

Is connect1on.com a scam? TrustSniffer's high-risk assessment: 0/100

connect1on.com

Verdict

0

OUT OF 100

CRITICAL RISK

connect1on.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-19 by automated analysis. Classification confidence 55%.

What this site appears to be

A brief coming-soon landing page for connect1on.com advertising an AI site builder with 50 free credits and a call-to-action to start for free. Contains cookie notice; no product details, pricing, contact information, or forms present.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

At a glance

The page as captured

<https://connect1on.com/>

What connect1on.com served when TrustSniffer captured it on 2026-08-19. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2011.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

connect1on.com is a coming-soon landing page for an apparent software service, presenting an AI website-builder concept and inviting visitors to begin a free trial. Its current purpose appears promotional rather than operational, with limited information available about the service or its operator.

Scam/Impersonation Risk

Confirmed external contradictions are present. The domain is flagged by multiple external threat-detection sources, including 11 malicious detections and a confirmed blacklist status. This is materially inconsistent with treating the site as suitable for sensitive interaction, even though the landing page itself contains no login form, hidden form, wallet connection, or overt page-level impersonation indicators. Separate abuse reports concern a shared provider IP and therefore do not independently establish the operator's identity, but they do not offset the domain-level malicious detections. The appropriate posture is to avoid credentials, payments, account creation, and other sensitive actions on the site.

EVIDENCE

- The domain received 11 malicious and 1 suspicious external detections; two external blacklist sources reported a hit.
- The homepage is classified as a landing/coming-soon page and contains no login form, sensitive form, or hidden form.
- Browser testing observed 14 external XHR requests, 11 non-whitelisted XHR requests, and 2 non-whitelisted POST requests from the homepage.
- Abuse reporting recorded 7 reports against shared provider IP infrastructure; the attribution is to the IP rather than conclusively to the website operator.

Regulatory Verification Notes

The homepage promotes “Try Airo AI Builder,” advertises 50 free credits, and uses “Start for free” calls to action, while also stating that the service is launching soon. It provides no visible product details, pricing, contact information, or operational terms sufficient to establish the commercial entity behind the service. No license or registration number is claimed on the observed page; for an AI software service this is primarily a legal-identity and disclosure matter rather than evidence of a scam by itself. Independent identity verification remains unavailable from the supplied site content. The domain’s registration and archive records provide historical context, but they do not validate the current operator or business claims.

EVIDENCE

- WHOIS records show registration on 2023-08-01 through GoDaddy.com, LLC, with an age of 3.05 years and an expiry date of 2027-08-01.
- Historical records show 5 archive snapshots spanning 2011–2025, with 15 years tracked.
- The homepage contains 655 characters of visible text and provides only a privacy-policy link and cookie notice alongside the promotional calls to action.
- The site’s TLS certificate is DV-validated, issued by GoDaddy TLS Intermediate CA DV - R1v1, and valid through 2026-09-30.

What to Verify Next

Before any sensitive interaction, an independent party should identify the legal entity operating the service and confirm any applicable business registration or regulatory requirements through official records. The advertised service and free-credit offer should be validated through independently obtained contact channels, and any future payment, subscription, privacy, and data-processing terms should be reviewed before acceptance. Credentials, payment details, and confidential business information should not be submitted while the domain-level threat findings remain unresolved.

EVIDENCE

- The homepage provides no contact information or forms through which the operator can be independently identified.
- The observed page contains no pricing, product terms, or detailed service documentation.
- Identity verification is unverified, with no independent real-world identity signals supplied.

Summary Verdict

The website has a **critical trust posture** driven by corroborated external threat detections and blacklist findings. Its limited promotional content does not provide sufficient counterweight to those contradictions, and the operator cannot be independently connected to a verified real-world entity from the available evidence.

Infrastructure Integrity

The website is served through Amazon.com, Inc. infrastructure on AS16509 and is protected by a CDN/WAF layer; all observed addresses were CDN edge servers and the origin server was not observable. This provides useful exposure mitigation, but protective hosting infrastructure does not establish legitimacy and cannot overcome the domain-level reputation findings.

EVIDENCE

- Served from AS16509, Amazon.com, Inc., US.
- Two CDN edge IPs were observed, with 0 likely origin IPs identified.
- The infrastructure is marked as using a trusted CDN/WAF configuration.

Closing Assessment

The site should be limited to non-interactive observation until the external detections are resolved and the operating entity is independently validated; account login, credential submission, payment, and confidential-data sharing should not proceed in the interim.

Written analysis generated 2026-08-19 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox, external reputation.

01 Governance Risk

- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE
- The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- The page made background requests to destinations TrustSniffer does not recognise.
Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_XHR
- Most of what the page loaded came from other domains rather than from this one.
Behaviour in a sandbox rule:BEHAV_EXTERNAL_RATIO_HIGH
- The page exchanged network traffic with destinations TrustSniffer does not recognise.
Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_TRAFFIC
- The page sent data to a destination TrustSniffer does not recognise.
Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_POSTS
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Signals weighed against the site

- AbuseIPDB: 7 reports on hosting IP 13.248.243.5 (Amazon Technologies Inc., Content Delivery Network), 15% confidence. The reports are attributed to shared infrastructure, not specifically to this website.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of connect1on.com.

- The request stayed on connect1on.com. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by domaincontrol.com, across 2 name servers. NOTED
- The registration is paid up to 2027-08-01. NOTED
- The earliest public archive of this site is from 2011-02-07. CLEAR
- It is hosted on AMAZON-02, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about connect1on.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
