2016.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet, Kaspersky, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

The website at coconutoficial.com.br currently presents only a server-generated nginx “404 Not Found” page, with no visible business model, service description, contact path, forms, or commercial claims; its apparent purpose therefore cannot be established from the accessible homepage.

Scam/Impersonation Risk

Contradictory risk signals are present. The domain is confirmed as blacklisted by multiple external reputation sources, with malicious and suspicious detections recorded across the evaluated coverage. This materially outweighs the otherwise limited findings from the captured page: no phishing form, login mechanism, wallet interaction, external submission, or brand-impersonation content was observed, but the page is also only an error response and provides no substantive basis for establishing legitimacy. The available evidence therefore supports a critical-risk posture for sensitive interaction, rather than treating the absence of active content as reassurance.

EVIDENCE

- External reputation telemetry recorded 13 malicious and 3 suspicious detections, including detections from Fortinet, Kaspersky, and Sophos.
- The homepage returned “404 Not Found” through nginx and contained no actionable content, forms, links, or business claims.
- Domain registration records date creation to 2013-06-18, with an age of 13.27 years; this historical continuity does not offset the confirmed blacklist findings.
- Historical records contain 20 archive snapshots spanning 2016–2025, with 10 years tracked; the available history does not establish a legitimate operating purpose.

Regulatory Verification Notes

The accessible site does not provide legal, licensing, or operating disclosures that could be assessed. No license claim, licensing authority, or license number is presented, and the real-world operator remains unverified; the registration record names LETICIA LOPES LIMA ME, but that record alone does not independently connect the current website to an operating entity. This is a verification gap, not a standalone determination of fraud. The absence of a broker-dataset match provides no positive regulatory endorsement.

EVIDENCE

- The homepage is an nginx error page and exposes no terms, privacy, about, contact, or licensing content.
- The registration record lists LETICIA LOPES LIMA ME as the owner, with expiration on 2030-06-18; the website-to-operator relationship remains unverified.
- The site is hosted on AS31898, ORACLE-BMC-31898 – Oracle Corporation, US.
- The transport certificate is DV, issued by YR1, valid to 2026-10-31.

What to Verify Next

Sensitive interaction should remain suspended unless the responsible entity is independently confirmed through authoritative corporate and regulatory records. Any proposed account, payment, credential, or financial workflow should be validated through an independently sourced contact route and a registry or institutional record that is not reached through the website itself.

EVIDENCE

- Independent registry verification is required because the accessible site provides no licensing or corporate disclosure page.
- Independent confirmation of the registrant’s relationship to the domain is required before attributing the site to the named owner.
- The current homepage provides no functioning business or support channel through which the operator can be authenticated.

Summary Verdict

The overall posture is critical risk, with the available evidence unsuitable for trusting the site with sensitive interaction or financial reliance. The domain's technical continuity and functioning transport encryption do not overcome the confirmed external threat detections and the inability to establish a credible active operating purpose.

Infrastructure Integrity

The site resolves directly to infrastructure operated by Oracle Corporation in the United States, with one resolved address and no detected CDN edge or origin-candidate separation. Oracle hosting is a neutral infrastructure fact rather than evidence of legitimacy, and no protective network layer was identified that would mitigate the external reputation risk.

Closing Assessment

The appropriate enterprise disposition is to block or isolate sensitive interaction and require independent identity, regulatory, and reputation validation before any credentials, payments, or financial activity are permitted.

Written analysis generated 2026-09-22 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

- 01

Governance Risk
 - The public registration record for this domain is incomplete.

Registration and ownership rule:KF_WHOIS_INCOMPLETE
- 02

Sensitive Interaction Risk
 - The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.

Analysis engine signal:direct_threat
 - An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.

External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of coconutoficial.com.br.

- The request stayed on coconutoficial.com.br. It was not redirected to another domain. CLEAR
- DNS for this domain is served by com.br, across 2 name servers. NOTED
- The registration is paid up to 2030-06-18. CLEAR
- The earliest public archive of this site is from 2016-04-19. CLEAR
- It is hosted on ORACLE-BMC-31898, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about coconutoficial.com.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
