What compart.com.br served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2002.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

This is the corporate website for Compart / TradeHub within Grupo GPS, presenting trade-marketing, merchandising, data-intelligence, field-execution, training, agency, and retail-performance services. Its apparent business model is B2B engagement through commercial inquiries and service contracts rather than consumer financial transactions.

Scam/Impersonation Risk

No contradictions were observed. The site presents a coherent corporate profile, does not display a login or payment workflow, and the available page analysis found no phishing, brand-impersonation, hidden-form, wallet, or other abuse indicators. External reputation checks identified no malicious or suspicious detections in the evaluated coverage, although the real-world operator identity remains likely rather than independently verified.

EVIDENCE

- The homepage identifies the business as Compart Trade Marketing and describes its trade-marketing, retail, data, training, and agency activities.
- The page analysis classified the site as Corporate/B2B, with one ordinary contact form and no login form, hidden sensitive form, or untrusted form destination.
- Evaluated external checks recorded zero malicious detections, zero suspicious detections, and no brand-impersonation match.

Regulatory Verification Notes

The website provides a substantive commercial description, including its stated history of 31 years and its relationship with TradeHub | Grupo GPS. Registration data associates the domain with COMPART MARKETING E TECNOLOGIA LTDA, which is consistent with the site's apparent corporate identity, but that association is not independently verified by the available evidence. No financial, investment, or regulated-service offering is presented, and no licensing claim or license number is shown; this is therefore a disclosure item for ordinary corporate due diligence rather than evidence of wrongdoing. The contextual broker dataset returned no match.

EVIDENCE

- The homepage states "31 years" of trade-marketing experience and describes the TradeHub | Grupo GPS relationship.
- Domain registration: 2001-06-20; age 25.19 years.
- The domain registration record names COMPART MARKETING E TECNOLOGIA LTDA.
- The site's transport encryption uses a TLS certificate issued by YR2 with DV validation, valid to 2026-10-17T20:29:57+00:00.

What to Verify Next

Before a credential or payment interaction, an enterprise counterparty should independently confirm the contracting legal entity, commercial authority, and applicable service terms through an official corporate registry or an independently sourced business channel. Contract documentation should identify deliverables, invoicing arrangements, liability terms, and payment protections; any employment or supplier engagement should be validated through a separate offline route.

EVIDENCE

- The site includes a "Fale com a gente" commercial contact route and a careers section.
- The site links to LinkedIn, Instagram, YouTube, and Facebook, providing channels that can be cross-checked independently.
- The stated service model is based on retail trade-marketing operations, data intelligence, training, and agency communications rather than a regulated financial product.

Summary Verdict

Available evidence supports a **high-trust, low-risk posture** for an apparently legitimate and established corporate website. The site's content, technical operation, historical registration continuity, and clean observed

reputation are mutually consistent, while the operator’s real-world identity should remain described as likely rather than proven.

Infrastructure Integrity

The site resolves directly to hosting associated with AS265262, Skymail Serviços de Computação e Provisamento de Inf, Brazil, with one observed IP and no detected CDN or WAF layer. The valid DV TLS certificate provides transport protection, while the absence of a CDN means there is no additional edge-layer mitigation identified in the supplied infrastructure evidence.

Closing Assessment

Routine informational browsing is proportionate to the assessed posture; before credentials, payments, or a formal commercial commitment, ordinary independent checks of the counterparty, contractual terms, and payment protections should be completed.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	80/100
Identity verification confidence	80%

- Trusted social count=4

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of compart.com.br.

- The request stayed on compart.com.br. It was not redirected to another domain. CLEAR
- DNS for this domain is served by dns.br, across 2 name servers. NOTED
- The registration is paid up to 2027-06-20. NOTED
- The earliest public archive of this site is from 2002-01-09. CLEAR
- It is hosted on AS265262, from a server in BR. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about `compart.com.br` at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
