Full analysis

Overview

The Crazy Store is an established-looking online retail storefront offering consumer goods across household, fashion, pets, toys, stationery, outdoor, and related categories, with product pricing, promotions, store-location information, customer sign-up, and a loyalty-club proposition supporting direct retail sales.

Scam/Impersonation Risk

No contradictions were observed. The homepage presents a coherent retail catalogue rather than a phishing, investment, or payment-redirection model; the available behavioural evidence also found no login form, hidden sensitive form, wallet interaction, cloaking, or suspicious script activity. The site's long registration continuity and sustained archival presence are consistent with an established retail web property, although the real-world operator remains independently unverified. The external reputation evidence contains no confirmed malicious, phishing, impersonation, or blacklist finding.

EVIDENCE

- The homepage identifies "The Crazy Store," displays departments, named consumer products, prices, promotions, and a store finder, with no observed impersonation indicators.
- The homepage archive records 263 snapshots spanning 2006–2026, covering 21 tracked years.
- Domain registration records show registration in 1999 and an age of 27.02 years.
- The contact and account-related page review found no login form, hidden form, wallet-connect activity, or suspicious external destination.

Regulatory Verification Notes

The site operates as a conventional consumer-goods retailer and does not present a financial or other regulated-service proposition requiring the type of licensing disclosure associated with investment, lending, or brokerage platforms. Its visible navigation includes About Us, Contact Us, Careers, Privacy Policy, Refunds and Returns Policy, and Terms & Conditions, which supports ordinary retail transparency, but the available evidence does not independently verify the operator's real-world identity. Registration records associate the domain with Melbro Retail (Pty) Ltd through Lexsynergy Limited; that technical registration association should not be treated as conclusive proof of the operating entity. No adverse broker-reputation match was identified.

EVIDENCE

- The homepage links to About Us, Contact Us, Careers, Privacy Policy, Refunds and Returns Policy, and Terms & Conditions.
- The domain registration record lists Melbro Retail (Pty) Ltd and Lexsynergy Limited as the registrar.
- The site is served from AS20473, AS-VULTR – The Constant Company, LLC, US.
- The site's TLS certificate is issued by YE2 at DV validation level and is valid to 2026-09-26T07:19:41+00:00.

What to Verify Next

Before credential or payment interaction, an interested party should independently confirm that the merchant identity associated with the site matches the relevant store or corporate records, review the applicable returns and refund terms, and use payment methods that provide appropriate transaction protection. Official contact and store channels should be confirmed through an independent route rather than relying solely on information presented on the website.

EVIDENCE

- The homepage provides a Store Finder and Contact Us route for checking the merchant's operating presence.
- The site exposes dedicated Refunds and Returns Policy and Terms & Conditions pages for transaction review.
- The site promotes sign-up and a loyalty club, making independent confirmation of account-purpose and communications channels appropriate before registration.

Summary Verdict

The overall posture is **high trust and low risk**, and the available evidence is consistent with an established, apparently legitimate retail website. This conclusion supports normal browsing and ordinary retail use, while the independent connection between the website and its real-world operator remains unverified.

Infrastructure Integrity

The site resolves directly to one observed hosting address on Vultr's AS20473 infrastructure in the United States, with no CDN or WAF layer detected. This is a straightforward hosting posture rather than an additional trust proof; the absence of observed malicious behaviour and the presence of valid transport encryption remain the relevant mitigating technical signals.

Closing Assessment

Ordinary use is proportionate to the current assessment, with independent merchant-identity, returns, and payment-protection checks completed before credentials or payment details are submitted.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about crazystore.co.za at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
