

# Is coronavirusforgyms.com legit? TrustSniffer's high-trust assessment: 80/100

coronavirusforgyms.com

## Verdict

HIGH TRUST

coronavirusforgyms.com appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 70%.

What this site appears to be

A resource site offering templates and guidance for gyms to transition to remote training and run member engagement challenges. Includes downloadable documents, example workouts, marketing copy and an offer to book consulting with FitBiz University.

## Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

## At a glance

## The page as captured

<https://coronavirusforgyms.com/>

**FBU**  
**FITBIZ UNIVERSITY**

What coronavirusforgyms.com served when TrustSniffer captured it on 2026-08-21. The page may look different now.

## Key findings

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2020.
- VirusTotal and Google Safe Browsing had no flags for this domain; its hosting IP carries AbuseIPDB reports below the confidence level TrustSniffer treats as a flag.

## Full analysis

### Overview

This website is an informational resource for gyms, presenting a “Brick and Mortar to Remote Training Course,” downloadable member and staff communication templates, example workouts, Facebook-group guidance, engagement challenges, marketing materials, and an option to book consulting through FitBiz University.

### Scam/Impersonation Risk

No scam, phishing, impersonation, blacklist, or conflicting-identity contradiction was observed. The homepage presents a coherent informational business model rather than a deceptive financial or credential-harvesting service: it offers training materials, sample videos and workouts, member challenges, communication templates, and consulting support. Runtime observations identified external network activity and console errors, but no login form, hidden form, password submission, wallet connection, clipboard manipulation, or cloaking. A separate reputation signal concerns the shared Amazon delivery infrastructure rather than the website specifically, so it does not establish malicious activity by this site. The available evidence is therefore consistent with an established, apparently legitimate resource website, while its real-world operator remains independently unverified.

#### EVIDENCE

- Homepage: Presents “Corona Virus For Gyms,” remote-training guidance, downloadable email and staff templates, example workouts, Facebook-group instructions, member challenges, and marketing materials; no page-level red flags were identified.
- Homepage runtime behavior: No hidden forms, sensitive forms, password-external forms, wallet-provider activity, wallet-drainer activity, clipboard hijacking, or cloaking was detected.
- Domain history: Registered 2020 (~6.44 years old); 614 archive snapshots spanning 2020–2025 (6 years tracked), with continuous historical activity and no suspicious repurposing detected.
- Hosting-IP reputation: 8 abuse reports were recorded for 13.248.243.5, attributed to shared Amazon Technologies Inc. CDN infrastructure with a confidence score of 19; the signal is IP-level rather than site-specific.

#### Regulatory Verification Notes

The site appears to provide informational materials and consulting-related services, not a financial product or regulated investment offering. No licensing claim or registration number is presented in the supplied public content, so regulatory status is not established by the website and should be treated as a transparency item if the consulting activity falls within a regulated category. The domain is registered through GoDaddy.com, LLC, and private registration details are an administrative limitation rather than an identity contradiction. The site's established registration continuity, substantial archive history, valid transport encryption, and coherent page content support an evidence-consistent legitimacy assessment; they do not independently prove the operator's real-world identity.

#### EVIDENCE

- Registration record: Registered through GoDaddy.com, LLC on 2020-03-13 and scheduled to expire on 2027-03-13; registrant details identify Registration Private and Domains By Proxy, LLC.
- Hosting telemetry: Served from AS16509, Amazon.com, Inc. (AMAZON-02), United States.
- Transport security: TLS certificate issued by GoDaddy TLS Intermediate CA DV - R1v1, validation level DV, valid to 2026-09-29.
- Public business content: The homepage describes downloadable resources and consulting through FitBiz University but does not display a licensing claim or registration number.

#### What to Verify Next

Before credential or payment interactions, an interested party should independently confirm the merchant or consulting operator's legal identity, applicable registration or licensing status, refund or return terms, and available payment protections. Official support and booking channels should also be confirmed through an independent route, particularly before sharing information or committing funds.

## EVIDENCE

- Commercial-service review: The public material includes a consulting and booking pathway, making independent confirmation of contracting-entity details appropriate.
- Regulatory check: The public material does not establish whether any jurisdiction-specific registration applies to the offered services.
- Transaction check: Pricing, refund terms, and payment protections are not detailed in the supplied page content and should be confirmed before purchase.

## Summary Verdict

Available evidence is consistent with an established, apparently legitimate website with a high-trust, low-risk posture. No scam or impersonation contradictions were observed. The principal qualification is that the real-world operator identity has not been independently verified.

## Infrastructure Integrity

The website is delivered through Amazon CDN/WAF edge infrastructure, with observed addresses belonging to the edge layer and no origin candidate identified. This provides a meaningful exposure-mitigation measure, but protective hosting infrastructure is not proof of operator legitimacy.

## Closing Assessment

Ordinary engagement is proportionate to the assessed posture, subject to standard independent checks of merchant identity, terms, payment protections, and official contact channels before credentials or payments are submitted.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

## What the analysis found

No rule findings contributed to this verdict.

## Signals weighed against the site

- AbuseIPDB: 8 reports on hosting IP 13.248.243.5 (Amazon Technologies Inc., Content Delivery Network), 19% confidence. The reports are attributed to shared infrastructure, not specifically to this website.

## Identity verification

|                                  |            |
|----------------------------------|------------|
| Status                           | UNVERIFIED |
| Identity score                   | 30/100     |
| Identity verification confidence | 25%        |

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

## What TrustSniffer observed

First-party facts recorded during the assessment of coronavirusforgyms.com.

- The request stayed on coronavirusforgyms.com. It was not redirected to another domain. [CLEAR](#)
- Registration is published under GoDaddy.com, LLC. [CLEAR](#)
- DNS for this domain is served by domaincontrol.com, across 2 name servers. [NOTED](#)
- The registration is paid up to 2027-03-13. [NOTED](#)
- The earliest public archive of this site is from 2020-04-09. [CLEAR](#)
- It is hosted on AMAZON-02, from a server in US. [NOTED](#)

## About this assessment

A trust score summarises the evidence TrustSniffer could collect about coronavirusforgyms.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
