

Is cosoft.co.za legit? TrustSniffer's high-trust assessment: 100/100

cosoft.co.za

Verdict

100

OUT OF 100

HIGH TRUST

cosoft.co.za appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-01 by automated analysis. Classification confidence 75%.

What this site appears to be

Aura provides restaurant POS and business-management software with stock control, gross-profit reporting, ordering, delivery tracking, workflow automation, hardware, training, and support services.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2007.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website presents Aura as a restaurant point-of-sale and business-management provider, offering software, hardware, stock control, profitability reporting, ordering, delivery tracking, workflow automation, training, support, and integrations for restaurants and multi-location operators.

Scam/Impersonation Risk

No contradictions, phishing indicators, impersonation signals, or confirmed malicious reputation findings were observed. The homepage presents a coherent commercial SaaS model, with specific restaurant functions such as stock variance reporting, quick-service sales, multi-brand kitchen management, web ordering, driver tracking, and customer support. The presence of a search-only form and absence of hidden or sensitive submission forms are consistent with an ordinary business-information website.

- The homepage describes Aura restaurant software, POS hardware, stock control, gross-profit reporting, ordering, delivery tracking, and training.
- The homepage identifies concrete support commitments, including three-year terminal warranties, loan equipment, repairs, and ongoing training.
- External reputation checks recorded zero malicious and zero suspicious detections, with no blacklist or phishing finding.

Regulatory Verification Notes

The site appears to operate as a commercial software and hardware provider rather than presenting a regulated financial service. Its legal and contact content should nevertheless be reviewed for the precise contracting entity, applicable terms, privacy obligations, and any jurisdiction-specific business registration or licensing disclosures; no license claim or license number is evidenced in the supplied material. This is a transparency item for normal due diligence, not an identity contradiction. The domain's registration record identifies Coherent Software Solutions (Pty) Ltd. through 1-Grid, while the site markets the Aura business offering.

- The domain was registered in 2006 and is 20.51 years old; registrar: 1-Grid; registrant organization: Coherent Software Solutions (Pty) Ltd.
- The site's transport certificate is DV, issued by YE2, valid through 2026-09-19.
- The website has a measurable established traffic footprint within the global top million, with rank 563040.
- The broker-intelligence dataset recorded no matching entity; this is contextual reputation evidence, not a licensing determination.

What to Verify Next

Before a material procurement or deployment decision, the contracting entity, service terms, data-processing responsibilities, warranty commitments, and any required local registrations should be confirmed through the

site's legal and support materials and, where relevant, the applicable corporate registry. Official support and contact channels should also be confirmed through an independent business record or established offline relationship.

- The homepage provides navigation to Company News, Support Policy, FAQ, Security, Contact, and Request Quotation pages.
- The site identifies dedicated support, training, repairs, integrations, and enterprise-control functions.
- The business model is presented as restaurant software, hardware, implementation, support, and related services rather than an investment or financial-return proposition.

Summary Verdict

The website has a high-trust posture consistent with a legitimate, established business-software provider. Its coherent commercial identity, long operating history, clean external reputation, stable behavior, and consistent page content support normal interaction, including account login and standard use.

Infrastructure Integrity

The website is served through Amazon infrastructure using AS16509, with AWS CDN/WAF protection and observed edge hosting in Ireland. This protective architecture mitigates direct origin exposure and strengthens the site's defensive posture, although infrastructure protection alone is not proof of legitimacy.

- Hosted on AS16509, Amazon Data Services Ireland Ltd.; observed IP: 79.125.21.179.
- AWS CDN/WAF protection was detected, with one observed edge IP and no origin candidate identified.

Closing Assessment

Normal business engagement is appropriate, with ordinary procurement, contractual, privacy, and operational due diligence applied before any enterprise deployment.

Written analysis generated 2026-08-01 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of cosoft.co.za.

- The request stayed on cosoft.co.za. It was not redirected to another domain. CLEAR
- Registration is published under 1-Grid. CLEAR

- DNS for this domain is served by awsdns-24.net, across 4 name servers. NOTED
- The registration is paid up to 2027-02-02. NOTED
- The earliest public archive of this site is from 2007-10-12. CLEAR
- It is hosted on AMAZON-02, from a server in IE. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about cosoft.co.za at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
