Full analysis

Overview

Corridão is an established Brazilian marketplace for running, walking, cycling, and multisport events, providing participant registration, organizer event publishing, race-timing services, and access to published results.

Scam/Impersonation Risk

No identity contradictions, brand impersonation, phishing behavior, malicious reputation findings, or deceptive financial propositions were observed. The site's long operating history, sustained archival presence, substantive event catalogue, and benign interaction behavior collectively support a legitimate and established identity rather than a recently created imitation or credential-harvesting operation.

- The domain-registration record identifies Streets Games as the owner and shows registration on 2 October 2015, making the domain approximately 10.84 years old.
- The web archive contains 172 snapshots spanning 24 March 2016 to 13 May 2026, representing 11 years of tracked history without detected suspicious repurposing.
- The homepage presents extensive event content and standard account navigation; testing detected no hidden forms, cloaking, suspicious scripts, external form submissions, or brand impersonation.
- External reputation checks recorded zero malicious and zero suspicious detections, no malicious safe-browsing classification, no reported infrastructure abuse, and a global traffic rank of 791,447.

Regulatory Verification Notes

The observed business is a sports-event marketplace rather than a financial, investment, or brokerage service, and it makes no claim to hold a financial-services licence. The homepage links to Terms of Use and a contact facility, although the supplied page content does not establish the full legal-entity or corporate-registration disclosures available through those destinations. This is a minor contractual-transparency consideration, not evidence of fraud or an identity conflict.

- The homepage provides visible "Terms of Use" and "Contact Us" navigation for contractual and support information.
- The domain-registration record names Streets Games and records an expiry date of 2 October 2026.
- The site is served from AS8075, operated by Microsoft Corporation, with the observed server located in Great Britain.
- The site's transport encryption uses a DV certificate issued by GeoTrust TLS RSA CA G1, valid until 28 November 2026.

What to Verify Next

For a specific event purchase, the participant should review the applicable organizer identity, pricing, cancellation, refund, timing, and result-publication terms before completing payment. Event organizers considering platform services should confirm the commercial agreement, settlement arrangements, data-processing responsibilities, and service scope through official channels.

- The homepage lists dated events across multiple Brazilian municipalities, indicating that transaction terms may depend on the individual organizer and event.
- A dedicated event-creation path is offered to organizers, making contractual allocation of organizer and platform responsibilities relevant.
- A separate timing-quotation facility indicates that timing services may be contracted independently from event publication.
- Password-recovery and account-registration routes are visibly integrated into the site’s standard account workflow.

Summary Verdict

Corridão is a legitimate, established, and trustworthy website. Its coherent operating model, durable provenance, clean reputation, substantive content, and benign observed behavior converge on a high-confidence trust posture with no contradictory risk signals.

Infrastructure Integrity

The website uses Cloudflare CDN/WAF protection, and all observed addresses were CDN edge infrastructure rather than exposed origin candidates. This arrangement reduces direct origin exposure and provides a meaningful security mitigation, although infrastructure protection alone is not proof of business legitimacy.

Closing Assessment

Normal interaction, including account creation, login, event registration, and standard platform use, is appropriate, subject to routine review of the terms governing the selected event or service.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about corridao.com.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
