Key findings

- Automated classification: Not Scam.
- VirusTotal and Google Safe Browsing had no flags for this domain; its hosting IP carries AbuseIPDB reports below the confidence level TrustSniffer treats as a flag.

Full analysis

Overview

This website is an Australian technology-services site presenting Codecom's fibre solutions for critical infrastructure, with an apparent business purpose of describing and promoting infrastructure connectivity services.

Scam/Impersonation Risk

No contradictions were observed across the supplied identity, reputation, and behavioral evidence. The homepage's infrastructure-services positioning is consistent with a conventional content-led business site, while external reputation checks found no malicious or suspicious detections, no blacklist indication, and no brand-impersonation signal. Runtime inspection also found no hidden forms, wallet-draining behavior, clipboard manipulation, cloaking, or suspicious scripts.

- Homepage title identifies "fibre solutions for critical infrastructure."
- External reputation checks recorded zero malicious and zero suspicious detections.
- Behavioral inspection recorded no external posts, no hidden forms, no wallet activity, and no cloaking.

Regulatory Verification Notes

The domain registration identifies Synergy Wholesale Accreditations Pty Ltd as registrar and THE VIRTUAL IT DEPARTMENT PTY LTD as registrant. The available evidence presents a technology-services business rather than a regulated financial offering; no specific licensing requirement is established by the supplied pages. The available third-party broker dataset produced no match, which is contextual support rather than a regulatory determination.

- Domain registration lists Synergy Wholesale Accreditations Pty Ltd.
- Registrant is identified as THE VIRTUAL IT DEPARTMENT PTY LTD.
- The site's stated purpose concerns fibre solutions for critical infrastructure.

What to Verify Next

For a commercial engagement, independently confirm the contracting entity, service scope, and payment or procurement details through established business channels and applicable Australian corporate records. Any sector-specific certifications or contractual assurances should be validated directly against the relevant issuing bodies.

- The homepage establishes the service category but does not, in the supplied evidence, document specific certifications.
- The registration record provides an entity name suitable for independent commercial verification.

Summary Verdict

The site presents as a legitimate, established, and trustworthy technology-services website. Clean reputation results, stable behavior, identifiable registration, valid transport encryption, and consistent business positioning support normal interaction, including account login and standard use.

Infrastructure Integrity

The website is protected by CDN/WAF infrastructure, which reduces direct exposure of the origin environment and is a positive mitigating control. This protection supports infrastructure integrity but is not, by itself, proof of legitimacy.

Closing Assessment

Normal commercial interaction is appropriate, subject to ordinary procurement and counterparty checks proportionate to the value of the engagement.

Written analysis generated 2026-08-02 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNKNOWN
Identity score	50/100
Identity verification confidence	30%

- AI page analysis unavailable (page captured; identity not AI-verified)

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of codecom.com.au.

- The request stayed on codecom.com.au. It was not redirected to another domain. CLEAR
- Registration is published under Synergy Wholesale Accreditations Pty Ltd. CLEAR
- DNS for this domain is served by net.au, across 3 name servers. NOTED
- It is hosted on AMAZON-02, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about codecom.com.au at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
