

Is columbiabank.com legit? TrustSniffer's high-trust assessment: 95/100

columbiabank.com

Verdict

95

OUT OF 100

HIGH TRUST

columbiabank.com appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-01 by automated analysis. Classification confidence 75%.

What this site appears to be

Columbia Bank's official-looking homepage presents personal, business, commercial, and wealth-management banking services, online banking access, contact information, branch locations, and regulatory disclosures.

Evidence status and limitations

Evidence completeness: UNKNOWN

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 1996.
- VirusTotal and Google Safe Browsing had no flags for this domain; its hosting IP carries AbuseIPDB reports below the confidence level TrustSniffer treats as a flag.

Full analysis

Overview

Columbia Bank's website presents a traditional banking platform offering personal, business, commercial, and wealth-management services, including deposit accounts, lending, credit cards, cash management, online banking, branch access, and customer contact facilities.

Scam/Impersonation Risk

No contradictions, phishing indicators, brand-impersonation signals, or material deception patterns were observed. The homepage's online-banking login flows, service catalogue, branch information, contact details, FDIC and Equal Housing disclosures, and established historical presence are consistent with a functioning bank website. Normal interaction, including account login and standard banking use, is appropriate.

- The homepage identifies Columbia Bank and provides personal, business, commercial, and wealth-management banking services.
- The online-banking interface provides three conventional login paths without hidden forms or untrusted destinations.
- External reputation checks recorded 0 malicious and 0 suspicious detections; the domain ranked 26920 and was within the top 1 million.
- The domain was registered in 1995 and is approximately 30.78 years old; historical records contain 1263 snapshots spanning 1996–2026, covering 31 tracked years.

Regulatory Verification Notes

The site provides FDIC and Equal Housing disclosures and presents a conventional banking business model based on deposits, lending, credit cards, cash management, commercial banking, and wealth management. The available site material does not present a license number or independently verified regulatory-registration reference, which is a transparency item for institutional confirmation rather than an indication of fraud. Domain administration is handled by Network Solutions, LLC, while registrant privacy remains an administrative detail.

- The homepage includes FDIC and Equal Housing disclosures and identifies contact and branch-location resources.
- The site is hosted by EPISERVER_AS – Optimizely AB, SE on AS30811.
- Transport encryption uses an EV certificate issued by Sectigo Public Server Authentication CA EV R36 for Umpqua Bank, valid through 2027-02-11.

- The site's stated business model covers deposits, lending, credit cards, cash management, commercial banking, and wealth management.

What to Verify Next

For a regulated engagement, the institution's licensing and deposit-insurance status should be confirmed through the relevant official registry, and independently obtained contact details should be used for any material account or payment instruction.

- The homepage provides a customer-service telephone number, branch locations, and contact navigation.
- The site offers dedicated personal, business, commercial, and card-related banking access.
- The homepage identifies the applicable deposit and housing disclosures for review.

Summary Verdict

Columbia Bank presents as a legitimate, established, and trustworthy banking website with strong identity continuity, substantive service information, clean reputation results, and no observed contradiction or impersonation indicators. Its evidence profile supports normal online interaction and standard account activity.

Infrastructure Integrity

The site resolves to infrastructure operated by EPISERVER_AS – Optimizely AB in Sweden, using AS30811, with two identified IP addresses and no detected CDN or WAF layer. The valid EV TLS certificate provides meaningful transport and identity assurance, while the hosting arrangement is best treated as a mitigating security control rather than independent proof of legitimacy.

Closing Assessment

Standard banking interaction is appropriate; regulated users should complete their normal institutional confirmation of licensing and official contact channels before material onboarding or transaction activity.

Written analysis generated 2026-08-01 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	80/100
Identity verification confidence	40%

- Trusted social count=4

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of columbiabank.com.

- The request stayed on columbiabank.com. It was not redirected to another domain. [CLEAR](#)

- Registration is published under Network Solutions, LLC. CLEAR
- DNS for this domain is served by nsone.net, across 4 name servers. NOTED
- The registration is paid up to 2026-10-26. NOTED
- The earliest public archive of this site is from 1996-11-01. CLEAR
- It is hosted on EPISERVER_AS, from a server in SE. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about columbiabank.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
