

Is corporacionlasirena.com safe? TrustSniffer's low-trust assessment: 25/100

corporacionlasirena.com

Verdict

25

OUT OF 100

LOW TRUST

corporacionlasirena.com is low-trust and potentially risky.

Several risk patterns were present. Do not send money or personal details until you have verified this business another way.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 55%.

What this site appears to be

Corporate website for Corporación La Sirena offering welding solutions and products, with contact numbers, office address in Guatemala, and links to social channels. No forms or financial/investment mechanisms detected.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

What corporacionlasirena.com served when TrustSniffer captured it on 2026-08-20. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2014.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

Corporación La Sirena presents itself as a Guatemalan corporate and ecommerce business supplying welding equipment, consumables, technical services, and product support to commercial and retail customers. Its homepage features welding machines, plasma cutters, electrodes, welding wires, electronic helmets, accessories, a product catalogue, service and warranty information, office contact lines, and a stated industrial-area address in Guatemala.

Scam/Impersonation Risk

The site content itself presents a coherent welding-supply business and does not show login forms, credential-harvesting mechanisms, investment features, or apparent brand impersonation. However, this benign presentation is materially outweighed by confirmed external blacklist records and multiple malicious or suspicious detections associated with the domain. The resulting contradiction supports a clearly cautionary posture for sensitive interactions, even though the available page content does not independently establish phishing or impersonation. No suspicious contact-email anomaly was identified.

EVIDENCE

- The homepage identifies Corporación La Sirena and displays welding products, technical services, warranty support, social links, and a Guatemalan office location.
- External reputation telemetry records 4 malicious and 2 suspicious detections out of 6 evaluated detections, together with a confirmed blacklist status.
- The observed site behavior recorded no login form, hidden form, password submission to an external destination, wallet connection, clipboard hijacking, or cloaking.

Regulatory Verification Notes

The available business pages describe a commercial distributor and service provider rather than a financial or investment operator. The site provides a company name, office address, telephone lines, and service categories, but the supplied content does not present a licensing authority or registration number; this is a transparency item for independent confirmation rather than proof of fraud. The real-world operator connection remains likely but not independently verified, so the on-site identity should not be treated as conclusively authenticated. Registration privacy is an administrative detail and does not, by itself, establish an identity contradiction.

EVIDENCE

- Domain registration: created 2014-09-19T14:18:33Z and aged 11.92 years; registrar is GoDaddy.com, LLC.
- Transport encryption: TLS certificate issued by YR1, validation level DV, valid to 2026-10-18T01:12:07+00:00.
- The Contact and homepage content provide the stated office address, distributor telephone line, customer-service telephone line, and technical-support telephone line.
- The site's title is "Inicio - Corporación La Sirena"; no structured data or meta description was detected in the supplied page analysis.

What to Verify Next

Before any sensitive transaction, an independent party should confirm that the stated Guatemalan company, office location, telephone channels, invoicing entity, and payment beneficiary all correspond to the same legitimate business. Any applicable commercial registration, tax documentation, warranty terms, return conditions, and supplier authorization should be obtained and checked through authoritative records or an offline channel rather than relying solely on the website. Credentials and financial information should not be submitted until the external reputation contradiction has been resolved through the responsible security or service provider.

EVIDENCE

- The Contact page supplies separate channels for distributors, customers, and technical warranties, enabling independent confirmation of the business relationship.
- The homepage links to Facebook, YouTube, LinkedIn, and Waze, providing potential independent routes for corroborating the stated business presence.
- The available business description identifies product sales and technical support as the operating model and contains no financial-investment mechanism requiring a financial-services license.

Summary Verdict

The overall posture is **low trust**, with a high likelihood of sensitive-interaction risk. The site has a plausible commercial presentation, but the confirmed external threat contradiction is decisive and prevents the website from being treated as trustworthy for credentials, payments, or other sensitive activity.

Infrastructure Integrity

The hosting arrangement offers limited mitigating value because the site resolves directly to a likely origin rather than through an identified CDN edge or WAF layer. Infrastructure evidence alone cannot offset the domain-level reputation concern.

EVIDENCE

- Hosted on AS31898, identified as ORACLE-BMC-31898 - Oracle Corporation, US.
- One unique IP was observed, with 0 edge IPs and 1 likely origin IP.
- The resolved hosting country is the US and the registry is ARIN.

Closing Assessment

Prospective users should restrict activity to non-sensitive review until the external reputation issue and the operator's business identity have been independently reconciled; credentials, payment details, and other financial information should remain out of scope in the interim.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

01 Governance Risk

- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.

Registration and ownership rule:KF_WHOIS_PRIVATE

- The registration record withholds contact details for the operator.

Registration and ownership rule:KF_WHOIS_HIDDEN

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	LIKELY
Identity score	79/100
Identity verification confidence	39%

- Trusted social count=3

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of corporacionlasirena.com.

- The request stayed on corporacionlasirena.com. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by tech-market.net, across 2 name servers. NOTED
- The registration is paid up to 2026-09-19. NOTED
- The earliest public archive of this site is from 2014-11-23. CLEAR
- It is hosted on ORACLE-BMC-31898, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about corporacionlasirena.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
