

Is comau.site a scam? TrustSniffer's high-risk assessment: 0/100

comau.site

Verdict

0

OUT OF 100

CRITICAL RISK

comau.site shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 55%.

What this site appears to be

Business site for Evergreene Landscape & Construction offering luxury outdoor transformations in Sydney Northern Beaches, with services, portfolio, contact info, and request-a-quote CTA.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

At a glance

What comau.site served when TrustSniffer captured it on 2026-08-20. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: less than 1 year (registration continuity).
- Public web-archive history exists since 2018.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

The website is a local-service business site for Evergreene Landscape & Construction, presenting luxury outdoor transformations for residential customers in Sydney's Northern Beaches through landscape design, backyard renovations, retaining walls, decking, driveways, pathways, portfolio material, and a request-a-quote process.

Scam/Impersonation Risk

The site's visible content resembles a conventional local contractor website and does not present a login form, cryptocurrency functionality, hidden forms, or other page-level phishing indicators. However, that benign presentation is outweighed by confirmed external threat detections: the domain was identified as malicious by multiple reputation sources, including a Tier-1 detection from Sophos, and is subject to a confirmed blacklist finding. These are direct contradictions to the site's ordinary business presentation and create a material risk for sensitive interaction. No conflicting legal-entity names or explicit brand impersonation were identified in the

supplied page evidence, so the principal concern is the external malicious-reputation signal rather than a demonstrated name-based identity conflict.

EVIDENCE

- The homepage presents Evergreene Landscape & Construction as a Sydney Northern Beaches landscaping and construction provider, with a free-quote call to action and no login form.
- External reputation telemetry recorded 6 malicious detections from 11 evaluated detections, with Sophos identified among the flagged vendors.
- A confirmed blacklist finding was recorded for the assessed domain.
- WHOIS records show registration on 2026-04-26, with an age of approximately 0.32 years; archival records contain 3 snapshots spanning 2018–2024, covering 7 tracked years.

Regulatory Verification Notes

The available evidence does not independently verify the real-world operator behind the site. The homepage supplies a trading presentation, services, testimonials, location, and contact mechanism, but the supplied material does not show a clearly identified legal entity, registration number, or licensing disclosure. For a landscaping contractor, the absence of a displayed license or registration number is a transparency and verification gap rather than proof of fraud; nevertheless, the combination of unclear governance disclosures and the external blacklist finding prevents reliance on the site's own business presentation. No matching broker-reputation record was identified, but that contextual result is not a licensing or regulatory determination.

EVIDENCE

- The homepage identifies the business as “Evergreene Landscape & Construction” and states that it is based in Cromer, NSW.
- The supplied business-profile evidence records no claimed license authority or license number.
- The site includes a contact and quote-request form, but the available page evidence does not independently connect the trading name to a verified legal entity.

What to Verify Next

Before any quotation, site visit, contract, payment, or disclosure of personal information, independently confirm that the trading name corresponds to a currently operating Australian business and that any required contractor, construction, or trade permissions apply and are current. Contact details should be validated through an independent source or offline route, and any proposed payment destination should be checked against the independently confirmed contracting entity. Sensitive credentials and financial information should not be submitted through the site unless those checks resolve the external reputation concern.

EVIDENCE

- The homepage is the stated source for the business name, Sydney location, services, testimonials, and quote process requiring independent corroboration.
- The available regulatory evidence does not provide a registration number, license authority, or verified operator identity to use as a direct validation reference.
- The external reputation assessment contains a confirmed blacklist finding requiring resolution before sensitive commercial engagement.

Summary Verdict

The overall posture is **critical risk**, with the site unsuitable for sensitive interaction on the available evidence. Its credible-looking local-business presentation does not overcome the confirmed external malicious detections and unresolved operator verification.

Infrastructure Integrity

Cloudflare CDN/WAF protection provides a mitigating layer against direct exposure of the service infrastructure, but it does not establish legitimacy and can limit independent assessment of the underlying host. The observed infrastructure consisted of CDN edge addresses, with no origin server address observable in this analysis.

EVIDENCE

- Server telemetry recorded AS13335, CLOUDFLARENET – Cloudflare, Inc., US.
- Infrastructure telemetry recorded edge IPs 166.117.246.71 and 75.2.29.147 on AS16509, AMAZON-02 – Amazon.com, Inc., US.
- The site's TLS certificate is domain-validated, issued by WE1, and valid to 2026-09-22.

Closing Assessment

Engagement should remain limited to passive review until the external reputation finding and the contracting entity's independent identity and authorization have been resolved.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

01 Governance Risk

- The public registration record for this domain is incomplete.

Registration and ownership rule:KF_WHOIS_INCOMPLETE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of comau.site.

- The request stayed on comau.site. It was not redirected to another domain. CLEAR
- Registration is published under Name.com, Inc.. CLEAR
- DNS for this domain is served by landingsite.ai, across 4 name servers. NOTED
- The registration is paid up to 2027-04-26. NOTED
- The earliest public archive of this site is from 2018-08-10. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about comau.site at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
