

Is concretepol.com a scam? TrustSniffer's high-risk assessment: 0/100

concretepol.com

Verdict

0

OUT OF 100

CRITICAL RISK

concretepol.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-19 by automated analysis. Classification confidence 55%.

What this site appears to be

Short Russian-language landing/sales snippet offering concrete floor polishing, grinding and repair services.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2017.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

The website is a short Russian-language landing page presenting concrete-floor polishing, grinding, repair, and floor-care services. Its apparent business model is local, one-time service work and client contracts for on-site maintenance rather than a financial, investment, or technology platform.

Scam/Impersonation Risk

The site has a **material external trust contradiction**: it is reported as blacklisted, with nine malicious and one suspicious detections in evaluated external reputation data, including detections associated with Fortinet and Sophos. This is materially inconsistent with the homepage's benign presentation of local flooring services and the absence of observed login, payment, wallet, or other sensitive interaction mechanisms. No brand impersonation, phishing form, or conflicting legal-entity identity was observed in the supplied page evidence; however, the confirmed blacklist signal independently supports a high-risk assessment for sensitive engagement.

EVIDENCE

- External reputation data recorded 9 malicious and 1 suspicious detections, with Fortinet and Sophos among the flagged vendors.
- The homepage presents only "Полировка, шлифовка бетонных полов, ремонт старых полов." and contains no observed login or sensitive-input form.
- Domain registration records show creation on 2017-04-19 and an age of 9.34 years.

Regulatory Verification Notes

The site's apparent service activity is not presented with a claimed financial, investment, or regulated-services license. The available identity evidence does not independently connect the website to a verified real-world operator, and the captured content is too limited to establish corporate responsibility, contractual accountability, or service-provider credentials. Registration privacy is an administrative limitation rather than an identity contradiction, but the operator should not be treated as independently verified. The absence of a matched broker-reputation record provides no positive regulatory conclusion.

EVIDENCE

- The business description identifies concrete-floor services and one-time service fees, with no license authority or license number claimed.
- Archive records show coverage from 2017-11-28 through 2025-09-04, with 9 years tracked and no reported semantic repurposing.
- TLS uses issuer YR2 with DV validation and is valid until 2026-10-23.
- The domain registrar is Registrar of Domain Names REG.RU LLC; the registration expires on 2027-04-19.

What to Verify Next

Before any commercial engagement, an independent route should confirm the operating company or individual, service address, quotation terms, warranty, cancellation rights, and payment recipient. Any business registration or sector-specific authorization represented by the operator should be checked directly with the relevant official registry. Contact channels should be confirmed through an independently sourced route rather than relying solely on the landing page.

EVIDENCE

- The captured homepage contains 56 characters of substantive text and no visible form.
- The page has no detected internal or external links, structured business metadata, or stated canonical information.
- Behavioral testing recorded two runs, both unsuccessful, while no external requests, hidden forms, clipboard activity, wallet connection, or password-external form was observed.

Summary Verdict

The overall posture is **critical trust risk**, driven primarily by the confirmed external reputation contradiction rather than by the stated flooring-service business model. The website's real-world operator remains unverified, and the available evidence is insufficient to support sensitive interaction, commercial commitment, or transmission of credentials or financial information.

Infrastructure Integrity

The site resolves directly to a single likely origin address rather than a CDN edge, with no CDN or WAF vendor detected. It is hosted by SWEB-AS – SpaceWeb Ltd, RU on AS44112, with infrastructure registered through RIPE NCC; this provides a concrete hosting attribution but offers no independent legitimacy assurance. The transport layer uses a valid DV certificate issued by YR2, which protects the connection but does not offset the external reputation findings.

Closing Assessment

Prospective users should restrict activity to passive viewing and refrain from login, credential submission, or financial transactions unless independent operator and service-contract verification resolves the identified trust concerns.

Written analysis generated 2026-08-19 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

01 Governance Risk

- The public registration record for this domain is incomplete.
Registration and ownership rule:KF_WHOIS_INCOMPLETE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of concretepol.com.

- The request stayed on concretepol.com. It was not redirected to another domain. CLEAR
- Registration is published under Registrar of Domain Names REG.RU LLC. CLEAR
- DNS for this domain is served by spaceweb.ru, across 2 name servers. NOTED
- The registration is paid up to 2027-04-19. NOTED
- The earliest public archive of this site is from 2017-11-28. CLEAR
- It is hosted on SWEB-AS, from a server in RU. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about concretepol.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
