Key findings

- Automated classification: Not Scam.
- Domain age: less than 1 year (registration continuity).
- Public web-archive history exists since 2004.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

This website is a Porkbun Marketplace listing for the domain correlationmatrix.com, presented as a commercial domain-sale landing page whose apparent purpose is to facilitate purchase and transfer of the domain to a new owner.

Scam/Impersonation Risk

No contradictions were observed. The homepage presents a coherent domain-sale purpose, identifies the marketplace context, and does not show phishing, credential-harvesting, hidden-form, or brand-impersonation indicators. The stated transaction model—account creation, marketplace checkout, domain transfer, and conventional payment methods—is consistent with ordinary domain brokerage rather than an abuse pattern. External checks found no malicious or suspicious detections among the evaluated signals, although reputation coverage was partial.

EVIDENCE

- The homepage is labelled as a domain marketplace and for-sale landing page, with no login form, hidden form, or sensitive credential collection detected.
- The homepage states that the domain is registered at Porkbun and supports transfer after successful checkout.
- Archive records show 19 snapshots spanning 2004-10-29 to 2021-11-30, covering 18 tracked years.
- WHOIS records show registration on 2026-01-17, an age of 0.59 years, and Porkbun LLC as registrar.

Regulatory Verification Notes

The available evidence is consistent with an established, apparently legitimate marketplace listing, but the real-world operator identity associated with the domain is not independently verified. The page identifies Porkbun LLC in its marketplace and copyright presentation; that identifies the service context, but does not by itself prove the legal identity of the domain seller or beneficial operator. The listing does not present a license or registration number. Given the apparent domain-brokerage business model, this is a disclosure point for ordinary commercial verification rather than evidence of a scam. No matching broker signal was found in the available third-party context, which is reputational information only and not a licensing determination.

EVIDENCE

- The homepage displays "Copyright © Porkbun LLC. All rights reserved." and directs customer support to Porkbun.
- The homepage does not state a financial, brokerage, or other regulated license number.
- The site is served from AS16509, Amazon.com, Inc. (AMAZON-02), US.
- The transport certificate is issued by YR2 at DV validation level and is valid to 2026-10-06.

What to Verify Next

Before creating an account or submitting payment, independently confirm that the marketplace page is reached through Porkbun's official customer-support and account channels. The prospective purchaser should review the transaction terms, seller and transfer conditions, refund provisions, and payment-protection arrangements presented at checkout. For a material purchase, confirmation of the seller's legal identity through an independent business record or offline contact route is appropriate.

EVIDENCE

- The homepage provides a Porkbun support route through its help function.
- The homepage states that ownership transfer occurs after successful checkout, making transfer conditions a material point for confirmation.
- The homepage offers several payment routes, so the selected method's dispute and buyer-protection terms should be reviewed before payment.

Summary Verdict

The overall posture is high trust and low risk, with the available evidence consistent with an established and apparently legitimate website. No scam, phishing, impersonation, or identity-conflict indicators were observed,

but the site's connection to a specific real-world operator remains unverified.

Infrastructure Integrity

CDN/WAF protection was observed, with the two observed edge addresses—207.207.210.36 and 207.207.210.50—both associated with AS16509 and Amazon.com, Inc.; no origin candidates were identified in this analysis. This infrastructure provides a mitigating layer against direct exposure, but it is not independent proof of legitimacy.

Closing Assessment

Ordinary use may proceed on a proportionate basis, subject to independent confirmation of merchant identity, transaction terms, and payment protection before credential or payment interactions.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of correlationmatrix.com.

- The request stayed on correlationmatrix.com. It was not redirected to another domain. CLEAR
- Registration is published under Porkbun LLC. CLEAR
- DNS for this domain is served by porkbun.com, across 4 name servers. NOTED
- The registration is paid up to 2028-01-17. CLEAR
- The earliest public archive of this site is from 2004-10-29. CLEAR
- It is hosted on AMAZON-02, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about correlationmatrix.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
