

Is creatic.com.ar a scam? TrustSniffer's high-risk assessment: 0/100

creatic.com.ar

Verdict

0

OUT OF 100

CRITICAL RISK

creatic.com.ar shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-22 by automated analysis. Classification confidence 55%.

What this site appears to be

Corporate website for Creatic SRL offering IT infrastructure, security, VoIP, custom development and IoT solutions with a contact form and office address in Argentina.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

At a glance

The page as captured

<https://creatic.com.ar/>

•CREATIC•

What creatic.com.ar served when TrustSniffer captured it on 2026-08-22. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2012.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

The website is a corporate presentation for Creatic SRL, an Argentina-based business that offers IT infrastructure maintenance, data networks, IP telephony, security and surveillance systems, custom software development, and IoT solutions to business customers through service contracts and project work.

Scam/Impersonation Risk

The site's stated business model is conventional B2B IT services, and its homepage presents detailed service descriptions rather than an overt financial or cryptocurrency solicitation. The page-level review found no login form, hidden form, wallet functionality, or explicit phishing or brand-impersonation indicators. However, this benign presentation is materially outweighed by confirmed blacklist findings and fifteen malicious detections from external security assessment, including detections associated with two established security providers. Two suspicious inline scripts were also observed during behavioral analysis. These signals create a direct contradiction between the site's corporate presentation and its external security posture; the site should

therefore be treated as **high risk for sensitive interaction**, despite the absence of overt fraud language on the page.

EVIDENCE

- The homepage describes Creativ SRL's IT consulting, network, IP telephony, security-monitoring, custom-development, and IoT services.
- External security assessment recorded 15 malicious detections and confirmed blacklist status.
- Behavioral analysis of the homepage identified 2 suspicious inline scripts, while recording no external XHR activity or hidden forms.
- The domain was registered in 2012 and is 14.108 years old according to registration-continuity data.

Regulatory Verification Notes

The available site content identifies the business as "Creativ SRL" and describes corporate IT services, but the operator's real-world identity remains unverified. No license claim, licensing authority, or license number is present in the supplied business-model evidence. This is a regulatory and disclosure verification gap rather than, by itself, proof of fraud; in this case, however, it must be considered alongside the confirmed blacklist findings described above. The available third-party broker dataset produced no name match, which provides no independent regulatory confirmation.

EVIDENCE

- The homepage title identifies "Creativ | Creativ SRL - Servicios IT."
- The site presents an Argentina office address and a contact form, but no verified licensing disclosure is recorded.
- The site's TLS certificate is Domain Validated, issued by WE1, and valid to 2026-11-09T22:02:26+00:00.
- The domain's registration continuity is recorded as 14.108145106091717 years.

What to Verify Next

Before any credential, payment, procurement, or remote-access engagement, an independent party should confirm Creativ SRL's legal existence and operating details through the relevant Argentine corporate and tax registries. Any claimed office address and contact route should be validated through an independently sourced telephone number or other offline channel, rather than relying solely on the website. Security teams should also obtain current endpoint and infrastructure assurances before allowing the site or associated resources into trusted enterprise workflows.

EVIDENCE

- The homepage contains one contact form and presents an office address in Argentina.
- The site is classified as a corporate/business page and does not expose a login form or sensitive-input form.
- The stated commercial model is based on IT service contracts and project fees rather than direct financial solicitation.

Summary Verdict

The overall posture is **critical**, with sensitive-interaction risk taking precedence over the site’s otherwise ordinary corporate presentation. The available evidence does not establish a verified real-world operator, and the confirmed external security contradictions prevent the website from being treated as trustworthy for credentials, payments, or other sensitive activity.

Infrastructure Integrity

The website is protected by Cloudflare CDN/WAF infrastructure, and all observed addresses were CDN edge addresses rather than an independently visible origin. This provides a meaningful layer of exposure mitigation, but it is only a protective infrastructure signal and does not resolve the external security findings or establish operator legitimacy.

EVIDENCE

- Served from AS13335, CLOUDFLARENET — Cloudflare, Inc., US.
- Four observed addresses were identified as Cloudflare edge servers; 0 likely origin addresses were identified.
- The observed IPv4 edge address included 172.67.156.183.

Closing Assessment

Pending independent identity and security validation, activity should remain limited to passive review, with no submission of credentials, financial information, or privileged enterprise access.

Written analysis generated 2026-08-22 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox, external reputation.

01 Governance Risk

- The public registration record for this domain is incomplete.
Registration and ownership rule:KF_WHOIS_INCOMPLETE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- The page carried inline scripts written in a style TrustSniffer treats as suspicious.
Behaviour in a sandbox rule:BEHAV_SUSPICIOUS_INLINE_SCRIPTS
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of [creatic.com.ar](#).

- The request stayed on [creatic.com.ar](#). It was not redirected to another domain. [CLEAR](#)
- The earliest public archive of this site is from 2012-07-12. [CLEAR](#)
- It is hosted on CLOUDFLARENET, from a server in US. [NOTED](#)

About this assessment

A trust score summarises the evidence TrustSniffer could collect about [creatic.com.ar](#) at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that

evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
