

Is coinmill.com legit? TrustSniffer's high-trust assessment: 92/100

coinmill.com

Verdict

92

OUT OF 100

HIGH TRUST

coinmill.com appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-07-31 by automated analysis. Classification confidence 45%.

What this site appears to be

CoinMill.com is an established currency-conversion utility covering fiat currencies, cryptocurrencies, and precious metals, with customizable calculators and webmaster tools. The page contains no evident investment solicitation, payment request, sensitive-data collection, or deceptive return claims.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

CoinMill.com is an established informational utility that provides free conversion calculators for fiat currencies, cryptocurrencies, precious metals, and other commodity units, together with customizable calculator and webmaster tools; its apparent business model is traffic-based rather than deposit-taking, trading, or investment management.

Scam/Impersonation Risk

No contradictory identity, phishing, impersonation, or malicious-reputation signals were observed. The homepage functions as a currency calculator rather than an investment funnel: it presents no payment demand, promised returns, wallet connection, credential-harvesting form, or concealed sensitive-data workflow. Its extensive cryptocurrency coverage—including BTC, ETH, XRP, USDT, XDG, and BNB—is consistent with the stated conversion function and is not accompanied by trading or investment solicitation.

- The homepage contains two calculator forms, neither of which requests sensitive information or submits data to an untrusted destination.
- Interactive testing found no hidden forms, external password forms, wallet-provider activity, clipboard hijacking, cloaking, or suspicious inline scripts.
- External reputation checks recorded 0 malicious and 0 suspicious detections, no malicious safe-browsing finding, and 0 abuse reports for the hosting address.
- The domain was registered on 7 June 2005 and is approximately 21.16 years old; registration remains valid through 7 June 2029.

Regulatory Verification Notes

The site presents itself as a financial-information tool, not as a broker, exchange, custodian, payment service, or investment provider. It does not claim a regulatory licence or publish a licence number, but the observed service does not accept deposits, execute trades, or promise financial returns; consequently, the absence of licensing language is not inconsistent with its apparent role. Registration through GoDaddy.com, LLC and the site's established, top-tier traffic footprint support its mature operating profile. The registrant uses Domains By Proxy, LLC, which is an ordinary administrative privacy arrangement rather than an identity contradiction.

- The homepage describes a currency exchange-rate conversion calculator covering fiat currencies, cryptocurrencies, and commodity units, without offering regulated transaction execution.
- No broker match or adverse broker-reputation record was identified in the supplied third-party context.
- The domain holds global traffic rank 37,764 and is within the top one million domains.

- The hosting infrastructure is served from AS16509 (Amazon.com, Inc.); transport encryption uses a DV certificate issued by YE1, valid until 26 October 2026.

What to Verify Next

Routine operational checks should focus on fitness for purpose rather than legitimacy concerns. Exchange-rate users should confirm the displayed update date and compare consequential calculations with an authoritative market or central-bank source. Organizations embedding the webmaster tools should review the supplied integration method within their normal change-control process, while account users should reach support through independently confirmed official channels if assistance is required.

- The homepage states that its conversion rates were current as of 29 July 2026, making rate recency directly visible to users.
- The homepage offers customizable calculators and webmaster tools intended for integration into other websites.
- The analyzed page displays a login link but no embedded login form or sensitive credential field.
- The site's page-authority profile is established but mid-range, supporting ordinary source corroboration for financially consequential calculations.

Summary Verdict

CoinMill.com is a legitimate, long-established, and trustworthy currency-conversion website. Its identity, informational business model, clean external reputation, mature usage footprint, and benign observed behavior converge without contradiction, phishing, or impersonation indicators.

Infrastructure Integrity

The site operates on mainstream Amazon cloud infrastructure with valid encrypted transport. This provides a conventional and professionally maintained delivery posture, although infrastructure quality is appropriately treated as a mitigating operational signal rather than standalone proof of legitimacy.

Closing Assessment

Normal use, including calculator access, account login, and standard site interaction, is appropriate; financially consequential conversion results should receive the same independent rate confirmation applied to any informational calculator.

Written analysis generated 2026-07-31 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	73/100
Identity verification confidence	37%

- Trusted social count=1

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of coinmill.com.

- The request stayed on coinmill.com. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by awsdns-16.org, across 4 name servers. NOTED
- The registration is paid up to 2029-06-07. CLEAR
- It is hosted on AMAZON-02, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about coinmill.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
