

Is crazy2cdn.com a scam? TrustSniffer's high-risk assessment: 1/100

crazy2cdn.com

Verdict

1

OUT OF 100

CRITICAL RISK

crazy2cdn.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-09-22 by automated analysis. Classification confidence 55%.

What this site appears to be

A minimal 404-style 'Not Found' page with very little content and no forms, links, or monetization signals.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

At a glance

The checks that decide most of this verdict.

Malware engines	20 flagged it VirusTotal	RISK
Google Safe Browsing	Not listed Google	CLEAR
Abuse reports on the host	0 reports AbuseIPDB; shared hosting inflates this count	NOTED
Domain age	2.4 years old Registered history	CLEAR
Web archive	Archived since 2024 Public history exists	CLEAR
Certificate	Encrypted connection Issued by YR2	NOTED

The page as captured

<https://crazy2cdn.com/>

Not Found

What crazy2cdn.com served when TrustSniffer captured it on 2026-09-22. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 1 to 3 years (registration continuity).
- Public web-archive history exists since 2024.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet, Kaspersky, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

The website currently presents only a minimal “Not Found” error page, with no visible business description, transactional functionality, user forms, or stated commercial purpose; its apparent public function is therefore limited to serving an informational or error response.

Scam/Impersonation Risk

The site warrants a clearly cautionary assessment because external security telemetry recorded malicious detections and confirmed blacklist matches. These signals outweigh the benign appearance of the captured page: the homepage contains only a short error response, with no login form, payment flow, wallet connection, suspicious script activity, or visible brand-impersonation content. No identity contradiction was observed, but the real-world operator remains unverified, and the confirmed blacklist status creates a material risk for sensitive interaction. The site should be treated as suitable only for passive observation unless independently cleared.

EVIDENCE

- The homepage returned a 404-style “Not Found” page with nine characters of visible text and no forms, internal links, or external links.
- External reputation telemetry recorded 20 malicious detections and 2 suspicious detections, alongside blacklist matches from two sources.
- The registration record shows creation on 2026-06-17, with a recorded domain age of 0.27 years.
- Historical records show 7 archive snapshots from 2024-04-12 through 2025-01-24, covering 2 tracked years.

Regulatory Verification Notes

No regulated business activity, licensing claim, corporate identity, or registration number is visible on the captured page. This is a disclosure gap rather than independent proof of misconduct, particularly because the available page is an error response rather than an operating service. The site’s transport security and hosting arrangements demonstrate technical deployment but do not establish legal identity, authorization, or regulatory standing. A separate broker-reputation dataset produced no match; that result is contextual only and does not constitute a licensing determination.

EVIDENCE

- The captured homepage identifies only the page state as “Not Found” and provides no company, license, or regulatory disclosure.
- The site is hosted on AS14061, DIGITALOCEAN-ASN – DigitalOcean, LLC, US.
- The TLS certificate is issued by YR2, uses Domain Validation (DV), and is valid to 2026-11-14.
- No broker-dataset match was recorded for the site.

What to Verify Next

Before any sensitive interaction, an organization should confirm the domain’s ownership and intended purpose through an independent corporate or regulatory registry, establish whether a legitimate service is expected to operate at the domain, and validate any future contact channels through an independently sourced route. Login, credential submission, financial activity, and other sensitive actions should remain suspended unless those checks produce a clear, independently corroborated explanation for the blacklist findings.

EVIDENCE

- The captured page provides no operating-business details against which a corporate or regulatory identity can be compared.
- The page contains no login, payment, wallet, or other sensitive-interaction mechanism requiring immediate use.
- The available security telemetry includes confirmed blacklist matches and malicious detections that require external resolution before sensitive use.

Summary Verdict

The overall posture is **critical trust risk**. The site’s minimal presentation does not offset the confirmed external threat detections and blacklist status, while the operator’s identity remains unverified. Sensitive interaction is not supported by the available evidence.

Infrastructure Integrity

The website is protected by a CDN/WAF layer, and the observed edge address is associated with AS14061 and DigitalOcean, LLC; the origin server was not observable in this analysis. This infrastructure can reduce direct exposure and limit certain forms of origin discovery, but it is only a mitigating technical control and does not counter the site’s external reputation risk.

Closing Assessment

The appropriate course is to avoid credentials, financial activity, and other sensitive actions unless independent ownership, purpose, and threat-status checks establish a defensible basis for engagement.

Written analysis generated 2026-09-22 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

- 01 Governance Risk

 - Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE
 - The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN
- 02 Sensitive Interaction Risk

 - The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
 - An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of crazy2cdn.com.

- The request stayed on crazy2cdn.com. It was not redirected to another domain. CLEAR
- Registration is published under DYNADOT LLC. CLEAR
- DNS for this domain is served by awsdns-53.org, across 4 name servers. NOTED
- The registration is paid up to 2027-06-17. NOTED
- The earliest public archive of this site is from 2024-04-12. CLEAR
- It is hosted on DIGITALOCEAN-ASN, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about crazy2cdn.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
