- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2017.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

CoinPost is an established Japanese cryptocurrency news and investment-information portal presenting reporting, market data, educational guides, sponsored announcements, advertising, and related premium information services for digital-asset audiences.

Scam/Impersonation Risk

No contradictions were observed. The homepage presents a coherent editorial news-portal model, with no detected phishing, brand impersonation, credential-harvesting, hidden-form, wallet-connection, or suspicious-script behavior. External reputation checks found no malicious or suspicious findings, supporting the conclusion that normal interaction with the site is appropriate.

- The domain was registered on 2017-04-14 and is approximately 9.31 years old.
- Historical records contain 627 snapshots spanning 2017–2026, covering 10 tracked years.
- The homepage ranked 121231 and was within the global top 1 million; external checks recorded 0 malicious and 0 suspicious findings.
- The homepage contained no login form, sensitive form, hidden form, wallet connection, or wallet-drainer behavior.

Regulatory Verification Notes

The homepage and associated legal areas provide company information, policy links, disclaimers, and editorial disclosures. The site presents information and advertising rather than directly soliciting deposits, but any regulated status associated with premium services, sponsored content, or financial promotions should be confirmed independently because no specific license or registration number is established in the supplied evidence. No broker-dataset match was identified; this is contextual reputation information, not a regulatory determination.

- The homepage identifies CoinPost as a cryptocurrency news and investment-information portal and includes legal-policy links and company information.
- The homepage states that AI-generated information is not guaranteed accurate and is provided for reference.
- Hosted on AS16509 (AMAZON-02 - Amazon.com, Inc., US).
- TLS certificate issued by Amazon RSA 2048 M01, validation level DV, valid to 2026-12-26T23:59:59+00:00.

What to Verify Next

For any premium or commercially sponsored offering, confirm the responsible corporate entity and applicable permissions through the relevant official registry. Market claims and AI-generated summaries should be checked against primary issuers, regulators, or exchange disclosures before being relied upon for investment decisions. Official contact channels should also be confirmed through an independent, established route.

- The homepage contains disclaimers limiting reliance on AI-generated information.
- Legal-policy and company-information links are available from the site.
- The homepage identifies sponsored announcements, advertising, and partnerships as part of the publishing model.

Summary Verdict

CoinPost presents as a legitimate, established, and trustworthy information website with strong convergence across identity, historical continuity, technical integrity, content coherence, and external reputation. The evidence supports normal interaction, including account login and standard use.

Infrastructure Integrity

The hosting and transport configuration provides baseline operational protection, with no supplied indication of malicious network behavior or exposed-origin contradiction. These controls are mitigating safeguards rather than independent proof of legitimacy.

Closing Assessment

Normal browsing, login, and standard account activity are appropriate; investment decisions should remain based on independently corroborated information.

Written analysis generated 2026-08-02 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of coinpost.jp.

- The request stayed on coinpost.jp. It was not redirected to another domain. CLEAR
- DNS for this domain is served by awsdns-06.net, across 4 name servers. NOTED
- The registration is paid up to 2027-04-30. NOTED

- The earliest public archive of this site is from 2017-08-26. CLEAR
- It is hosted on AMAZON-02, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about coinpost.jp at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
