

Is copperkitchenmd.com legit? TrustSniffer's high-trust assessment: 97/100

copperkitchenmd.com

Verdict

97

OUT OF 100

HIGH TRUST

copperkitchenmd.com appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-19 by automated analysis. Classification confidence 55%.

What this site appears to be

Copper Kitchen — Maryland-based wedding and corporate catering company. The page presents services, sample menus, venue partners, testimonials, contact information and a call to request proposals. No signs of financial-investment or credential harvesting.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

The page as captured

<https://www.copperkitchenmd.com/>

What copperkitchenmd.com served when TrustSniffer captured it on 2026-08-19. The page may look different now.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2011.
- VirusTotal and Google Safe Browsing had no flags for this domain; its hosting IP carries AbuseIPDB reports below the confidence level TrustSniffer treats as a flag.

Full analysis

Overview

Copper Kitchen is a Maryland-based wedding and corporate catering website presenting seasonal menus, venue partnerships, testimonials, event-planning services, and proposal requests for private and corporate events. Its apparent business model is the sale of catering packages and related event services rather than financial products or account-based services.

Scam/Impersonation Risk

No scam, phishing, impersonation, or identity-contradiction signals were observed. The homepage content is coherent with a local catering business and contains no investment, cryptocurrency, credential-harvesting, or other high-risk financial proposition. One external classification was suspicious but unconfirmed, while two abuse reports concerned a shared Amazon content-delivery IP with zero confidence and were discounted because they were not attributable specifically to this website. The available evidence therefore supports an apparently legitimate site, while not independently proving the real-world operator's identity.

EVIDENCE

- The homepage presents wedding and corporate catering, seasonal menus, venue partnerships, testimonials, and proposal requests.
- Domain registration records show registration on 2011-04-28, with an age of 15.32 years.
- Archive records span 2011-10-15 through 2026-07-06, covering 16 years of tracked history.
- External reputation telemetry recorded 1 suspicious result and 2 abuse reports associated with shared Amazon infrastructure; the abuse attribution carried a confidence score of 0.

Regulatory Verification Notes

The site operates in an ordinary local-services category and does not present itself as a regulated financial or investment provider. The supplied content includes About Us, Team, Partners, Contact, menu, venue, and event-planning sections, but the available evidence does not independently connect the website to a specific legal entity. No regulated licence claim or licence number is presented in the supplied content; for this type of catering service, that is a transparency and contracting matter rather than evidence of a scam. The site's established registration history, mainstream hosting, and valid transport encryption are consistent with a functioning, established website. A separate broker-context check produced no match and does not constitute a licensing determination.

EVIDENCE

- The site's navigation includes About Us, Team, Partners, Contact, Sample Menus, Our Venues, FAQs, and event-catering guides.
- The domain registrar is Bluehost Inc.; the recorded expiration date is 2029-04-28.
- The site is served through AS16509, Amazon.com, Inc., US.
- TLS uses issuer YR2 with DV validation and is valid to 2026-09-14T14:32:51+00:00.

What to Verify Next

Before a deposit or contractual commitment, independently confirm the contracting business name, business-registration details, applicable cancellation or refund terms, and the bank or payment-merchant name shown on any invoice. Venue-partner references and testimonials should be cross-checked through independently sourced venue or event contacts. Any proposal or payment workflow should be reviewed to ensure that its terms, recipient, and dispute protections match the intended catering engagement.

EVIDENCE

- The homepage directs visitors to request proposals rather than presenting a conventional online checkout.
- The site identifies venue partnerships, sample menus, testimonials, and event-planning services as core content areas.
- The contact and proposal workflow is the relevant point at which contracting-party and payment details should be obtained.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website with a low overall scam and impersonation concern. The site's real-world operator remains independently unverified, so legitimacy should be understood as evidence-consistent rather than proven.

Infrastructure Integrity

The website is protected by CDN/WAF infrastructure, with observed edge servers on AS14618 operated by Amazon.com, Inc.; no origin-server candidate was identified in the observed resolution. This provides a mitigating layer against direct origin exposure, but protective hosting infrastructure alone is not proof of business legitimacy.

Closing Assessment

Ordinary independent checks of merchant identity, engagement terms, and payment protection should be completed before credentials, deposits, or other payment-related interactions.

Written analysis generated 2026-08-19 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Signals weighed against the site

- AbuseIPDB: 2 reports on hosting IP 76.223.58.8 (Amazon.com, Inc., Content Delivery Network), 0% confidence. The reports are attributed to shared infrastructure, not specifically to this website.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of copperkitchenmd.com.

- The request stayed on copperkitchenmd.com. It was not redirected to another domain. CLEAR
- Registration is published under Bluehost Inc.. CLEAR
- DNS for this domain is served by bluehost.com, across 2 name servers. NOTED
- The registration is paid up to 2029-04-28. CLEAR
- The earliest public archive of this site is from 2011-10-15. CLEAR
- It is hosted on AMAZON-02, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about copperkitchenmd.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
