

Is conigsa.com a scam? TrustSniffer's high-risk assessment: 0/100

conigsa.com

Verdict

0

OUT OF 100

CRITICAL RISK

conigsa.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 55%.

What this site appears to be

WordPress site for CONIGSA S.A presenting architecture and construction services, with service descriptions, testimonials and contact prompts; appears to be a standard corporate/service brochure site.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

What conigsa.com served when TrustSniffer captured it on 2026-08-20. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2012.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Kaspersky, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

CONIGSA S.A is a WordPress-based corporate brochure website presenting architectural and construction services, including architectural design, sustainable construction, interior remodeling, and project management, with the apparent business model of attracting clients for paid construction and consulting projects.

Scam/Impersonation Risk

The site's public content appears consistent with a conventional architecture and construction business: it presents service descriptions, testimonials, contact prompts, and no observed login, payment, cryptocurrency, or sensitive-data form. That benign presentation does not resolve the decisive external contradiction: the domain has been identified by multiple security sources as malicious and is also listed on an external blacklist, with detections from Kaspersky and Sophos. Under a security-forward assessment, the blacklist status and malicious detections outweigh the site's ordinary corporate appearance. No conflicting legal-entity names, explicit brand impersonation, or phishing form were observed on the reviewed pages, but the website's identity remains unverified and the external threat findings warrant treating sensitive interaction as unsafe.

EVIDENCE

- The homepage presents “CONIGSA S.A” and architecture/construction services, while behavioral inspection found no login form, hidden form, wallet connection, or external data-submission activity.
- External reputation assessment recorded 12 malicious detections from 17 effective evaluations and identified Kaspersky and Sophos as flagged vendors.
- The domain was marked blacklisted by both VirusTotal and an external blacklist source.
- Historical records identify the domain as registered on 2010-10-14 and approximately 15.86 years old; archive coverage is sparse despite records spanning 2012–2026.

Regulatory Verification Notes

The site presents itself as CONIGSA S.A and describes commercial services, but the available material does not independently establish the real-world operator behind the domain. No license, registration number, or regulatory authority is claimed on the reviewed pages; for an architecture or construction provider, the relevant corporate registration, professional qualifications, and project-contracting authority therefore remain verification matters rather than established facts. The public WHOIS record uses privacy protection, which is an administrative limitation and not, by itself, evidence of wrongdoing. The domain was registered through TUCOWS.COM, CO.; its transport encryption is valid but uses domain validation only, which confirms encrypted transport rather than organizational identity.

EVIDENCE

- The homepage, About, Services, Gallery, and Contact navigation identifies the business as CONIGSA S.A but does not provide an independently verified legal-entity connection.
- No licensing authority or license number is claimed in the available business or service content.
- Domain registration evidence: registered 2010-10-14T16:09:20Z; age 15.86 years; registrar TUCOWS.COM, CO.
- TLS certificate: issuer YR1; validation level DV; valid to 2026-10-20T17:58:26+00:00.

What to Verify Next

Before any engagement, the proposed operator should be matched against the relevant corporate registry and, where applicable, professional or construction licensing registers using independently obtained contact details. Any quotation, contract, advance payment, or request for documents should be validated through an offline or independently sourced business channel, and payment should use a method offering dispute or recovery protections. Credentials should not be entered on this domain, and sensitive business documents should not be submitted until the external threat findings have been resolved by the organization's security controls.

EVIDENCE

- The site's identity and service claims are presented through a standard brochure-style WordPress implementation rather than independently authenticated corporate documentation.
- The homepage contains contact prompts but no sensitive form; this reduces observed collection risk without addressing the external malicious detections.
- Hosting telemetry: served from AS36454, WHG-DAL - WHG Hosting Services Ltd, GB.

Summary Verdict

The overall posture is **critical trust risk**. Although the website presents a plausible small-business service profile and shows no obvious malicious behavior in the reviewed page interaction, confirmed external threat detections and blacklist status create a material contradiction that prevents a trustworthy assessment for sensitive use. The operator’s real-world identity is not independently verified.

Infrastructure Integrity

The site resolves directly to a single hosting address in Colombia and has no detected CDN or WAF layer; the infrastructure is attributed to WHG-DAL - WHG Hosting Services Ltd, GB, on AS36454. Valid TLS provides encrypted transport, but this infrastructure is only a mitigating technical control and does not offset the external reputation findings.

Closing Assessment

Engagement should remain suspended for logins, credential submission, financial transactions, and sensitive document exchange until the domain’s security reputation and operator identity have been independently cleared.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

- 01 Governance Risk

 - Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE
 - The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN
- 02 Sensitive Interaction Risk

 - The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
 - An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%
No on-site identity signals detected	

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of conigsa.com.

- The request stayed on conigsa.com. It was not redirected to another domain. CLEAR
- Registration is published under TUCOWS.COM, CO.. CLEAR
- DNS for this domain is served by colombiahosting.com, across 4 name servers. NOTED
- The registration is paid up to 2026-10-14. NOTED
- The earliest public archive of this site is from 2012-03-11. CLEAR
- It is hosted on WHG-DAL, from a server in CO. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about conigsa.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
