Key findings

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2017.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Coinpan is a Korean cryptocurrency community and information portal presenting market prices, exchange comparisons, crypto news, chart analysis, mining information, NFT and play-to-earn forums, user-generated discussions, and advertising or partnership opportunities.

Scam/Impersonation Risk

No phishing, impersonation, blacklist, or conflicting-identity indicators were identified. The homepage presents an informational and community-based model rather than soliciting deposits in exchange for returns; its cryptocurrency, trading, mining, NFT, and play-to-earn content creates ordinary sector-specific exposure to third-party claims, but no deceptive financial-promise signals were found. The site's clean external reputation and sustained public presence reinforce the conclusion that it is an established information portal.

- The homepage is classified as a community forum and information portal, with no detected phishing indicators or sensitive forms.
- The domain was registered in 2017 and is approximately 9.35 years old.
- The archive contains 84 snapshots spanning 2017–2024, covering 8 years.
- External reputation checks recorded zero malicious or suspicious detections and no blacklist result.

Regulatory Verification Notes

The supplied pages do not present a clear licensing claim or registration number. This is a limited disclosure matter rather than evidence of deception, particularly because the observed model is informational and community-based. Domain registration is recorded through Megazone Corp., doing business as HOSTING.KR; registration privacy is an administrative detail and does not create an identity contradiction.

- The site's transport encryption uses a DV TLS certificate issued by WE1, valid through 2026-10-03.
- The homepage identifies cryptocurrency news, market data, discussion boards, and advertising or partnership activity rather than a directly regulated deposit-taking service.
- No conflicting legal-entity names or broker-match signal were identified in the supplied identity and reputational material.

What to Verify Next

For any separate regulated service, advertisement, or commercial counterparty encountered through the portal, confirm the counterparty's identity and applicable authorization directly with the relevant official registry. Official contact and partnership channels should likewise be confirmed through an independent route before entering a material business relationship.

- The site includes dedicated notice, inquiry, and partnership-contact functions.

- The supplied content does not establish a specific regulated authorization for third-party offers appearing through the portal.

Summary Verdict

Coinpan presents as a legitimate, established, and trustworthy website. Converging evidence from its sustained history, coherent content model, strong readership footprint, clean reputation, and consistent technical operation supports normal use with high confidence.

Infrastructure Integrity

Cloudflare provides the site's CDN/WAF layer, and observed traffic is served through CDN edge infrastructure rather than a directly exposed origin. This reduces routine exposure of the hosting environment and is a mitigating infrastructure signal, not independent proof of legitimacy.

Closing Assessment

Normal interaction, including account login and standard use, is appropriate; any distinct commercial or regulated offer should receive ordinary counterparty due diligence.

Written analysis generated 2026-08-02 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of coinpan.com.

- The request stayed on coinpan.com. It was not redirected to another domain. CLEAR
- Registration is published under Megazone Corp., dba HOSTING.KR. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2028-03-28. CLEAR
- The earliest public archive of this site is from 2017-06-03. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about coinpan.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
