

Is collegeboard.org legit? TrustSniffer's high-trust assessment: 100/100

collegeboard.org

Verdict

100

OUT OF 100

HIGH TRUST

collegeboard.org appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-12 by automated analysis. Classification confidence 75%.

What this site appears to be

Official College Board site pages offering sign-in/account access, information about SAT/AP tests, college search tools, privacy and cookie controls, and resources for students and educators.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 1997.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The College Board website is an established education and assessment platform presenting SAT, AP, PSAT, college-search, advising, scholarship, and student-account services, with an apparent not-for-profit model supported by testing and registration fees, publications, and institutional memberships.

Scam/Impersonation Risk

No contradictions were observed across the reviewed pages and external reputation signals: there were no phishing, impersonation, blacklist, or malicious-content findings. The homepage's sign-in and account-creation functionality is consistent with its stated student score and personalized-service functions; the analysis found no hidden forms, external password submission, wallet activity, or other abuse-oriented behavior. A limited behavioral signal involving external network requests was attributed to ordinary site functionality rather than a confirmed threat, with no corresponding content or execution indicators. The site also presents a long-established web presence, a top-tier global traffic footprint, and clean external reputation results, which converge with the page content in supporting an apparently legitimate, established website.

EVIDENCE

- The registration record shows the domain was created on 1994-12-14 and is approximately 31.68 years old.
- Historical records contain 5,000 archive snapshots spanning 1997–2020, with 24 years tracked.
- The homepage presents SAT, AP, score-report, college-search, and account-access services without detected phishing or brand-impersonation indicators.
- External reputation checks recorded 0 malicious and 0 suspicious detections, with 0 abuse reports.

Regulatory Verification Notes

The About content describes the organization as a mission-driven not-for-profit and states that more than 6,000 member institutions and organizations support its mission. Privacy, cookie, security, and account-access information is presented on the site, supporting a comparatively mature disclosure posture. The reviewed material did not identify a regulatory license claim or license number; for an education and assessment provider, this is a verification point concerning organizational and service-specific status rather than evidence of impersonation or fraud. The real-world operator identity remains independently unverified, so the on-site organizational description should be treated as an apparent identity claim rather than conclusive proof.

EVIDENCE

- The About page describes the organization as a “mission-driven not-for-profit organization” and refers to more than 6,000 member institutions and organizations.
- The registration record lists SafeNames Ltd. as registrar.
- The site's transport encryption uses a TLS certificate issued by YR2 with DV validation, valid through 2026-10-18.
- Privacy and cookie controls, account-access information, and a security-policy reference are present in the reviewed site content.

What to Verify Next

Before credential or payment interactions, independently match the organization's legal identity and applicable education-sector registrations against authoritative public records. For any paid registration, publication, or institutional service, review the applicable terms, cancellation or refund provisions, and payment-protection options. Confirm official support and contact channels through an independently sourced route rather than relying solely on information encountered during a session.

EVIDENCE

- The About and legal-information materials provide the principal sources for checking the organization's stated identity and service disclosures.
- The registration and payment-related pages are the appropriate locations for reviewing fees, terms, cancellations, and refund conditions.
- Account-access and privacy materials provide the relevant basis for checking credential-handling and data-use provisions.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website and supports a high-trust, low-risk posture for its stated educational services. No scam or impersonation contradiction was identified, although the available evidence does not independently prove the real-world operator identity.

Infrastructure Integrity

The site is served through Amazon infrastructure and protected by a CDN/WAF layer, which is a mitigating control that reduces direct exposure of the underlying service environment but is not, by itself, proof of legitimacy. All observed addresses were CDN edge addresses, and no origin candidate was identified in this analysis.

EVIDENCE

- Served from AS16509, Amazon.com, Inc. (AMAZON-02), US.
- Observed edge IPs: 13.248.160.137 and 76.223.34.124; observed origin IPs: 0.
- The hosting infrastructure is identified through ARIN registry data.

Closing Assessment

Ordinary use is proportionate to the evidence, subject to the stated independent checks of organizational identity, service terms, and payment protections before credentials or payments are submitted.

Written analysis generated 2026-08-12 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of collegeboard.org.

- The request stayed on collegeboard.org. It was not redirected to another domain. CLEAR
- Registration is published under SafeNames Ltd.. CLEAR
- DNS for this domain is served by awsdns-03.org, across 4 name servers. NOTED
- The registration is paid up to 2026-12-13. NOTED
- The earliest public archive of this site is from 1997-02-16. CLEAR
- It is hosted on AMAZON-02, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about collegeboard.org at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
