

Is congregacioncristiana.org.ar a scam? TrustSniffer's high-risk assessment: 0/100

congregacioncristiana.org.ar

Verdict

0

OUT OF 100

CRITICAL RISK

congregacioncristiana.org.ar shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 75%.

What this site appears to be

Official site for 'Congregación Cristiana en la Argentina' with navigation to institutional pages, contact info, online worship times, and address; appears informational and non-commercial.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

The page as captured

<https://congregacioncristiana.org.ar/>

What congregacioncristiana.org.ar served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2021.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Kaspersky flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

This website is an informational religious-organization site presenting itself as the official website of Congregación Cristiana en la Argentina, with institutional material, worship schedules, contact information, administrative resources, and online services rather than an evident commercial or financial offering.

Scam/Impersonation Risk

The site's visible content is consistent with a non-commercial church website and does not show page-level phishing, credential-harvesting, financial-solicitation, or brand-impersonation indicators. However, this benign presentation is materially contradicted by external threat intelligence: the domain is blacklisted by two external sources, with four malicious and one suspicious detections among evaluated results, including a major security-vendor flag. The available evidence therefore supports a clearly cautionary assessment for sensitive interaction, despite the absence of suspicious mechanics in the reviewed pages. No identity contradiction was observed across the supplied site content.

EVIDENCE

- The homepage presents Congregación Cristiana en la Argentina, worship information, an institutional navigation menu, and a physical address, with no financial-product flow or sensitive form.
- Domain registration continuity indicates an age of 4.72 years.
- Web-archive records show 727 snapshots from 2021-11-30 through 2026-05-11, spanning 6 years, with a maximum recorded gap of 1 year.

Regulatory Verification Notes

The institutional, doctrine, contact, administration, and terms-related navigation gives the site an apparent organizational purpose, but the real-world operator remains unverified. No financial license, registration number, or regulated-service authorization is claimed in the supplied pages; for a site presenting itself as a religious congregation, this is a disclosure and identity-verification matter rather than standalone evidence of fraud. The absence of a broker-dataset match provides no regulatory endorsement and no adverse broker-specific finding. The external reputation contradiction remains the controlling concern for decisions involving credentials, accounts, payments, or other sensitive activity.

EVIDENCE

- The institutional navigation includes “Nosotros,” “Estatuto,” “Puntos de Doctrina,” “Contacto,” “Administración,” and “Login,” while the supplied content does not identify an independently verified legal operator.
- The site is served from AS47583, identified as AS-HOSTINGER — Hostinger International Limited, CY.
- The transport certificate is issued by YE1, uses Domain Validation (DV), and is valid through 2026-10-09.

What to Verify Next

Before any sensitive interaction, an organization considering engagement should independently confirm that the congregation controls the domain through a trusted offline or previously established contact route. Any login function should be validated with the congregation through an independently sourced channel, and the domain’s current reputation status should be rechecked before credentials or other sensitive information are submitted.

EVIDENCE

- The homepage identifies the congregation and publishes an address and contact channel that can be compared against independently obtained organizational records.
- The site includes a “Login” entry, although the reviewed page did not contain a login form or hidden sensitive form.
- The supplied behavioral review recorded no external posts, no external XHR activity, no hidden forms, and no wallet-related activity across two successful runs.

Summary Verdict

The overall posture is **critical trust risk** for sensitive interaction. The site’s informational presentation and technically stable behavior do not overcome the confirmed external reputation contradictions, and the available

evidence is insufficient to independently verify the operator's identity.

Infrastructure Integrity

No CDN was detected, and four resolved addresses were assessed as likely origin addresses, with no edge-IP layer identified. This reduces the relevance of CDN-based protective assumptions; infrastructure characteristics may mitigate exposure in some respects but do not establish legitimacy or offset the external reputation concern.

Closing Assessment

Sensitive use should remain deferred unless independent organizational confirmation and a satisfactory, current reputation review are completed through channels not dependent on the website itself.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

- 01 Governance Risk

 - The public registration record for this domain is incomplete.
Registration and ownership rule:KF_WHOIS_INCOMPLETE
- 02 Sensitive Interaction Risk

 - The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
 - An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of congregacioncristiana.org.ar.

- The request stayed on congregacioncristiana.org.ar. It was not redirected to another domain. CLEAR
- The earliest public archive of this site is from 2021-11-30. CLEAR
- It is hosted on AS-HOSTINGER, from a server in UA. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about congregacioncristiana.org.ar at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
