Full analysis

Overview

The website is an established ecommerce and educational platform operated as Compete Themes LLC, providing free WordPress themes alongside paid customization upgrades, a bundled VIP package, tutorials, a website-building course, and plugin recommendations for content creators.

Scam/Impersonation Risk

No identity contradictions, brand impersonation, phishing behavior, or deceptive interaction patterns were observed. The site's commercial identity and WordPress-focused purpose are consistent with a long-established domain and extensive, continuous archival history, with no evidence of suspicious repurposing. Its claims of more than two million downloads and strong customer ratings function as commercial social proof; within the supplied evidence, these claims are presented in a coherent product context rather than as inducements for fraudulent or sensitive transactions.

- The homepage identifies Compete Themes LLC and presents a consistent catalog of WordPress themes, upgrades, support resources, policies, and educational material.
- The homepage contained no sensitive form, hidden form, external credential destination, wallet interaction, clipboard hijacking, cloaking, or suspicious inline script behavior.
- External reputation checks recorded 0 malicious and 0 suspicious detections, no phishing finding, no reported abuse, and an established global traffic rank of 35,951.
- The domain was registered in 2013 and is approximately 13.19 years old; 3,929 archive snapshots span 2013–2026, covering 14 tracked years without established semantic repurposing.

Regulatory Verification Notes

The site presents a conventional software-product business rather than a financial, brokerage, or regulated investment service, so no sector-specific financial authorization is indicated by its stated activities. The homepage provides an identifiable company name and links to contact, support, and legal-policy resources. The supplied evidence does not establish the precise contents of those legal pages or an independently validated corporate registration; this is a limited disclosure-verification point, not evidence of deception or illegitimacy.

- The homepage describes a transparent monetization model based on optional premium upgrades and a bundled package for otherwise free WordPress themes.

- The homepage states that its themes are manually reviewed and approved by the official WordPress Theme Review Team.
- The hosting infrastructure is served from AS13335 (Cloudflare, Inc., US), and the domain is registered through Cloudflare, Inc.
- The site's transport encryption uses a valid DV TLS certificate issued by YE2, valid until 2026-10-12.

What to Verify Next

For institutional procurement, the contracting party's registered details, purchase terms, refund provisions, privacy obligations, and support commitments should be confirmed from the linked legal and support materials. Technical adopters should also independently validate theme compatibility, update practices, and the stated WordPress review status before production deployment. These are routine vendor-due-diligence controls and do not preclude normal use.

- The homepage provides direct access to support, contact, and legal-policy resources suitable for procurement review.
- The product catalog distinguishes free themes from paid upgrades, enabling confirmation of the applicable commercial terms before purchase.
- The site offers named themes including Modern Store, Challenger, and Mission News, giving evaluators specific products to test for compatibility and maintenance quality.

Summary Verdict

The website is legitimate, established, and trustworthy. Its identity, sustained operating history, clean external reputation, coherent business model, and benign observed behavior converge on a high-confidence assessment suitable for normal engagement.

Infrastructure Integrity

The website is protected by Cloudflare CDN/WAF infrastructure. All observed addresses were Cloudflare edge servers, while the origin server was not exposed through the assessment; this reduces direct-origin exposure and provides a useful security mitigation, although infrastructure protection alone is not evidence of business legitimacy.

Closing Assessment

Normal browsing, account login, standard use, and ordinary purchases are appropriate, subject to routine organizational procurement and software-security controls.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about competethemes.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
