

Is corsin-stoeckli.ch a scam? TrustSniffer's high-risk assessment: 0/100

corsin-stoeckli.ch

Verdict

0

OUT OF 100

CRITICAL RISK

corsin-stoeckli.ch shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 55%.

What this site appears to be

Plain directory index page (Index of /) served by LiteSpeed with a cgi-bin entry; no forms or external links detected.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

At a glance

The checks that decide most of this verdict.

Malware engines	16 flagged it VirusTotal	RISK
Google Safe Browsing	Not listed Google	CLEAR
Abuse reports on the host	0 reports AbuseIPDB; shared hosting inflates this count	NOTED
Domain age	3.4 years old Registered history	CLEAR
Web archive	Archived since 2023 Public history exists	CLEAR
Certificate	Encrypted connection Issued by YR1	NOTED

The page as captured

https://corsin-stoeckli.ch/

What corsin-stoeckli.ch served when TrustSniffer captured it on 2026-08-20. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2023.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Kaspersky, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

corsin-stoeckli.ch currently presents a bare “Index of /” directory listing rather than an identified business, service, or customer-facing platform. The page exposes only a cgi-bin entry and a LiteSpeed server notice, with no visible products, transaction flows, account functions, or stated operator purpose.

Scam/Impersonation Risk

Confirmed external threat detections and blacklist status create a material risk for sensitive interaction, despite the absence of malicious behavior in the limited page-level and sandbox observations. The available page does not establish a recognizable brand or operator, and no confirmed brand impersonation or conflicting legal identity was observed; however, the external detections are sufficiently significant that the site should be treated as unsuitable for login, credential submission, or financial activity. The thin directory page also provides no legitimate business context capable of counterbalancing the external warning.

EVIDENCE

- External reputation telemetry recorded 16 malicious detections and 1 suspicious detection among 22 evaluated results; blacklist status was true, with Kaspersky and Sophos among the flagged security vendors.
- The homepage returned a directory index titled "Index of /", containing a single cgi-bin entry and 142 characters of visible text rather than an identifiable service or business presentation.
- Domain registration continuity indicates an age of 3.375770020533881 years.
- Archive records show 20 snapshots, first seen 2023-10-31 and last seen 2025-04-09, with 3 years tracked.

Regulatory Verification Notes

The served homepage does not visibly identify a legal operator, provide corporate details, or make a licensing claim or present a license number. This is a significant disclosure gap for any site that might later be associated with regulated, financial, or other sensitive activity; it does not independently establish fraud, but it prevents meaningful on-page verification of identity or authorization. Public identity linkage remains unverified, and the absence of a broker-dataset match provides no regulatory conclusion. The valid transport certificate and identified hosting service are technical facts only and do not validate the operator.

EVIDENCE

- The homepage contains no visible legal, corporate, licensing, or registration disclosure.
- Hosting resolved to AS35206, NOVATREND-AS – NovaTrend Services GmbH, CH.
- TLS uses issuer YR1 with DV validation and is valid to 2026-10-31T17:51:12+00:00.

What to Verify Next

Before any sensitive interaction, an organization should independently establish who controls the domain through a trusted offline or registry-based route and confirm that any claimed business activity is authorized by the relevant regulator. Security teams should also obtain a current disposition for the domain and hosting indicators from their own protective monitoring and incident-response processes. No credentials, payment details, wallet approvals, or downloaded content should be exchanged while those checks remain unresolved.

EVIDENCE

- The homepage provides no forms, external links, signup mechanism, or payment route through which an operator or service could be validated.
- The page is a static directory listing with no visible login form, hidden form, external POST activity, wallet connection, or suspicious script activity.

Summary Verdict

The site has a **critical sensitive-interaction risk posture**. Its externally recorded threat and blacklist indicators outweigh the limited benign characteristics of the static page and the presence of standard transport encryption, while the available content does not support reliable identity verification.

Infrastructure Integrity

The domain is served through NOVATREND-AS infrastructure without a detected CDN or WAF, and two IP addresses are assessed as likely origin addresses. This direct hosting arrangement offers limited intermediary protection; infrastructure stability or TLS availability should not be treated as evidence of legitimacy.

Closing Assessment

Interaction should remain limited to passive observation until the operator, domain status, and security disposition have been independently cleared through trusted channels; login, credential submission, and financial transactions should not proceed beforehand.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

01 Governance Risk

- The public registration record for this domain is incomplete.
Registration and ownership rule:KF_WHOIS_INCOMPLETE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of corsin-stoeckli.ch.

- The request stayed on corsin-stoeckli.ch. It was not redirected to another domain. CLEAR
- The earliest public archive of this site is from 2023-10-31. CLEAR
- It is hosted on NOVATREND-AS, from a server in CH. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about corsin-stoeckli.ch at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
