

# Is corzclient.net safe? TrustSniffer's moderate-trust assessment: 50/100

corzclient.net

## Verdict

50

OUT OF 100

MODERATE TRUST

corzclient.net is moderately trusted.

Most signals looked ordinary, and some evidence was missing. Read the checks below before you pay or hand over personal details.

Governance Risk

Assessed 2026-09-25 by automated analysis. Classification confidence 55%.

What this site appears to be

Site offers Corz Client, a free Minecraft 1.21.11 mod (.jar) for DonutSMP with automation and visual modules. No account or payments required. Installation instructions and supported launchers are provided. Contains downloadable executable—exercise caution due to risk of malicious payloads inherent to third-party mods.

## Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

## The page as captured

https://corzclient.net/

What corzclient.net served when TrustSniffer captured it on 2026-09-25. The page may look different now.

## Key findings

- Automated classification: Governance Risk.
- Domain age: less than 1 year (registration continuity).
- Public web-archive history exists since 2026.
- No flags from the reputation services TrustSniffer consulted at assessment time.

## Full analysis

### Overview

This website is a software-download page for Corz Client, a free Minecraft 1.21.11 mod designed for DonutSMP. It presents a downloadable Java archive with combat automation, grinding, building, scouting, and visual modules for Windows, macOS, and Linux, with no account or payment requirement stated.

### Scam/Impersonation Risk

No blacklist, phishing, malware, or brand-impersonation contradictions were observed in the available evidence. The site's purpose is consistent across its homepage, modules, download, and FAQ content: it distributes a free game modification rather than soliciting payments or credentials. The principal risk is operational rather than evidentiary of a scam: the download is an executable `.jar` file, and the advertised functions include Auto Crystal, Aim Assist, Trigger Bot, Auto Builder, Area Miner, Player ESP, and other automation features. Such software can introduce malicious-payload, account-security, or game-policy exposure even where no malicious behavior was detected during observation.

#### EVIDENCE

- The homepage describes Corz Client as a free Minecraft 1.21.11 DonutSMP mod distributed as a single `.jar` file with unlocked modules.
- The modules page identifies combat automation, automated building and mining, player overlays, and movement-related functions.
- Observed page behavior showed no login form, hidden sensitive form, external POST activity, wallet interaction, or suspicious inline scripts.
- External reputation checks recorded zero malicious and zero suspicious detections, with no blacklist or phishing hit.

### Regulatory Verification Notes

The site presents a software distribution model rather than a regulated financial service, and no licensing or registration disclosure is established in the supplied page material. The available content refers to installation, supported launchers, modules, FAQ information, and team information, but it does not independently connect the Corz name to a verified real-world legal operator. This is a transparency and identity-verification limitation, not evidence of impersonation or fraud. The domain and transport controls provide technical continuity, while the site remains a newly established online presence.

#### EVIDENCE

- Domain registered in 2026 and approximately 0.01 years old; registrar: Eranet International Limited.
- Archive coverage records 7 snapshots spanning 2026–2026, with 1 year tracked.
- Hosted on AS402253, SKN-NETWORK-1 – SKN Subnet & Telecom Ltd, KN.
- TLS certificate issued by YR2 at DV validation level, valid to 2026-12-18.

### What to Verify Next

Before executing the downloaded archive, confirm that the publisher identity and file provenance can be independently established through the referenced launcher or mod-community channels, and subject the file to current endpoint scanning and sandbox analysis. For any future account-sensitive or higher-value use, independently confirm the operator's contact, support, and software-distribution channels rather than relying solely on the website.

#### EVIDENCE

- The download page provides installation instructions and lists supported launchers, creating specific provenance points for independent comparison.
- The site has no account or payment workflow in the observed pages, limiting the immediate sensitive-interaction surface.
- The observed browser session recorded file-download activity but no external network requests or credential-submission behavior.

Summary Verdict

The website has a **moderate trust posture**: its stated purpose and observed behavior are coherent, and no direct scam or impersonation indicators were identified. Confidence is limited because the real-world operator is not independently verified and the site is still an early-stage presence. The evidence supports cautious, ordinary evaluation rather than unconditional reliance for sensitive activity.

Infrastructure Integrity

Cloudflare CDN/WAF protection provides a mitigating layer against direct exposure of the site's infrastructure. The analysis observed only a CDN edge address, and the origin server was not observable; this limits independent origin verification but is not, by itself, evidence of malicious activity.

Closing Assessment

Prospective users should independently establish publisher provenance and complete endpoint-security checks before running the software, with additional verification before any sensitive or high-value interaction.

Written analysis generated 2026-09-25 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

1 finding contributed to this verdict, raised by registration and ownership.

01 Governance Risk

- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.  
Registration and ownership rule:KF\_WHOIS\_PRIVATE
- The registration record withholds contact details for the operator.  
Registration and ownership rule:KF\_WHOIS\_HIDDEN

Identity verification

|                                  |            |
|----------------------------------|------------|
| Status                           | UNVERIFIED |
| Identity score                   | 30/100     |
| Identity verification confidence | 25%        |

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of corzclient.net.

- The request stayed on corzclient.net. It was not redirected to another domain. CLEAR
- Registration is published under Eranet International Limited. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2027-09-19. NOTED

- The earliest public archive of this site is from 2026-09-19. CLEAR
- It is hosted on SKN-NETWORK-1, from a server in KN. NOTED

### About this assessment

A trust score summarises the evidence TrustSniffer could collect about corzclient.net at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
