Full analysis

Overview

This website is the online presence of Colégio Bem-Te-Vi, a local private school presenting early-childhood and fundamental education, a pedagogical approach, teaching staff, classroom facilities, and extracurricular offerings; its apparent business model is to support school discovery and enrolment for families through tuition-based services.

Scam/Impersonation Risk

No contradictions were observed. The reviewed content contains no phishing, impersonation, or other scam indicators, and the site is informational rather than structured around credential capture, sensitive forms, wallet connections, or unusual transaction mechanisms. Available external reputation checks found no malicious or suspicious detections and no abuse reports. Historical evidence is consistent with an established educational web presence rather than suspicious domain repurposing. The site appears legitimate on the available evidence, although this does not independently prove the real-world operator's identity.

EVIDENCE

- The homepage describes a private school and contains no login form, hidden form, or sensitive-data submission mechanism.
- The domain registration record shows registration on 2016-08-23 and an age of approximately 10 years.
- Historical records show 44 archive snapshots spanning 2014–2025, with 12 years tracked.
- Public reputation checks recorded no malicious detections, suspicious detections, or abuse reports for the domain.

Regulatory Verification Notes

The website's educational presentation is coherent with a local private-school operation, but the reviewed content does not state a license or registration number. This is a transparency item for ordinary regulatory verification, not evidence of a scam or identity contradiction. The registration record names Lucineia Aparecida Domingues ME; that is a concrete administrative signal, but it does not independently establish that this entity operates the school website. The available evidence therefore supports an apparently legitimate site while leaving operator identity and any applicable education authorization to be confirmed separately.

EVIDENCE

- The registration record lists Lucineia Aparecida Domingues ME as the recorded owner.
- The site is served from AS31898, identified as ORACLE-BMC-31898 – Oracle Corporation, US.
- The transport certificate is issued by YR2, uses DV validation, and is valid to 2026-10-05.
- The reviewed site content does not state a license or registration number.

What to Verify Next

Before credential or payment interactions, an independent check should confirm the school's legal operator and any education authorization applicable to its activities through the relevant official registry. Enrollment, cancellation, refund, and payment-protection terms should also be obtained and reviewed before financial commitment. The principal conversion path is visit scheduling, which provides an opportunity to validate the institution through an independently sourced contact route before proceeding.

EVIDENCE

- The homepage offers visit scheduling as a primary next step for prospective families.
- The site links to Facebook and Instagram, allowing those public channels to be cross-checked against independently obtained contact details.
- The reviewed content is informational and does not itself provide a sensitive payment or credential-submission form.

Summary Verdict

The overall posture is **high trust and low risk**, and the available evidence is consistent with an established, apparently legitimate website. The classification supports ordinary engagement with the site, while the real-world operator identity remains likely rather than independently verified.

Infrastructure Integrity

The site resolves to Oracle Corporation infrastructure in the United States on AS31898, with no CDN or WAF layer identified and no origin candidates reported. Oracle is established hosting infrastructure and provides a mitigating operational signal, but hosting arrangements alone do not authenticate the site operator.

Closing Assessment

Normal browsing is proportionate to the assessed posture; independent operator-identity, enrollment-term, and payment-protection checks should be completed before submitting credentials or making payment.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about colegiobemtevi.com.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
