

Is colorworld.ir legit? TrustSniffer's high-trust assessment: 80/100

colorworld.ir

Verdict

80
OUT OF 100

HIGH TRUST

colorworld.ir appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 70%.

What this site appears to be

Persian-language educational site 'علوم رنگ – colorworld' featuring articles on color physics, chemistry, dyeing, printing and tutorials (e.g., MATLAB image processing). Navigation shows category listings and recent articles; no sign of financial solicitation or login-only functionality.

Evidence status and limitations

Evidence completeness: **UNKNOWN**

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

What colorworld.ir served when TrustSniffer captured it on 2026-08-20. The page may look different now.

Key findings

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2021.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

This is a Persian-language content website presented under the title “علوم رنگ – colorworld,” offering an editorial and educational publication apparently intended for informational readership rather than account-based or transactional activity.

Scam/Impersonation Risk

No phishing, impersonation, malicious-content, or other contradiction signals were observed. The site's visible content is consistent with an educational publication: it presents articles and tutorials concerning color physics, color chemistry, dyeing, printing, book introductions, MATLAB image processing, Photoshop, and color-measurement software, with no login form, financial solicitation, cryptocurrency functionality, or sensitive-data workflow. Behavioral testing likewise found no external posting, wallet connection, clipboard activity, hidden forms, suspicious inline scripts, or cloaking. The observed DOM changes and console errors are implementation-quality issues rather than evidence of impersonation or abuse. Available external reputation checks recorded no malicious or suspicious detections, although coverage was partial.

EVIDENCE

- The homepage identifies the site as “علوم رنگ – colorworld” and displays educational categories including color physics, color chemistry, printing, and dyeing.
- The domain shows registration continuity from 2021 and an age of 4.72 years.
- Archive coverage contains 685 snapshots spanning 2021–2026, with 6 years tracked.
- Browser testing recorded 19 console errors and a maximum post-interaction DOM difference of 2314, alongside zero external XHR activity and no hidden forms.

Regulatory Verification Notes

The site presents an informational publishing model rather than a financial, investment, brokerage, or payment service, so no regulated-service license claim is expected from the visible business model. The available captured content includes an About section and a copyright statement, but it does not independently establish the real-world operator or a formal institutional affiliation. This is an identity and disclosure limitation, not evidence of a scam. The registrar is IRNIC, and the site's transport encryption is valid, although domain-validated TLS confirms encrypted transport rather than legal ownership.

EVIDENCE

- The homepage navigation includes “About” and the footer states that site content may be republished with attribution; no legal entity or regulatory license number is established in the captured content.
- Domain registration is recorded through IRNIC.
- The site's TLS certificate is issued by YR1, uses DV validation, and is valid to 2026-10-21.

What to Verify Next

Before credential or payment interactions, an interested party should independently confirm the operator's identity through the site's About and contact channels, establish whether the publication is affiliated with any named educational or commercial organization, and apply ordinary payment-protection and dispute-resolution checks where a transaction is proposed. Any claim that the site provides regulated services should be checked against the relevant official registry rather than inferred from the site's presentation.

EVIDENCE

- The visible site structure includes an About page entry but does not by itself independently verify the operator.
- The captured homepage contains informational articles and tutorials rather than a sensitive login or payment workflow.
- The available analysis found no declared financial-service license claim to corroborate.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate, low-risk informational website. Its sustained content history, benign observed behavior, clean available reputation signals, and coherent educational purpose support a high-trust posture, while the real-world operator remains independently unverified.

Infrastructure Integrity

The site resolves to a single direct origin without a detected CDN or WAF, so it does not benefit from an intermediary protection layer or origin-masking arrangement. The observed hosting is AminIDC - Asre Pardazeshe Ettelaate Amin Institute, IR, on AS48147; a DNS heuristic produced a fast-flux-like indication, but that heuristic is unconfirmed and is not, on its own, evidence of malicious infrastructure.

EVIDENCE

- Hosting infrastructure: AS48147, AminIDC - Asre Pardazeshe Ettelaate Amin Institute, IR.
- The resolved address is 185.142.157.54 in IR, with one unique IP and one likely origin IP.
- No CDN or WAF vendor was detected.

Closing Assessment

Normal informational browsing is proportionate to the assessed posture; credential or payment actions should remain subject to independent confirmation of the operator, applicable terms, and available payment protections.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of colorworld.ir.

- The request stayed on colorworld.ir. It was not redirected to another domain. CLEAR
- Registration is published under IRNIC. CLEAR
- DNS for this domain is served by arvancdn.ir, across 2 name servers. NOTED
- The earliest public archive of this site is from 2021-11-30. CLEAR
- It is hosted on AminIDC, from a server in IR. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about colorworld.ir at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
