- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2025.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website is ASN Bank's Dutch corporate banking site, presenting company information, governance, investor relations, sustainability, news, careers, contact details, and privacy controls for corporate communication and stakeholder engagement.

Scam/Impersonation Risk

No contradictions were observed across the site's identity, content, technical behavior, or external reputation signals. The homepage presents a coherent corporate-bank identity, contains no login or sensitive-data form, and shows no phishing, impersonation, deceptive financial-promotion, or malicious behavior indicators. The site's content is consistent with an established institutional presence rather than a solicitation-led scheme.

- The homepage identifies "Corporate ASN Bank" and provides governance, reporting, sustainability, careers, and contact content.
- Automated interaction observed no hidden forms, external sensitive submissions, wallet activity, cloaking, or suspicious scripts.
- Evaluated reputation checks recorded zero malicious and zero suspicious detections, with no confirmed blacklist finding.
- The domain was registered in 1997 and is approximately 29.22 years old; archival coverage contains 61 snapshots across 2025–2026, spanning 2 tracked years.

Regulatory Verification Notes

The site provides substantial corporate, governance, privacy, investor-relations, and sustainability information. The supplied material does not establish an independently verified license number or regulator entry, so licensing remains a routine verification point rather than an indication of deception. Registration through Registrar.eu and the site's established corporate presentation support administrative continuity.

- The corporate homepage identifies company history, governance, compliance, financial reporting, and investor-relations topics.
- The supplied site content does not state a license authority or license number.
- The domain registrar is Registrar.eu; the domain creation date is 1997-05-20.
- The site is served from AS16509, Amazon.com, Inc.; its EV certificate was issued by GlobalSign GCC R3 EV TLS CA 2025 and is valid until 2026-11-16.

What to Verify Next

For regulated use, confirm the relevant legal entity and authorization directly through the applicable national financial-services register, and validate official contact channels through an independently sourced corporate reference before high-value or legally binding activity.

- The site contains dedicated governance, compliance, investor-relations, and contact sections.
- No license authority or license number is stated in the supplied corporate content.
- The site's transport certificate uses extended validation for the subject organization de Volksbank N.V.

Summary Verdict

The website presents a legitimate, established, and high-trust posture with strong convergence across corporate substance, technical stability, clean reputation signals, and coherent identity. Normal interaction, including account login and standard use, is appropriate.

Infrastructure Integrity

The website is protected by Akamai CDN/WAF infrastructure, with observed edge service on AS20940 (Akamai International B.V.); the origin server was not exposed in the observed network posture. This provides a meaningful layer of infrastructure protection while remaining a mitigating security signal rather than proof of legitimacy.

Closing Assessment

Routine browsing, account login, and standard transactions are appropriate, subject to ordinary account-security practices and the institution's normal operational controls.

Written analysis generated 2026-08-02 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	80/100
Identity verification confidence	80%

- Trusted social count=4

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

About this assessment

A trust score summarises the evidence TrustSniffer could collect about corporate.asnbank.nl at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
