

Is coingape.com legit? TrustSniffer's high-trust assessment: 100/100

coingape.com

Verdict

100

OUT OF 100

HIGH TRUST

coingape.com appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-07-31 by automated analysis. Classification confidence 75%.

What this site appears to be

CoinGape is a crypto and financial-media homepage featuring breaking news, live token prices, market analysis, forecasts, platform rankings, reviews, institutional research, podcasts, prediction-market data, press releases, advertisements, and B2B promotional services. The page contains prominent commercial referrals and sponsored-style material but no visible login, payment, or sensitive-data form in the supplied content.

Key findings

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2017.
- VirusTotal and Google Safe Browsing had no flags for this domain; its hosting IP carries AbuseIPDB reports below the confidence level TrustSniffer treats as a flag.

Full analysis

Overview

CoinGape is an established cryptocurrency and financial-media portal presenting breaking news, live token prices, market analysis, forecasts, platform rankings, reviews, institutional research, podcasts, press releases, and commercial promotions; its apparent business model combines publishing with advertising, sponsored visibility, affiliate referrals, and Web3-focused B2B services rather than directly accepting investments.

Scam/Impersonation Risk

No identity contradictions, brand impersonation, phishing behavior, or confirmed malicious reputation signals were observed. The long-established domain, extensive and continuous archival record, substantial global traffic footprint, and clean threat-reputation results converge strongly with the site's current identity as a mature crypto-media publisher. Observed browser behavior also showed no credential harvesting, hidden sensitive forms, wallet-draining activity, clipboard manipulation, or cloaking.

- The domain registration record shows registration through GoDaddy.com, LLC in 2017: **Registered 2017 (~9.2 years old)**, with expiry on 20 May 2028.
- The historical record contains **5,000 archive snapshots spanning 25 August 2017–14 November 2024 (8 years tracked)**, with no evidenced suspicious repurposing or semantic conflict.
- External reputation telemetry recorded zero malicious or suspicious detections, no search-browsing safety hit, and a global traffic rank of **42,961**.
- Interactive assessment of the homepage detected no login form, hidden form, external password form, wallet provider, wallet-sensitive operation, wallet drainer, clipboard write, or cloaking.

Regulatory Verification Notes

CoinGape presents itself as a publisher and research portal, not as a regulated broker or direct investment custodian, and the homepage makes no licensing claim. Its commercial content includes exchange and wallet rankings, crypto-card recommendations, staking and DeFi platform comparisons, futures and perpetual-DEX listings, no-KYC product guides, prediction-market coverage, and a BTCC welcome-reward promotion. These features create material affiliate and sponsorship incentives; they call for clear editorial independence and promotional-disclosure controls, but they do not constitute evidence of impersonation or fraud. No matching third-party broker profile was identified, which is neutral for a media business and is not a licensing determination.

- The homepage labels the service as crypto news, project reviews, ratings, and market analysis, while offering separate sections for institutional research, opinion, interviews, press releases, and business promotion.
- The homepage visibly presents advertising and referral-oriented material, including “Apply now,” “Claim Reward,” platform rankings, and product comparison categories.
- The site is served from **AS209242 (CLOUDFLARESPECTRUM – Cloudflare London, LLC, US)**.
- The site’s transport encryption uses a **WE1-issued DV TLS certificate, valid to 17 October 2026**.

What to Verify Next

Enterprise consumers should assess whether sponsored articles, press releases, rankings, reviews, and affiliate placements are consistently and conspicuously distinguished from independent editorial work. Any consequential financial decision based on platform comparisons or forecasts should be corroborated against the named provider’s official terms and, where regulated services are involved, the relevant regulator’s register. Institutional users should also confirm the publisher’s correction policy, conflicts-of-interest controls, authorship standards, and official contact channels through independently obtained information.

- The homepage combines editorial news and analysis with advertisements, reward promotions, press releases, reviews, and B2B visibility services, making disclosure separation a relevant due-diligence control.
- The homepage covers numerous third-party financial products and services whose operating terms and regulatory status sit outside the publisher’s direct control.
- The supplied page content identifies research, forecasts, ratings, and opinion as distinct content functions, supporting a review of the governance standards applied to each.

Summary Verdict

The website is legitimate, established, and trustworthy, with strong convergence across provenance, reputation, content maturity, and observed behavior and with no contradictory risk signals. Normal interaction, including account login and standard use, is appropriate.

Infrastructure Integrity

The site is protected by Cloudflare CDN/WAF services. Both observed addresses—141.193.213.20 and 141.193.213.21—were edge servers, while the origin was shielded from direct exposure; this is a conventional security mitigation that reduces origin-targeting risk but is not, by itself, proof of legitimacy.

Closing Assessment

Prospective users may engage normally, while applying ordinary source-validation and financial due-diligence controls before relying on published material for consequential decisions.

Written analysis generated 2026-07-31 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100

Identity verification confidence	25%
----------------------------------	-----

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of coingape.com.

- The request stayed on coingape.com. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by domaincontrol.com, across 2 name servers. NOTED
- The registration is paid up to 2028-05-20. CLEAR
- The earliest public archive of this site is from 2017-08-25. CLEAR
- It is hosted on CLOUDFLARESPECTRUM, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about coingape.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
