

Is coinacademy.fr legit? TrustSniffer's high-trust assessment: 100/100

coinacademy.fr

Verdict

100

OUT OF 100

HIGH TRUST

coinacademy.fr appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-07-31 by automated analysis. Classification confidence 75%.

What this site appears to be

French cryptocurrency media and education portal publishing current news, token and protocol analysis, market data, platform reviews, purchase guides, security material, tools, and free training. The page promotes third-party exchanges and bonuses but also presents editorial-integrity information and an investment-risk disclaimer; no direct request for deposits, wallet secrets, or sensitive credentials is evident in the supplied content.

Evidence status and limitations

Evidence completeness: UNKNOWN

Key findings

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2021.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website is an established French-language cryptocurrency media and education portal offering news, market analysis, platform reviews, purchase guides, security resources, analytical tools, and free courses, with an apparent commercial model based on advertising, sponsorships, media partnerships, and affiliate referrals.

Scam/Impersonation Risk

No identity contradictions, brand impersonation, phishing activity, malicious reputation findings, or fund-harvesting behavior were observed. Although the homepage covers numerous crypto assets and promotes third-party exchanges and bonuses, these activities are presented within an editorial and educational publication rather than as a direct investment-taking service. The absence of sensitive forms, wallet access requests, and deceptive browser behavior further supports the conclusion that the site is legitimate.

- The homepage contained no login form, hidden form, sensitive-data form, wallet-provider request, or untrusted form destination.
- External reputation checks recorded no malicious or suspicious detections, no reported abuse, and no confirmed threat-list entries for the domain.
- The domain was registered in 2021 and is approximately 5.38 years old; registration is maintained through GANDI until 2029-03-13.
- The web archive contains 477 snapshots spanning 2021-04-30 to 2026-07-06, representing six years of tracked, continuous history without detected repurposing.

Regulatory Verification Notes

Coin Academy presents itself as a publisher and educational resource, not as a licensed broker, exchange, custodian, or investment manager. The supplied homepage includes investment-risk and editorial-integrity disclosures, but does not establish a regulatory authorization or license claim. This is consistent with its observed publishing model; any regulated service reached through its reviews or referrals should be assessed separately from the publication itself. No corresponding broker profile was identified in the supplied third-party broker intelligence, which is contextual only and does not determine legal status.

- The homepage describes free education across blockchain, trading, investment, security, taxation, NFTs, Bitcoin, and Ethereum.
- The homepage includes editorial-integrity information and an investment-risk disclaimer alongside commercial material.

- No license authority, license number, or claim of regulated financial-service status was identified in the supplied site content.
- The site uses a DV TLS certificate issued by WE1, valid until 2026-10-20.

What to Verify Next

For institutional reliance, the legal notice and editorial policy should be checked for the publisher’s current corporate identity, responsible editor, and rules governing sponsored or affiliate content. Any exchange, trading platform, bonus, airdrop, or investment opportunity discussed in an article should be verified directly with the relevant provider and, where applicable, the competent regulatory registry. Material financial decisions should rely on primary market, protocol, and regulatory sources rather than editorial coverage alone.

- The homepage maintains dedicated rankings and reviews for platforms including OKX, Coinhouse, Kraken, and Bitpanda.
- The site distinguishes spot exchanges from futures and derivatives platforms, making provider-specific due diligence relevant.
- Its content spans airdrops, DeFi, NFTs, ETFs, taxation, trading, and investment, areas in which terms and regulatory treatment can vary materially.
- The homepage identifies security education as a dedicated subject area, including training on securing cryptocurrency holdings.

Summary Verdict

The evidence supports a confident assessment that this is a legitimate, established, and trustworthy editorial website. Its sustained history, substantive publication activity, clean external reputation, stable observed behavior, and coherent business model converge without contradictory risk signals.

Infrastructure Integrity

The site is protected by Cloudflare’s CDN/WAF, with all four observed addresses operating as edge infrastructure and no origin candidate exposed during the analysis. This reduces direct origin-server exposure and provides a meaningful defensive control, although infrastructure protection alone is not evidence of business legitimacy.

- The hosting infrastructure is served from AS13335 (Cloudflare, Inc., US); the observed server address was 104.20.22.121.
- Four Cloudflare edge addresses were observed, comprising two IPv4 and two IPv6 addresses.

Closing Assessment

Normal interaction, including account login and standard use, is appropriate; financial decisions arising from published material should remain subject to ordinary independent due diligence.

Written analysis generated 2026-07-31 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
--------	------------

Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of coinacademy.fr.

- The request stayed on coinacademy.fr. It was not redirected to another domain. [CLEAR](#)
- Registration is published under GANDI. [CLEAR](#)
- DNS for this domain is served by cloudflare.com, across 2 name servers. [NOTED](#)
- The registration is paid up to 2029-03-13. [CLEAR](#)
- The earliest public archive of this site is from 2021-04-30. [CLEAR](#)
- It is hosted on CLOUDFLARENET, from a server in US. [NOTED](#)

About this assessment

A trust score summarises the evidence TrustSniffer could collect about coinacademy.fr at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that

evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
