Full analysis

Overview

This is the institutional website of Colegio Internacional de Lima, a private K–12 school presenting information about early education, primary and secondary levels, its educational approach, facilities, admissions process, costs, contact details, and institutional partnerships for prospective families.

Scam/Impersonation Risk

No contradictions were observed. The website's content, navigation, and stated purpose are coherent with an educational institution, and the available external checks identified no malicious, phishing, impersonation, or blacklist indicators. Identity is best described as apparent and evidence-consistent rather than independently proven: the site identifies itself as Colegio Internacional de Lima, publishes an institutional address and telephone number, and links to Facebook, Instagram, and YouTube. The absence of sensitive login, payment, or wallet-interaction mechanisms further reduces the immediate impersonation and abuse concern.

EVIDENCE

- The homepage identifies Colegio Internacional de Lima and describes education from Inicial through Secundaria, with institutional values and an admissions call to action.
- The Contact and institutional-information content publishes a Santiago de Surco address and telephone contact.
- Observed page behavior showed no login form, hidden form, external password form, wallet connection, clipboard manipulation, cloaking, or suspicious inline scripts.
- Available external reputation checks recorded no malicious or suspicious detections, no Google Safe Browsing malicious result, and no external blacklist match.

Regulatory Verification Notes

The site provides substantial institutional and admissions information, but the reviewed content does not present a licensing authority or registration number. This is a regulatory-disclosure gap requiring confirmation, not evidence of fraud. The registration record lists NIC.PE as registrar and “cil lis eirl” as the recorded owner; the available evidence supports a likely connection to the institution but does not independently establish the operator’s full legal identity or educational authorization. The site also lacks structured metadata and a meta description, which are presentation and discoverability limitations rather than substantive legitimacy findings.

EVIDENCE

- The Nosotros, Propuesta educativa, Niveles, Equipo Docente, Infraestructura, Admisión, and Contact sections provide a coherent institutional profile and admissions pathway.
- The domain registration record lists registrar NIC.PE and recorded owner “cil lis eirl.”
- The site’s TLS certificate uses DV validation, was issued by YE2, and is valid to 2026-11-07T18:36:15+00:00.
- The reviewed pages do not state a licensing authority or display a registration number.

What to Verify Next

Before enrollment, tuition payment, or other material commitments, the institution’s authorization and operating status should be confirmed through the relevant Peruvian education authority or registry. Admissions, fee, refund, and enrollment terms should be matched against written documentation supplied through independently confirmed institutional channels. Contact details should also be validated through an independent route before transmitting documents or making payments.

EVIDENCE

- The Proceso de Admisión and Costos Educativos pages identify the areas requiring documentary confirmation before enrollment.
- The Contact page provides the institutional contact route to be cross-checked independently.
- The site presents separate pages for institutional identity, educational levels, admissions, and costs, allowing the claims to be compared for consistency.

Summary Verdict

The website presents a coherent, apparently legitimate educational-institution profile with no observed scam or impersonation contradiction. Its overall posture is **moderate trust**: suitable for ordinary informational use, while the real-world operator and regulatory standing remain only likely rather than independently verified.

Infrastructure Integrity

The site resolves directly to hosting provided by PRIVATESYSTEMS - PrivateSystems Networks in the United States, on AS63410, with one resolved address and no detected CDN or WAF layer. The transport encryption is an additional protective control, but the hosting arrangement itself should be treated as infrastructure context rather than proof of institutional legitimacy.

Closing Assessment

Routine browsing is proportionate, but independent confirmation should precede sensitive document submission, enrollment commitments, or high-value payments.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about colegiointernacionaldelima.edu.pe at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
