

Is conac.cn legit? TrustSniffer's high-trust assessment: 90/100

conac.cn

Verdict

90

OUT OF 100

HIGH TRUST

conac.cn appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-17 by automated analysis. Classification confidence 65%.

What this site appears to be

Official-looking Chinese government domain registration management center site focused on policies, notices, and guidance for .政务 and .公益 domain registration; includes contact numbers and email and references to ICANN and domestic regulations.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

政务和公益机构域名注册

通知  北发大厦D座招租公告 关于调整“.政务”和“.公益”

What conac.cn served when TrustSniffer captured it on 2026-08-17. The page may look different now.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2011.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

This is the website of the China Organizational Name Administration Center, presenting policy notices, regulatory guidance, customer-service information, and administrative resources for registration and management of Chinese government and public-service domains under “.政务” and “.公益”. Its apparent business model is institutional domain administration, with any fees presented as part of government-rule-based registration services rather than commercial promotion.

Scam/Impersonation Risk

No contradictions were observed. The homepage is consistent with a government or public-service registry: it focuses on domain policies, notices, implementation rules, ICANN-related materials, and administrative guidance, with no login form, payment solicitation, cryptocurrency activity, or other observed abuse pattern. External reputation checks were clean, and the site's long registration continuity and sustained archival presence are consistent with an established website rather than a newly created impersonation. The real-world operator identity remains independently unverified, so the institutional presentation should be treated as evidence-consistent rather than conclusive proof of identity.

EVIDENCE

- The homepage is titled “政务和公益机构域名注册管理中心” and contains policy notices, registration rules, government-site management guidance, and ICANN materials.
- The domain was registered in 2008 and is approximately 18.27 years old; the listed registrar is 北京国科云计算技术有限公司（原北京中科三方网络技术有限公司）.
- The web archive records 335 snapshots spanning 2011–2026, covering 16 tracked years.
- The domain has a Tranco rank of 18102 and is within the top 1 million; external checks recorded 0 malicious and 0 suspicious detections, with no blacklist or phishing result.

Regulatory Verification Notes

The site's content presents an institutional role in administering “.政务” and “.公益” registrations and cites domestic regulations, implementation rules, and international domain-governance materials. However, the available content does not independently establish the real-world operator's legal identity or provide a specific licence or registration number; this is a transparency item for ordinary institutional verification, not evidence of fraud or impersonation. The site is not identified in the supplied evidence as a third-party regulated financial entity, and no broker-dataset match was found. Its transport and hosting indicators are technically consistent with a maintained institutional service.

EVIDENCE

- The homepage references the Internet Information Office and government-site security requirements, the center's domain-registration implementation rules, and ICANN policies.
- Hosted on AS58811, AP-CONAC-AS-AP - CONAC (China Organizational Name Administration Center), CN.
- TLS uses OV validation and was issued by DigiCert Secure Site Pro G2 TLS CN RSA4096 SHA256 2022 CA1 for 政务和公益机构域名注册管理中心, valid to 2026-09-18.
- The homepage provides a customer-service telephone number, a complaint-supervision telephone number, and a customer-service mailbox.

What to Verify Next

Before credential or payment interactions, an institution should independently confirm the center's status through an appropriate government or domain-registry directory rather than relying solely on the website's self-description. Any registration fee, invoice process, or administrative request should be matched to the published policy notices and confirmed through independently sourced official contact channels. For operational use, the relevant registration eligibility and website-domain management rules should also be checked against the applicable organization's internal authority and records.

EVIDENCE

- The homepage publishes notices concerning changes to “.政务” and “.公益” domain fees and the implementation of electronic invoices.
- The policy section identifies rules for domain registration, URL forwarding, government-site approval, qualification review, and site identification.
- The site provides both customer-service and complaint-supervision channels that can be cross-checked through an independent official source.

Summary Verdict

The overall posture is **high trust and low risk**, and the available evidence is consistent with an established, apparently legitimate institutional website. No scam, phishing, impersonation, or identity-conflict indicators were observed, although independent operator identity verification remains incomplete.

Infrastructure Integrity

The site’s identified CONAC hosting environment and valid OV certificate provide useful technical continuity and transport-assurance signals, but infrastructure alone does not prove the operator’s real-world identity. No abuse-ready behavior or suspicious external network activity was observed during the supplied technical assessment.

Closing Assessment

Normal informational use is proportionate to the evidence; before submitting credentials or making payments, ordinary independent checks of institutional identity, service terms, and payment protections should be completed.

Written analysis generated 2026-08-17 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of conac.cn.

- The request stayed on conac.cn. It was not redirected to another domain. [CLEAR](#)
- Registration is published under 北京国科云计算技术有限公司（原北京中科三方网络技术有限公司）.

[CLEAR](#)

- DNS for this domain is served by org.cn, across 3 name servers. NOTED
- The registration is paid up to 2028-05-15. CLEAR
- The earliest public archive of this site is from 2011-11-30. CLEAR
- It is hosted on AP-CONAC-AS-AP, from a server in CN. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about conac.cn at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
